In this book Christopher Pines demonstrates that Karl Marx conceived of ideology as false consciousness. He shows how the different meanings of false consciousness found in the writings of Marx and Engels reflect the influence of the views of the Baconian-French Enlightenment and of Hegelian Feuerbachian philosophies. Pines argues that, for Marx, the diverse senses of false consciousness all generally denote a social consciousness that takes certain false things to be true regarding matters of significance to class-divided societies.

An offbeat penguin shows his peers the power of individuality in this humorous tale from the author of Pookins Gets Her Way.

Tacky is an odd bird. He likes to do splashy cannonballs and greet his companions with a loud "What's happening?" In fact, he's something of an eccentric, which wouldn't be a problem if all the other penguins weren't such...conformists. When intimidating visitors invade their peaceful, nice, icy land, it'll take a lot more than a bunch of perfect penguins to save the day. Thank goodness Tacky's such an odd bird! "This book is must reading for any kid—or grown-up—who refuses to follow the pack."—Publishers Weekly

Timothee de Fombelle and Isabelle Arsenaault capture the heart-wrenching cost of war for one small girl in a delicately drawn, expertly told tale. While her father is at war, five-year-old Rosalie is a captain on her own secret mission. She wears the disguise of a little girl and tracks her progress in a secret notebook. Some evenings, Rosalie's mother reads aloud Father's letters from the front lines, so that Rosalie knows he is thinking of her and looking forward to the end of the war and to finally coming home. But one day a letter comes that her mother doesn't read to her, and Rosalie knows her mission must soon come to an end. Author Timothee de Fombelle reveals the true consequence of war through the experiences of small, determined Rosalie, while acclaimed artist Isabelle Arsenaault illustrates Rosalie's story in muted grays marked with soft spots of color -- the orange flame of Rosalie's hair, the pale pink of a scarf, the deep blue ink of her father's letters. All the more captivating for the simplicity with which it is drawn and told, this quiet tale will stay with the reader long after its last page is turned.

*Imprisoned in English* argues that in the present English-dominated world, social sciences and the humanities are locked in a conceptual framework grounded in English and that scholars need to break away from this framework to reach a more universal, culture-independent perspective on things human.

The cat with boots. (Le Maître Chat ou le Chat bottand, in French) is a European folk tale compiled, in 1695, by Charles

Perrault and published in 1697 in his book *Tales of Antañor* (Histoires ou contes du temps passand. Avec des moralitands). as Master Cat or Puss in Boots. 3. It tells the story of a cat that, based on cunning and deceit, you get the fortune and the hand of a princess for your master, totally poor. The 1695 handwritten book is dedicated to Mademoiselle, niece of Louis XIV. Puss in Boots was a hit from its first publication and remains popular, despite its ambiguous morals. The character is inspired by at least two stories previously written: the novel *The Pleasant Nights* by Gianfrancesco Straparola (1550, the first part and 1553, the second part) and the *Pentameron* (The tale of tales), collection of stories by Giambattista Basile published in five volumes, from 1634 to 1636. Puss in Boots has inspired designers, composers, choreographers, and just about every type of artist. It appears in the third act of the ballet *The Sleeping Beauty* of Tchaikovsky. In addition, the adaptations of the story have been multiple, from theater to cinema and comics, through opera, parodies ...

For a meaningful understanding of physics, it is necessary to realise that this corpus of knowledge operates in a register different from natural thought. This book aims at situating the main trends of common reasoning in physics with respect to some essential aspects of accepted theory. It analyses a great many research results based on studies of pupils and students at various academic levels, involving a range of physical situations. It shows the impressive generality of the trends of common thought, as well as their resistance to teaching. The book's main

focus is to underline to what extent natural thought is organised. As a result of this mapping out of trends of reasoning, some suggestions for teaching are presented; these have already influenced recent curricula in France. This book is intended for teachers and teacher trainers principally, but students can also benefit from it to improve their understanding of physics and of their own ways of reasoning.

École coranique, collège, séminaire, pensionnat, cité universitaire avant la lettre ... : en arabe, le terme de "madrasa" recouvre quantité d'acceptions. Du Proche-Orient au Maghreb, l'ouvrage étudie l'évolution de l'architecture des principales madrasas (historique, éléments architectoniques, études des plans et masses, analyses des formes décoratives, rapports avec la maison particulière), et renouvelle les hypothèses sur la signification des madrasas cruciformes à quatre iwans = Koranic school, college, seminary, boarding school, campus before the letter ... : in Arabic, the term "madrasa" covers many of these meanings. From Middle East to North Africa, the book examines the evolution of the architecture of main madrasas (historical, architectural elements, study plans and bodies, analysis of decorative forms, reports with the special house); it also renews the assumptions on the significance of cross-shaped madrasas at four iwans.

Henri a 2 fois plus de chances de mourir d'un infarctus que René. Chaque mois, les revues scientifiques internationales publient des dizaines de résultats de ce genre. Pour les spécialistes, dont fait partie l'auteur, il n'y a plus de doute : la télévision est un fléau. Elle exerce une influence profondément négative sur le développement intellectuel, les résultats scolaires, le langage, l'attention, l'imagination, la créativité, la violence, le sommeil, le tabagisme, l'alcoolisme, la sexualité, l'image du corps, le comportement alimentaire, l'obésité et l'espérance de vie. Ces faits sont niés avec un aplomb fascinant par l'industrie audiovisuelle et son armée d'experts complaisants. La stratégie n'est pas nouvelle : les cigarettiers l'avaient utilisée, en leur temps, pour contester le caractère cancérigène du tabac... Michel Desmurget est docteur en neurosciences. Après avoir fréquenté plusieurs grandes universités américaines (MIT, Emory, UCSF), il est aujourd'hui directeur de recherche à l'INSERM. Il est l'auteur de *Mad in USA* (Max Milo, 2008).
