 Alternative Investments: A Primer for Investment Professionals provides an overview of alternative investments for institutional asset allocators and other overseers of portfolios containing both traditional and alternative assets. It is designed for those with substantial experience regarding traditional investments in stocks and bonds but limited familiarity regarding alternative assets, alternative strategies, and alternative portfolio management. The primer categorizes alternative assets into four groups: hedge funds, real assets, private equity, and structured products/derivatives. Real assets include vacant land, farmland, timber, infrastructure, intellectual property, commodities, and private real estate. For each group, the primer provides essential information about the characteristics, challenges, and purposes of these institutional-quality alternative assets in the context of a well-diversified institutional portfolio. Other topics addressed by this primer include tail risk, due diligence of the investment process and operations, measurement and management of risks and returns, setting return expectations, and portfolio construction. The primer concludes with a chapter on the case for investing in alternatives.

 The Department of the Navy wants to improve shore installation operations, readiness, and management by skillfully leveraging state-of-the-market technologies and business methods such as outsourcing, privatization, and partnerships with state and local governments, with a goal of reduced cost of infrastructure. For the Navy itself, where all forces float or fly, the shore establishment is synonymous with infrastructure, which includes "all activities that provide support or control of forces from fixed bases of operation."
