In einer sich rasant verändernden Welt sieht sich die Automobilindustrie fast täglich mit neuen Herausforderungen konfrontiert: Der problematischer werdende Ruf des Dieselmotors,

verunsicherte Verbraucher durch die in der Berichterstattung vermischte Thematik der Stickoxid- und Feinstaubemissionen, zunehmende Konkurrenz bei Elektroantrieben durch neue Wettbewerber, die immer schwieriger werdende öffentlichkeitswirksame Darstellung, dass ein großer Unterschied zwischen Prototypen, Kleinserien und einer wirklichen Großserienproduktion besteht. Dazu kommen noch die Fragen, wann die mit viel finanziellem Einsatz entwickelten alternativen Antriebsformen tatsächlich einen Return of Invest erbringen, wer die notwendige Ladeinfrastruktur für eine Massenmarktauglichkeit der Elektromobilität bauen und finanzieren wird und wie sich das alles auf die Arbeitsplätze auswirken wird. Für die Automobilindustrie ist es jetzt wichtiger denn je, sich den Herausforderungen aktiv zu stellen und innovative Lösungen unter Beibehaltung des hohen Qualitätsanspruchs der OEMs in Serie zu bringen. Die Hauptthemen sind hierbei, die Elektromobilität mit höheren Energiedichten und niedrigeren Kosten der Batterien voranzutreiben und eine wirklich ausreichende standardisierte und zukunftssichere Ladeinfrastruktur darzustellen, aber auch den Entwicklungspfad zum schadstofffreien und CO₂-neutralen Verbrennungsmotor konsequent weiter zu gehen. Auch

das automatisierte Fahren kann hier hilfreich sein, weil das Fahrzeugverhalten dann – im wahrsten Sinne des Wortes – kalkulierbarer wird. Dabei ist es für die etablierten Automobilhersteller strukturell nicht immer einfach, mit der rasanten Veränderungsgeschwindigkeit mitzuhalten. Hier haben Start-ups einen großen Vorteil: Ihre Organisationsstruktur erlaubt es, frische, unkonventionelle Ideen zügig umzusetzen und sehr flexibel zu reagieren. Schon heute werden Start-ups gezielt gefördert, um neue Lösungen im Bereich von Komfort, Sicherheit, Effizienz und neuen Kundenschnittstellen zu finden. Neue Lösungsansätze, gepaart mit Investitionskraft und Erfahrungen, bieten neue Chancen auf dem Weg der Elektromobilität, der Zukunft des Verbrennungsmotors und ganz allgemein für das Auto der Zukunft.

Microwave Effects on DNA and Proteins Cambridge University Press

An unprecedented number of people is currently on the move seeking refuge in Europe. Large parts of European societies respond with anxiety and mistrust to the influx of people. Nationalist, anti-migrant parties from Slovakia over Germany to the UK have gained increasing support among the electorate and challenge the political mainstream. Europe is struggling how to respond. While the search for solutions is ongoing one pattern seems to be emerging: Fortress Europe is in the making. Unfortunately, few of these discussions and measures consider the structural root causes and dynamics of migration, the motives of migrants or societal challenges more thoroughly. This book seeks to address this deficit. Taking migration and asylum policies as a starting point, it analyses the various dimensions underpinning migration. In doing so, it identifies why receiving countries are in many ways part of the problem. To eschew an overtly Euro-centric perspective and stimulate a debate between science and politics, it contains contributions by academics and practitioners alike from both shores of the Mediterranean.

Calling others in to lead for social justice has never been more important. In a world plagued by multiple and overlapping pandemics and other crises, the cost of leadership failures is constantly rising. Leadership education is responding to these challenges by centering cultural relevance, critical pedagogies, and important issues of identity, capacity, and efficacy in the preparation of emerging learners. Meeting the global demand for social justice requires thoughtful, innovative, and engaged praxes by all leadership educators. Alongside a cadre of diverse authors, we intend to shift the mindset of leadership education toward forward-thinking and holistic solutions, empowering our students to build a fairer and more equitable world for themselves and others. *Shifting the Mindset: Socially Just Leadership Education* widens and deepens the discourse begun in *Changing the Narrative: Socially Just Leadership Education*. Our contributors' ideas occur into two parts: the first examines student social identities otherwise underrepresented in existing leadership education literature. The second portion illuminates key factors of leadership learning contexts frequently under- or unattended in both leadership education and social justice

education. Every chapter includes critical considerations and practical guidance for educators striving to meet the leadership demands of an increasingly unjust world. Taken together, these thinking, planning, and acting tools augment the potential of educators who are preparing leaders under uncertain conditions. We envision this book as an essential element of the leadership learning toolkit of socially just leadership educators at all levels, between contexts, and across varying amounts of education, influence, and experience. You are needed now more than ever before. We, once again, invite you to our ongoing fight for fairness, freedom, and a brighter future for all.

For several years, researchers have been reporting the effects of microwave radiation/heating on both the structure and function of DNA, RNA and proteins. For the most part, favourable accelerated biological functions are observed as microwave induced heating occurs, but other not-

so favourable effects are also observed, such as denaturation, fragmentation and the so called and ill-explained, non-thermal microwave effects. This volume, the first of its kind, brings researchers together from around the world to discuss their current findings and thinking on the effects of Microwaves on Biological systems, particularly DNA, RNA and proteins, in the form of contributed edited chapters.

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.
