*Half a Century of Music in England, 1837-1887* Carlton, Vic. : Melbourne University Press  
 This text thoroughly examines both the practical and theoretical issues involved in using intellectual property for collateral for corporate financing. With contributions from 18 leading intellectual property experts, it provides theoretical and policy analysis for Canada (including a definitive analysis of Quebec Civil Code theory and practice), the U.K. and the EU, the U.S.A. and Australia.  
*Security Interests in Intellectual Property* Thomson Carswell  
 Personal property security is an important subject in commercial practice, as it is the key to much of the law of banking and sale. This second edition has been fully updated and expanded to cover all important issues and changes within this highly complex area of law. It explains traditional methods of securing debts (such as mortgages, charges, and pledges) on property other than land, describing how these are created, how they must be registered (or otherwise 'perfected') if they are to be valid, the rights and duties of the parties, and how the security is enforced if the debt is not paid. The new edition includes an expanded section on priorities in which it explains how 'priority' disputes between competing interests over the same property are resolved. In addition the book covers the law governing other transactions that perform a similar economic function

(such as finance leases, retention of title clauses, and sales of a company's book debts). These are not currently treated by the law as security and are therefore subject to different rules on perfection, priority, and enforcement. There is much expansion of the discussion relating to enforcement including the issue of 'right of use' following Lehman, more analysis on administration and all forms of non-possessory security and quasi-security, and a new chapter on enforcement of security addressing the right of appropriation under FC/FCAR and the Cukurova case. The conflict of laws section includes developments under the Rome I Regulation affecting assignment issues, the UNIDROIT Convention 2009 in relation to tiered holdings and the Cape Town Convention's extensions made to coverage of asset-backed security over equipment. It also addresses the changes brought about by the abolition of Slavenburg registration. This edition contains relevant points from the Banking Act 2009 concerning its impact on security, such as the power to protect certain interests on a transfer of property, and also considers amendments regarding liquidators' expenses under the Insolvency Rules. The authors additionally deal with the role of step-in rights and why they are part of the statutory definition of project finance in the Enterprise Act. Previously published as *The Law of Personal Property Security*, this new edition brings together all of the law on this complex area, providing guidance in the context of commercial practice, especially with increased coverage of conflict of laws, priority, insolvency, and enforcement.

The events of November 1975 sparked off lively debate as to what the Governor-General does. The real point at issue in that controversy was not whether a Governor-General has the power to dismiss a Prime Minister. The fact that the power was exercised is proof that the power exists. The question to be asked is whether the Govenor-General was justified by the facts as he saw and interpreted them, and, if he were justified, whether he was wise to use the power. There is a difference between an extreme situation and a customary action. The controversy over the dismissal of a Prime Minister concentrated attention on one aspect, but in this lucid essay Sir Paul Hasluck sets out the wide range of the Governor-General's duties and the place of office in the whole structure of Australian government.

Membership in the Christian faith is objective-it can be photographed and fingerprinted. In baptism, God names us and imposes gracious obligations upon us. Multitudes of faithless, corrupt Christians show that they do not believe what God said at their baptism. Unfortunately, many Presbyterians don't believe these biblical promises either. Perhaps they should take some exceptions to the Westminster Confession. Perhaps they should also note the quotation marks in this book's title.

Social Democracy is on the back-foot, and increasingly centre-left political parties are struggling to win office. Bringing together a range of leading academics and experts on social democratic politics and policy, *Why the left loses* offers an international, comparative view of the changing political landscape, examining the degree to which the centre-left project is exhausted and is able to renew its message in a neo-liberal age. Using case studies from the UK, Germany, Spain, France, Australia and New Zealand contributors argue that despite different local and specific contexts, the mainstream centre-left is beset by a range of common challenges. Analysis focuses on institutional and structural factors, the role of key individuals, especially party leaders, and the atrophy of progressive ideas in explaining why the centre-left is currently in retreat. *Why the Left Loses* is aimed at stimulating wider debate about the fortunes of the centre-left.

The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, *Steak* is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

Charles Hallas one of the leading musicians of the nineteenth century and intimate with almost all of the great composers and performers of his time, as well as a friend of the Royal Family and known as much as a pianist and chamber musician as a conductor, in London, throughout the country and abroad, in addition to Manchester. Robert Beale presents a new perspective on Hall life and achievement, constructed mainly from primary sources, which serves to dispel many of the inaccuracies and omissions that have stemmed, to a great extent, from Hall own autobiographical account of 1896. His edited memoirs omit much of the competition and controversy, struggles and disappointments of his career in Manchester, and, indeed, hardly convey the scope of his activities elsewhere. Hallas a key figure in the shift from contemporary to classical repertory in orchestral concerts and piano performance. Not only did he found the Manchester orchestra, in 1862-3 he also gave the first known cycle of Beethoven's piano sonatas. His early annual recital series in London marked a new era in the musical history of his time. The formation of the modern 'symphony orchestra' took place during the period of Hall professional life, and he was a pioneer in the process, in both artistic and business terms. Having adopted the role of orchestral conductor when it was itself relatively novel, he became one of the acknowledged masters of the craft over four and half decades - as well as continuing to appear as solo pianist and chamber musician, and in addition he was enormously influential as musical pedagogue and educationist.

Berlioz was one of the towering figures of Romanticism: not only was he a great and revolutionary composer, but also the finest composer of his day and an outstanding critic and writer. Yet throughout his life he struggled for money and his music was persistently reviled in his native France. With exceptional insight and sympathy, David Cairns draws together the major strands of Berlioz's life: his tempestuous marriage to the actress Harriet Smithson; the genesis of his famous works, including the Requiem, Romeo and Juliet and his crowning masterpiece *The Trojans*; his friendships with Mendelssohn, Liszt, Princess Wittgenstein and Wagner; and, finally, his last years haunted once again by personal tragedy. Here, as never before, is Berlioz the artist - and the man.

For every transnational lawyer, it is vital to know the differences between national secured transactions laws. Since the applicable law is determined by the place where the collateral is situated, it may change when movables are brought from one state to another. Introductory essays from comparative lawyers set the scene. The book then presents a survey of the law relating to secured transactions in the member states of the European Union. Following the Common Core approach, the national reports are centred around fifteen hypothetical cases dealing with the most important issues of secured transactions law, such as the creation of security rights in different business situations, the relationship between debtor and secured creditor, the nature of the creditor's rights and their enforcement as against third parties. Each case is followed by a comparative summary. A general report evaluates the possibilities of European harmonisation in the field of secured transactions law.

John Preston (1587-1628) stands as a key figure in the development of English Reformed orthodoxy in the courts of Elizabeth I and James VI. Often cited as a favorite of the English and American Puritans who came after him, he nevertheless stood as a bridge between the crown and the nonconformists. Jonathan D. Moore retrieves Preston from his traditional place as one of the "Calvinists against Calvin," provides a convincing argument for Preston's unique hypothetical universalism, and calls into question common misperceptions about Reformed theology and Puritanism.
