### Animal Beauty IntroBooks

A new novel by a towering presence in contemporary South African literature In 1971, nineteen citizens of Excelsior in South Africa's white-ruled Free State were charged with breaking apartheid's Immorality Act, which forbade sex between blacks and whites. Taking this case as raw material for his alchemic imagination, Zakes Mda tells the story of a family at the heart of the scandal -and of a country in which apartheid concealed interracial liaisons of every kind. Niki, the fallen madonna, transgresses boundaries for the sake of love; her choices have repercussions in the lives of her black son and mixed-race daughter, who come of age in post-apartheid South Africa, where freedom prompts them to reexamine their country's troubled history at first hand. By turns earthy, witty, and tragic, *The Madonna of Excelsior* is a brilliant depiction of life in South Africa and of the dramatic changes between the 1970s and the present. Encouragement Makes Good Things Happen John Wiley & Sons Dieses Werk ist Teil der Buchreihe TREDITION CLASSICS. Der Verlag tredition aus Hamburg veröffentlicht in der Buchreihe TREDITION CLASSICS Werke aus mehr als zwei Jahrtausenden. Mindfulness is the elementary human aptitude to feel own presence, i.e., being conscious of the point of the existence of self and the corresponding boundary of performance, posing complete rejection to the undue recognition or excessive activities, revolving around alarmingly. Awakening to the 3-pronged internal functional structure of the physical, mental and spiritual processes, lying dormant in an individual is the prime objective of mindfulness. Mindfulness is naturally present in a person's mind and soul, but it warrants a steadfast practice and exertion that should be included in daily chores. Then only, this abstract element can be viewed as a tangible object and mindfulness will complete its full circle. Sometimes, knowledge is taken as lessons of what a person observes straight through senses or thoughts and perceptions. This indicates that a particular person is mindful. Experiments are always on the path of an impulsive run in displaying that an individual is reshaping the brain's physical framework when the brain is educated to be mindful.

In this important book Niklas Luhmann - one of the leading social thinkers of the late 20th century - analyses the emergence of 'love' as the basis of personal relationships in modern societies. He argues that, while family systems remained intact in the transition from traditional to modern societies, a semantics for love developed to accommodate extra-marital relationships; this semantics was then transferred back into marriage and eventually transformed marriage itself. Drawing on a diverse range of historical and literary sources, Luhmann retraces the emergence and evolution of the special semantics of passionate love that has come to form the basis of modern forms of intimacy and personal relationships. This classic book by Luhmann has been widely recognized as a work of major importance. It is an outstanding contribution to social theory and it provides an

original and illuminating perspective on the nature of modern marriage and sexuality.

For Descartes, knowledge exists as ideas in the mind that represent the world. In a radical critique, Hubert Dreyfus and Charles Taylor argue that knowledge consists of much more than the representations we formulate in our minds. They affirm our direct contact with reality—both the physical and the social world—and our shared understanding of it.

Martin Mosebach's novel *What Was Before* opens with a young couple enjoying a moment of carefree intimacy. Then the young woman, turning slightly more serious, asks her lover that fateful question, one that sounds so innocent but carries toxic seeds of jealousy: What was your life like before you met me? The answer grows into an entire book, an elaborate house of cards, filled with intrigue, sex, betrayal, exotic birds, and far-flung locations. Set against the backdrop of Frankfurt's affluent suburbs, this elliptical tale of coincidence and necessity unfolds through a series of masterly constructed vignettes, which gradually come together to form a scintillating portrait of the funny, tender, and destructive guises that love between two people can assume and the effect it has on everyone around them. Hailed in Germany as the first great social novel of the twenty-first century, *What Was Before* is an *Elective Affinities* for our time.

### *Introduction To Mindfulness* Schocken

Available in English for the first time, *Encouragement Makes Good Things Happen* is a translation of the bestselling German book *Mut Tut Gut*. It describes a courageous and encouraging style of living and focuses on the belief that human encouragement is the most important natural ingredient for the healthy development of human beings. Written in an engaging and conversational tone,

the book first explores the negative consequences of discouragement on the individual and on society as a whole. It then discusses what encouragement is, why it is important in people's lives, and how a person can encourage both himself and others. Several exercises are also included to help guide readers in the encouragement of others. Mental health practitioners of all disciplines and in any setting will find that both they and their clients will benefit from the insights garnered and tested by the author of this engaging and compelling book.

**The Village Against the World** Cambridge University Press  
Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology: the threat of nuclear war, ecological ravage, genetic engineering, and the like. Though informed by a deep reverence for human life, Jonas's ethics is grounded not in religion but in metaphysics, in a secular doctrine that makes explicit man's duties toward himself, his posterity, and the environment. Jonas offers an assessment of practical goals under present circumstances, ending with a critique of modern utopianism.

Hannah Arendt was born in Germany in 1906 and lived in America from 1941 until her death in 1975. Thus her life spanned the tumultuous years of the twentieth century, as did her thought. She did not consider herself a philosopher, though she studied and maintained close relationships with two great philosophers—Karl Jaspers and Martin Heidegger—throughout their lives. She was a thinker, in search not of metaphysical truth but of the meaning of appearances and events. She was a questioner rather than an answerer, and she wrote what she thought, principally to encourage others to think for themselves. Fearless of the consequences of thinking, Arendt found courage woven in each and every strand of human freedom. In 1951 she published *The Origins of Totalitarianism*, in 1958 *The Human Condition*, in 1961 *Between Past and Future*, in 1963 *On Revolution* and *Eichmann in Jerusalem*, in 1968 *Men in Dark*

*Times*, in 1970 *On Violence*, in 1972 *Crises of the Republic*, and in 1978, posthumously, *The Life of the Mind*. Starting at the turn of the twenty-first century, Schocken Books has published a series of collections of Arendt's unpublished and uncollected writings, of which *Thinking Without a Banister* is the fifth volume. The title refers to Arendt's description of her experience of thinking, an activity she indulged without any of the traditional religious, moral, political, or philosophic pillars of support. The book's contents are varied: the essays, lectures, reviews, interviews, speeches, and editorials, taken together, manifest the relentless activity of her mind as well as her character, acquainting the reader with the person Arendt was, and who has hardly yet been appreciated or understood. (Edited and with an introduction by Jerome Kohn)

Robert Bosch (1861 - 1942) was one of the most successful German entrepreneurs and philanthropists of the 20th century and, at the same time, a pioneer of the social market economy. This book presents a comprehensive and impressive biography of a visionary who thought far ahead of his time like almost no other. Peter Theiner follows the traces of this trailblazer of modernity who founded a global company. 1886, Robert Bosch opened his *Werkstätte für Feinmechanik und Elektrotechnik*, today's Robert Bosch GmbH, in a modest rear building. Pioneering innovations for motorized vehicles emerged from the young company, and Bosch was quickly able to point to tremendous international successes as an industrialist. Today, his name represents the rise of motor vehicles and electricity in the home. In addition, he also had an impact as a benefactor and philanthropist with a well-developed political profile and a strong sense of social responsibility. In a time of wars and upheaval, in an age of extremes, Bosch positioned himself as a staunch Democrat who cut against the grain of German history.

The Vitra Design Museum Collection is one of the most important design collections in the world. It totals around 20,000 items, including 7,000 pieces of furniture, over 1,000 lighting objects and archives and estates from designers such as Charles and Ray Eames, Verner Panton and Alexander Girard. In summer 2016, the museum opened a building by architects Herzog & de Meuron to permanently present this collection: the Vitra Schaudapot. The centerpiece of the Schaudapot is a permanent exhibition of more than 400 key objects of modern furniture design from 1800 to the present. This presentation is complemented by smaller temporary exhibitions on themes related to the collection, a material library and an extensive digital catalogue. The Schaudapot constitutes the largest permanent exhibition on modern furniture design and at the same time a 'transparent design museum', making visible the work of the museum in all its facets. The publication sheds light on different aspects of the Schaudapot. The iconic building is illustrated in largescale photographs and drawings. The presentation of the collection in the interior is likewise shown using insightful imagery, augmented by a chronological overview of the exhibited objects. Short essays embed the objects within the context of design history and bring to light the curatorial decision-making behind the presented objects. The book is an attractive field guide through the history of furniture design and act as a portal to understand the Vitra Design Museum's unique collection - at the same time being the publication on one of the latest buildings by star architects Herzog & de Meuron.

This title provides a thorough theoretical and practical introduction to the application of neural networks to pattern recognition and intelligent signal processing. It has been tested on students, unfamiliar with neural networks, who were able to pick up enough details to successfully complete their masters or final year undergraduate projects. The text also presents a comprehensive treatment of a class of neural networks called common bandwidth spherical basis function NNs, including the probabilistic NN, the modified probabilistic NN, and the general regression NN.
