Indicators of Social and Economic Well-being by Race and Hispanic Origin National Academies Press

The aim of the Encyclopedia is to provide a convenient, authoritative and up-to-date reference work that encompasses not simply disciplinary studies of race and ethnic relations, but also inter-disciplinary and global scholarship concerning a broadly-defined set of topics and themes within the general field. Entries will be written by experts drawn from across the social sciences and historical studies, as well as from other relevant disciplines and professional fields that intersect with racial and ethnic questions. Thus biologists, psychologists, lawyers, social workers and specialists from business and management fields will broaden the scope and range of the Encyclopedia.

Furthermore, the editors will use their extensive international networks to expand the variety of the contributors so as to make the work interesting and accessible to the widest possible global audience. The Encyclopedia will be global in its scope and include more contributors than any other from scholars and other experts in Japan, China, Russia, South Asia, the Middle East, Africa and Latin America to enhance the variety of perspectives and traditions employed, and generate exposure and interest around the world. Entries will cover the fields of race, ethnicity and nationalism, recognizing the close inter-relationship between scholarship and research on all three subject areas. Stress on inter-disciplinary perspectives will be sought wherever appropriate. Contributions will be included that explore the importance and impact of race, ethnicity and nationalism on private, public and not-for-profit organizations and institutions in the modern, global world. This will make the volumes attractive in the fields of organization studies and management, to students in business schools, and to those in the public sector, where the challenges of multi-culturalism and diversity are hot topics. This 5-volume Encyclopedia will have broader coverage and a greater number of entries than anything else available in the field, with scope to expand the 400 entries in the draft list accompanying this proposal to a final list of 550-600 or more, with the length of each entry ranging from 500 to 5000 words. In addition to the basic terms and concepts, it will include specially commissioned essays exploring a variety of themes that link and analyze exciting new developments in the field. For example, the impact of global terror on migration flows, immigrant assimilation, racial conflict and levels of nationalist mobilization will address some of the vital intellectual and practical problems of the twenty first century. Another area of increasing salience is the manner in which international organizations - whether in the private domain or those established by the UN or inter-state treaties - are influenced by, and in turn have a vital impact on, the status of minorities and minority-majority relationships. A third example is the repercussions of war and economic globalization on patterns of group relationships at both the inter- and intra-state levels. By incorporating not only the basic materials vital for any student seeking to understand contemporary race relations and nationalism, but also relevant essays developing cutting edge issues in the modern world system, it is intended to make the Encyclopedia both practically indispensable and intellectually exciting.

Scholars have sought, over many decades, to understand the mystique surrounding Booker T. Washington. He is an enigma and continues to be lauded by those who offer him and his ideas as a model for Black Progress. He was both simple and complex; a passive observer on some issues and an active participant in others; non-assuming, yet egoistic, and a very public man who talked freely with others, yet, a private man who kept certain social tactics and strategies close to his chest. He

sought to both make sense of his world, then to manipulate that world in order to obtain from it those things he most wanted and needed. This volume provides the reader with a wide inter-disciplinary landscape with which to assess Washington. We continue to study and research the life and works of Washington because, though we've moved beyond Washington and the ideology of race and racial politics of his times on certain levels, yet in reality, this generation is confronted with all the contradictions and ambiguities around race, and class, which Washington encountered and for which he sought solutions. For example, as black Americans continue to be mired in the deficits of educational opportunity and development, employment opportunities and occupational advancements, and health and medical problems, we are reminded of Washington's arguments for greater individual and group black self-sufficiency and self-reliance, as well as the need for practical educational objectives which Washington advocated under aegis of vocational education. As we move into the new century, the economic and educational goals and programs highlighted by Washington remain forgotten and unfulfilled. Hopefully, the articles in this volume will force a re-thinking of Was

This chart book is designed to document current differences in well-being by race and Hispanic origin and to describe how such differences have evolved over the past several decades. The charts included in this book show key indicators of well-being in seven broad categories: (1) population; (2) education; (3) labor markets; (4) economic status; (5) health; (6) crime and criminal justice; and (7) housing and neighborhoods. Each section begins with a brief introduction and overview of the charts presented. This information provides a benchmark for measuring future progress and can highlight priority areas for reducing disparities across racial and ethnic groups. All the racial and ethnic groups considered here have experienced substantial improvements in well-being over the second half of the century, but disparities between groups have persisted, or in some cases, widened. An example is the decline in the relative economic status of Hispanics over the past 25 years, reflecting the increasing proportion of Hispanics with lower average levels of education, in large part because of immigration. The section on education, which makes disparities in educational attainment and achievement clear, contains information on family participation in literacy activities and preschool education. One chart reviews computer use by elementary school children, and two charts cover reading and mathematics proficiency scores, both of which have implications for the pursuit of higher education. Three charts focus on the educational attainment of adults over 25 years old. An appendix provides a list of other government publications and Internet addresses for more information. (Contains 49 graphs and bar charts.) (SLD)

American Ethnicity is a brief text that provides an accessible introduction to the dynamics of racial and ethnic relations. Key concepts and theories are summarized, and the authors develop a simple theoretical framework that guides the presentation of data on each of the prominent ethnic groups in America. As a result, this book examines each ethnic group from the same perspective, allowing students to compare the dynamics of discrimination against African Americans, Native Americans, Asian and Pacific Island Americans, white ethnic Americans, and Latinos.

A longtime professor of Ethnic Studies at the University of California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.

Understanding Racial and Ethnic Differences in Health in Late Life Westview Press

As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

You hold in your hand a dangerous book. Because it rejects as it clarifies most of the current wisdom on race, ethnicity, and immigration in the United States, *The Ethnic Myth* has the force of a scholarly bomb. --from the Introduction by Eric William Lott In this classic work, sociologist Stephen Steinberg rejects the prevailing view that cultural values and ethnic traits are the primary determinants of the economic destiny of racial and ethnic groups in America. He argues that locality, class conflict, selective migration, and other historical and economic factors play a far larger role not only in producing inequalities but in maintaining them as well, thus providing an insightful explanation into why some groups are successful in their pursuit of the American dream and others are not.

In a nation built by immigrants and bedeviled by the history and legacy of slavery and discrimination, how do we, as Americans, reconcile a commitment to equality and freedom with persistent inequality and discrimination? And what can we do about it? This widely acclaimed text by Paula D. McClain provides a comprehensive and accessible overview of the historical and contemporary political experience of the major groups—African Americans, Latinos, Asian Americans, and American Indians—in the United States. It explores the similarities and differences in these groups' representation and participation in law, politics, and policymaking, discusses the enduring issues and concerns that they face, and examines intra- and inter-group competition and coalition-building in the face of enduring conflict and inequality. The seventh edition has been thoroughly revised and updated to include coverage of President Barack Obama's final term, the 2016 election, police brutality and the Black Lives Matter movement, environmental racism and the Flint water crisis, and the increasing racialization of Muslim Americans in the US post-9/11. With a brand-new chapter on the intersections of race and gender, "Can We All Get Along" remains unparalleled in its comparative coverage of the current landscape of minority politics in the United States.

Race, Ethnicity and Health, Second Edition, is a new and critical selection of hallmark articles that address health disparities in America. It effectively documents the need for equal treatment and equal health status for minorities. Intended as a resource for faculty and students in public health as well as the social sciences, it will be also be valuable to public health administrators and frontline staff who serve diverse racial and ethnic populations. The book brings together the best peer reviewed research literature from the leading scholars and faculty in this growing field, providing a historical and political context for the study of health, race, and ethnicity, with key findings on

disparities in access, use, and quality. This volume also examines the role of health care providers in health disparities and discusses the issue of matching patients and doctors by race. There has been considerable new research since the original manuscript's preparation in 2001 and publication in 2002, and reflecting this, more than half the book is new content. New chapters cover: reflections on demographic changes in the US based on the current census; metrics and nomenclature for disparities; theories of genetic basis for disparities; the built environment; residential segregation; environmental health; occupational health; health disparities in integrated communities; Latino health; Asian populations; stress and health; physician/patient relationships; hospital treatment of minorities; the slavery hypertension hypothesis; geographic disparities; and intervention design.

"Blood Politics offers an anthropological analysis of contemporary identity politics within the second largest Indian tribe in the United States--one that pays particular attention to the symbol of "blood." The work treats an extremely sensitive topic with originality and insight. It is also notable for bringing contemporary theories of race, nationalism, and social identity to bear upon the case of the Oklahoma Cherokee."—Pauline Turner Strong, author of *Captive Selves, Captivating Others: The Politics and Poetics of Colonial American Captivity Narratives*

Critical Perspectives on Racial and Ethnic Differences in Health in Late Life National Academies Press

The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world. Groups commonly referred to as minorities—including Asian Americans, Pacific Islanders, African Americans, Hispanics, American Indians, and Alaska Natives—are the fastest growing segments of the population and emerging as the nation's majority. Despite the rapid growth of racial and ethnic minority groups, their representation among the nation's health professionals has grown only modestly in the past 25 years. This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions. In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity, and identifies institutional and policy-level mechanisms to garner broad support among health professions leaders, community members, and other key stakeholders to implement these strategies. Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans.

In sheer numbers, no form of government control comes close to the police stop. Each year, twelve percent of drivers in the United States are stopped by the police, and the figure is almost double among racial minorities. Police stops are among the most recognizable and frequently criticized incidences of racial profiling, but, while numerous studies have shown that minorities are pulled over at higher rates, none have examined how police stops have come to be both encouraged and institutionalized. *Pulled Over* deftly traces the strange history of the investigatory police stop, from its discredited beginning as "aggressive patrolling" to its current status as accepted institutional practice. Drawing on the richest study of police stops to date, the authors show that who is stopped and how they are treated convey powerful messages about citizenship and racial disparity in the United States. For African Americans, for instance, the experience of investigatory stops erodes the perceived legitimacy of police stops and of the police generally, leading to decreased trust in the police and less willingness to solicit police assistance or to self-censor in terms of clothing or where they drive. This holds true even when police are courteous and respectful throughout the encounters and follow seemingly colorblind institutional protocols. With a growing push in recent years to use local police in immigration efforts, Hispanics stand poised to share African Americans' long experience of investigative stops. In a country that celebrates democracy and racial equality, investigatory stops have a profound and deleterious effect on African American and other minority communities that merits serious reconsideration. *Pulled Over* offers practical recommendations on how reforms can protect the rights of citizens and still effectively combat crime.
