The *Grove Encyclopedia of Islamic Art and Architecture* is the most comprehensive reference work in this complex and diverse area of art history. Built on the acclaimed scholarship of the *Grove Dictionary of Art*, this work offers over 1,600 up-to-date entries on Islamic art and architecture ranging from the Middle East to Central and South Asia, Africa, and Europe and spans over a thousand years of history. Recent changes in Islamic art in areas such as Afghanistan, Iran, and Iraq are elucidated here by distinguished scholars. Entries provide in-depth art historical and

cultural information about dynasties, art forms, artists, architecture, rulers, monuments, archaeological sites and stylistic developments. In addition, over 500 illustrations of sculpture, mosaic, painting, ceramics, architecture, metalwork and calligraphy illuminate the rich artistic tradition of the Islamic world. With the fundamental understanding that Islamic art is not limited to a particular region, or to a defined period of time, The Grove Encyclopedia of Islamic Art and Architecture offers pathways into Islamic culture through its art.

Guide to Places of the World Weigl Publishers

The history of the Middle East is traditionally structured around the rise and fall of dynasties and states. The widely perceived view is that after the glories of an earlier golden age the region went into a steady and prolonged decline: populations decreased, ancient cities decayed and nomadism spread at the expense of civilized culture. In this pioneering text Peter Christensen challenges this story of decline. Long out of print but now reissued with a new introduction by the author, this important work is both a foundational text in the environmental history of the Middle East and a pioneering reassessment of traditional ideas about the historical processes of Iran and the Middle East region.

Continuity and Change in Medieval Persia Cambridge University Press

This collection will explore the myriad encounters which have taken place between Iranians and Russian in the nineteenth and twentieth centuries. It will include some discussion of diplomacy and foreign policy but a central objective of the collection will be to widen the scholarly perspective to incorporate an understanding of other types of encounter, whether political, economic, social, cultural, or intellectual, and both friendly and hostile, especially as these developed beyond the official and elite levels. In particular it will attempt to understand the complexities of the impact on Iran of the Russian presence on its northern borders: the very expansion of Tsarist empire during the nineteenth century threatening Iran's independence yet bringing ideas of social-democracy to its doorstep, the Soviet Union in the twentieth century similarly contradictory in its effect, sustaining radical Iranian politics while advancing its own strategic interests.

Gareth Stevens Atlas of the World The Rosen Publishing Group, Inc

The #1 Bible Reference book celebrates its 10th anniversary with this 230-page edition that features more Bible maps, charts and illustrations than the original! This stunning, easy-to-understand reference book still provides the same full-color, reproducible Bible charts and overviews that made the original a favorite--but in an easier-to-use, updated format! This 10th anniversary edition of the Rose Book of Bible Charts, Maps and Time Lines features over 200 Bible Charts, Maps, and Timelines--and includes more pages, 6 extra topics, updated information, and a bonus 24" fold-out on Jesus' Family Tree. Every church library and every home should have a copy of Rose Book of Bible Charts, Maps and Time Lines. This book contains thousands of facts that will enrich your understanding and study of the Bible, and will be a great resource as you teach others about the Word of God. "If I could give only two books to a new Christian, one would be the Bible and the other would be this book." --Dr. Ed Hindson, President of

World Prophetic Ministry and pastor on the The King is Coming telecast Features more than 200 reproducible Bible charts, maps, and timelines, including: Foldout Posters: Bible Time Line and Jesus' Genealogy Overviews on Popular Old Testament Topics, including the Tabernacle, Ark of the Covenant, Names of God, Feasts & Holidays of the Bible, and much more Overviews on Popular New Testament Topics, including the 12 Disciples, Armor of God, Fruit of the Spirit, and much more Overviews of Jesus' Life and Teachings Bible Overview: Books of the Bible and Key Bible Stories Christian History, including "How We Got the Bible" and a Christian History Time Line Charts Comparing Christianity to Islam and 20 Other World Religions Overviews on Bible Prophecy, Revelation, and the End Times Bible Maps Bible Illustrations and Diagrams "It is awesome! Rose Publishing has produced one of the finest books I have ever seen. Every aspect of the charts, maps and time lines leaps off the page with spectacular color, incredible accuracy and intricate detail. . . . A must for every pastor and teacher who wants to clearly present the truths of the Bible." --Dr. Jerry Falwell, Founder of Liberty University "A compendium of charts, time lines, lists and illustrations to accompany study of the Bible. This visually appealing resource provides a wide array of illustrative and textually concise references, beginning with three sets of charts covering the Bible as a whole, the Old Testament and the New Testament. These charts cover such topics as biblical weights and measures, feasts and holidays and the 12 disciples. Most of the charts use a variety of illustrative techniques to convey lessons and provide visual interest. A worthwhile example is 'How We Got the Bible, ' which provides a time line of translation history, comparisons of canons among faiths and portraits of important figures in biblical translation, such as Jerome and John Wycliffe. The book then presents a section of maps, followed by diagrams to conceptualize such structures as Noah's Ark and Solomon's Temple. Finally, a section on Christianity, cults and other religions describes key aspects of history and doctrine for certain Christian sects and other faith traditions. Overall, the authors take a traditionalist, conservative approach. For instance, they list Moses as the author of the Pentateuch (the first five books of the Hebrew Bible) without making mention of claims to the contrary. When comparing various Christian sects and world religions, the emphasis is on doctrine and orthodox theology. Some chapters, however, may not completely align with the needs of Catholic and Orthodox churches. But the author's leanings are muted enough and do not detract from the work's usefulness. As a resource, it's well organized, inviting and visually stimulating. Even the most seasoned reader will learn something while browsing. Worthwhile reference stuffed with facts and illustrations." --Kirkus Reviews

Iranian-Russian Encounters National Geographic Books
Cities of Medieval Iran brings together studies in urban geography, archaeology, and history of medieval Iranian cities, covering the millennium from 500 to 1500 AD, with a focus on urban actors themselves.

Special Maps of Persia 1477-1925 Potomac Books

This book tries to answer the question how different communities in such an arid area as the Iranian central plateau could have

shared their limited water resources in a perfect harmony and peace over the course of history. They invented some indigenous technologies as well as cooperative socio-economic systems in order to better adapt themselves to their harsh environment where the scarce water resources had to be rationed among the different communities as sustainably as possible. Those stories hold some lessons for us on how to adjust our needs to our geographical possibilities while living side by side with other people. This work gives insight into the indigenous adaptation strategies through the territorial water cooperation, and describes how water can appear as a ground for cooperation. It explains the water supply systems and social aspects of water in central Iran. Topics include the territorial water cooperation, qanat's, the traditional water management and sustainability, the socio-economic context, the sustainable management of shared aquifers system and more.

Persian Pottery in the First Global Age Oxford University Press

Islamic Gunpowder Empires provides readers with a history of Islamic civilization in the early modern world through a comparative examination of Islam's three greatest empires: the Ottomans (centered in what is now Turkey), the Safavids (in modern Iran), and the Mughals (ruling the Indian subcontinent). Author Douglas Streusand explains the origins of the three empires; compares the ideological, institutional, military, and economic contributors to their success; and analyzes the causes of their rise, expansion, and ultimate transformation and decline. Streusand depicts the three empires as a part of an integrated international system extending from the Atlantic to the Straits of Malacca, emphasizing both the connections and the conflicts within that system. He presents the empires as complex polities in which Islam is one political and cultural component among many. The treatment of the Ottoman, Safavid, and Mughal empires incorporates contemporary scholarship, dispels common misconceptions, and provides an excellent platform for further study.

Trade and Civilisation in the Indian Ocean Elsevier

Geographical differences in living standards are a pressing concern for policymakers in the Middle East and North Africa (MENA). Economies of agglomeration mean that production is most efficient when concentrated in leading areas. So how can the region reduce spatial disparities in well-being without compromising growth? The solution to spatial disparities lies in matching the policy package to a lagging area's specific characteristics. Key questions include: is the lagging area problem really as serious as one thinks; is it a problem of low economic opportunity or of poor human development; are lagging area populations close enough to agglomerations to benefit from spillovers; and is there manifest private investor interest? Drawing on the World Bank's 2009 World Development Report, *Reshaping Economic Geography*, the book proposes 3 policy packages. First, all lagging areas can benefit from a level playing-field for development and investment in people. Geographic disparities in the policy environment are a legacy of MENA's history, and gaps in human development are a major component

of spatial disparities. Smart policies for the investment environment, health, education, social transfers and urban development can therefore close spatial gaps in living standards. Second, lagging areas that are close to economic agglomeration can benefit from spillovers - provided that they are connected. MENA's expenditure priority is not necessarily long-distance primary connections, but infrastructure maintenance and short-distance connections such as rural roads and peri-urban networks. Public-private partnerships can also bring electronic connectivity to lagging areas. Third, shifting regional development policy away from spatial subsidies towards the facilitation of cluster-based growth will increase the chance of cost-effective impacts. The final chapter of the book examines the institutional prerequisites for effective spatial policy. It argues that MENA's centralized/sectoral structures are not always adapted to governments' spatial development agendas, and describes alternative institutional options.

Grove Encyclopedia of Islamic Art & Architecture: Three-Volume Set Cambridge University Press

The author describes how Muslims over the centuries have determined the sacred direction (qibla) towards Mecca and presents two highly sophisticated Mecca-centred world-maps for finding the qibla. These recently-discovered world-maps have forced a reevaluation of Muslim achievements in mathematics and cartography.

The methods and materials of demography CRC Press

Iron Ore: Mineralogy, Processing and Environmental Issues summarizes recent, key research on the characterization of iron ores, including important topics such as beneficiation (separation and refining), agglomeration (e.g., production of pellets or powders), blast furnace technology for smelting, and environmental issues relating to its production. The text is an ideal reference on the topic during a time when iron ore production has increased significantly, driven by increasing demand from countries such as India and China. Provides a comprehensive overview of the global iron ore industry, exploring its characteristics and characterization. Expert analysis of quality requirements for iron production, iron ore agglomeration technologies, environmental issues, and low-emission technologies. Timely text to accompany the increased iron ore production occurring in developing countries like India and China. *Journal of Archaeological Science* Rose Publishing Inc. Provides statistics and political and physiographic maps for the world, each continent, and the United States, with political maps, flags, and statistics for each country, Canadian province, and state of the United States.

Islamic Gunpowder Empires Cambridge University Press

Young readers are introduced to the world's extensive demand for energy and what this demand entails. Informative text, maps, and graphs will help readers understand how countries supply enough energy to meet an overwhelming demand. Brilliant photographs, fun facts, and study questions add another layer to this fascinating topic.

Nomads in the Middle East BRILL

Explores the geography, history, people, and culture of Iran.
