The Modern Procession Edward Elgar Publishing

What has happened to America, and what's become of the American dream? Behind the self-confident image of world's most influential country, we now see a nation tearing itself apart. The United States may be arguably the world's only superpower, but its internal tensions are a symptom of suffering and division, a condition only exacerbated by the election of President Donald Trump. In this searing account, expatriate journalist Alan Friedman returns after thirty years in Europe and examines the real America through the mouths of its citizens. Set against the backdrop of the 2016 presidential election campaign and the inauguration of President Trump, Friedman tells a vivid story of terrible inequality - from the excesses of Wall Street to the grinding poverty of Mississippi - and explores the issues, from racism and gun control to Obamacare, that have polarised a nation. Drawing on his personal interviews with Trump and with Russia's President Putin, Friedman paints a detailed portrait of the new leader of the free world and explores the real risks of the Trump presidency for America and for the world. Dark and provocative, *This Is Not America* may just be the most important book of the year.

This guide to the spiritual and technical practice of this graceful martial art, by 15th-generation master Hideharu Onuma, includes illustrations and rare photographs. Kyudo-the Way of the Bow-is the oldest of Japan's traditional martial arts and the one most closely associated with bushido, the Way of the Warrior. After the Second World War Eugen Herrigel introduced the concept of kyudo to the West in his classic *Zen in the Art of Japanese Archery*. But until now, no Japanese kyudo master has published a book on his art in English. In *Kyudo: The Essence and Practice of Japanese*

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

I could never again maintain that I was caught up in this game unwillingly. I knew now what I wanted to do. Willingly would I accept the hardship and fear, the discipline and the sacrifices, if only I could be given back the chance to climb that mountain.' Joe Tasker lies, struck down by a tooth abscess, in a damp, bug-infested room in the Himalaya, wondering if he will be well enough to climb Dunagiri, his first venture to the 'big' mountains. He is there with Dick Renshaw to attempt to make a two-man ascent of the Peak - one of the first true Alpine-style expeditions to the Greater Ranges; an attempt that forms part of this tale of adventure in the savage vertical arena of hostile mountains. Joe Tasker was one of Britain's foremost mountaineers. A pioneer of lightweight mountaineering and a superbly gifted writer, in *Savage Arena* he vividly describes his participation in the first British winter ascent of the North Face of the Eiger; his first ascent of the West Wall of Changabang with Peter Boardman - considered to be a preposterous plan by the established climbing world; the first ascent of the North Ridge of Kangchenjunga; and his two unsuccessful attempts to climb K2, the second highest mountain in the world. This is a story of single-minded determination, strength and courage in a pursuit which owes much of its value and compulsion to the risks entailed - risks which often stimulate superlative performances. It is also a story of the stresses, strains and tensions of living in constant anxiety, often with only one other person, for long periods in which one is never far from moments of terror, and of the close and vital human relationships which spring from those circumstances. It is a moving, exciting and inspirational book about the adventuring spirit which seeks endless new climbing challenges to face, alluring problems to solve and difficulties to overcome, for it is not reaching the summit which is important, but the journey to it. Joe Tasker and Peter Boardman died on Everest in 1982, while attempting a new and unclimbed line. Both men were superb mountaineers and talented writers. Tasker's first book, *Everest the Cruel Way*, was first published in 1981. *Savage Arena*, his

second book, was completed just before he left for Everest. Both books have become mountaineering class. The literary legacy of Tasker and Boardman lives on through the Boardman Tasker Prize for Mountain Literature, established by family and friends in 1983 and presented annually to the author or co-authors of an original work which has made an outstanding contribution to mountain literature. For more information about the Boardman Tasker Prize, visit: www.boardmantasker.com 'The most riveting book on climbing that I have ever read.' The short film is a unique narrative art form that, while lending itself to experimentation, requires tremendous discipline in following traditional filmic considerations. This book takes the student and novice screenwriter through the storytelling process—from conception, to visualization, to dramatization, to characterization and dialogue— and teaches them how to create a dramatic narrative that is at once short (approximately half an hour in length) and complete. Exercises, new examples of short screenplays, and an examination of various genres round out the discussion. NEW TO THE THIRD EDITION: new screenplays, a chapter on rewriting your script, and a chapter on the future of short films

A memoir of formative years spent on a series of communes: A “wonderful account of a frankly ghastly childhood . . . Hilarious and heartbreaking” (Daily Mail). At the age of six, Tim Guest was taken by his mother to a commune modeled on the teachings of the notorious Indian guru Bhagwan Shree Rajneesh. The Bhagwan preached an eclectic doctrine of Eastern mysticism, chaotic therapy, and sexual freedom, and enjoyed inhaling laughing gas, preaching from a dentist's chair, and collecting Rolls Royces. Tim and his mother were given Sanskrit names, dressed entirely in orange, and encouraged to surrender themselves into their new family. While his mother worked tirelessly for the cause, Tim—or Yogesh, as he was now called—lived a life of well-meaning but woefully misguided neglect in various communes in England, Oregon, India, and Germany. In 1985 the movement collapsed amid allegations of mass poisonings, attempted murder, and tax evasion, and Yogesh was once again Tim. In this extraordinary memoir, Tim Guest chronicles the heartbreaking experience of being left alone on earth while his mother hunted heaven. “An intelligent, wry, openhearted memoir of surviving a childhood and a cultural phenomenon that were both extraordinary.” —Booklist (starred review)

This is one of the most significant military books of the twentieth

century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

No previous collection of criticism has focused on gender in the broad range of children's literature. No previous collection has embraced both children's literature and material culture. Beverly Lyon Clark and Margaret R. Higonnet bring together twenty-two scholars to look closely at the complexities of children's culture. *Girls, Boys, Books, Toys* asks questions about how the gender symbolism of children's culture is constructed and resisted. What happens when women rewrite (or illustrate) nursery rhymes, adventure stories, and fairy tales told by men? How do the socially scripted plots for boys and girls change through time and across cultures? Have critics been blind to what women write about "masculine" topics? Can animal tales or doll stories displace tired commonplaces about gender, race, and class? Can different critical approaches—new historicism, narratology, or postcolonialism—enable us to gain leverage on the different implications of gender, age, race, and class in our readings of children's books and children's culture?

Blockchain is no longer just about bitcoin or cryptocurrencies in general. Instead, it can be seen as a disruptive, revolutionary technology which will have major impacts on multiple aspects of our lives. The revolutionary power of such technology compares with the revolution sparked by the World Wide Web and the Internet in general. Just as the Internet is a means of sharing information, so blockchain technologies can be seen as a way to introduce the next level: sharing value. Blockchain and Web 3.0 fills the gap in our understanding of blockchain technologies by hosting a discussion of the new technologies in a variety of disciplinary settings. Indeed, this volume explains how such technologies are disruptive and comparatively examines the social, economic, technological and legal consequences of these disruptions. Such a comparative perspective has previously been underemphasized in the debate about blockchain, which has subsequently led to weaknesses in our understanding of decentralized technologies. Underlining the risks and opportunities offered by the advent of blockchain technologies and the rise of Web 3.0, this book will appeal to researchers and academics interested in fields such as sociology and social policy, cyberculture, new media and privacy and data protection.

Have you ever wondered where surfing waves come from, what makes every wave different, why some peel perfectly and others just close out; why, some days, the waves come in sets and other days they don't, and how the tides, the wind and the shape of the sea floor affect the waves for surfing? If you have, this book is for you. Now in its third edition, *Surf Science* is the first book to talk in depth about the science of waves from a surfer's point of view. It fills the gap between surfing books and waves textbooks, and will help you learn how to predict surf. *Surf Science* is also a useful introduction to oceanography and the science of waves. You don't need a scientific background to read it - just curiosity and a fascination for waves.
