 Taking as its point of departure Omer Bartov's acclaimed *Anatomy of a Genocide*, this volume brings together previously unknown accounts by three individuals from Buczacz. These rare narratives give personal glimpses into daily life in unsettled times: a Polish headmaster during World War I, a Ukrainian teacher and witness to both Soviet and German rule, and a Jewish radio technician, genocide survivor, and member of the Polish resistance. Together, they offer a prismatic perspective on a

world remote from our own that nonetheless helps us understand how people not unlike ourselves responded to mass violence and destruction.

In the decades between German unification and the demise of the Weimar Republic, German Jewry negotiated their collective and individual identity under the impression of legal emancipation, continued antisemitism, the emergence of Zionism and Socialism, the First World, and revolution and the republic. For many German Jews liberalism and also increasingly Socialism became attractive propositions. Yet conservative parties and political positions right-of-center also held appeal for some German Jews. *Between Heimat and Hatred* studies German Jews involved in ventures that were from the beginning, or became increasingly, of the Right. Jewish agricultural settlement, Jews'

participation in the so-called "Defense of Germandom in the East", their place in military and veteran circles and finally right-of-center politics form the core of this book. These topics created a web of social activities and political persuasions neither entirely conservative nor entirely liberal. For those German Jews engaging with these issues, their motivation came from sincere love of their German Heimat—a term for home imbued with a deep sense of belonging—and from their middle-class environment, as well as to repudiate antisemitic stereotypes of rootlessness, intellectualism or cosmopolitanism. This tension stands at the heart of the book. The book also asks when did the need for self-defense start to outweigh motivations of patriotism and class? Until when could German Jews espouse views to the right of the political spectrum without appearing extreme to either Jews or non-Jews? In an exploration of identity and exclusion, Philipp Nielsen locates the moments when active Jewish members of conservative projects became the radical other. He notes that the decisive stage of the transformation of the German Right occurred precisely during a period of republican stabilization, when even mainstream right-of-center politics abandoned the state-centric, Volk-based ethnic concepts of the Weimar republic. The book builds on recent studies of Jews' relation to German nationalism, the experience of German Jews away from the large cities, and the increasing interest in Germans' obsession with regional roots and the East. The study follows these lines of inquiry to investigate the participation of some German Jews in projects dedicated to originally, or increasingly, illiberal projects. As such it shines light on an area in which Jewish participation has thus far only been treated as an afterthought and illuminates both Jewish and German history afresh.

Language Teachers' Professional Knowledge Landscapes is a collection of fourteen narratives from teachers of different languages, at different school levels, in different contexts across Australia. This volume brings together not simply language teacher stories, but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work, and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of 'levels' of stories told by teachers about their classrooms: the secret, the sacred and the cover stories. The term 'professional knowledge landscape' is used to indicate how teachers can critically situate their work, and thereby understand it better. The collection includes the stories of two outstanding primary language educators, and a story of mixed success in a rural program in teaching the local Aboriginal language (Ngarrabul). There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: 'What blocks language learning in Australia?' They offer the strategies which they have developed, that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example, as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning, which they then offer and extend in student learning. Consistently expressed, there is the need for teachers to take up individual responsibility, while still being strongly supported by their professional community: 'It is us' who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment, and the first volume to address the language education landscape through the voices of active language teachers.

It was the weapon to end all weapons: the doomsday device. A huge nuclear bomb so powerful that it could envelop the entire planet in a cloud of radioactive dust, and bring about instant extinction. This is the untold story of the Cold War's most insane plan, the men behind it and how it nearly happened. It is also the history of humanity's nightmare vision of a superweapon, showing how popular culture, from the stories of H. G. Wells and Jules Verne to films such as Planet of the Apes, Mad Max and Dr Strangelove itself have both shaped and reflected our darkest

dreams.

Drunk on Genocide Penguin UK

In *Drunk on Genocide*, Edward B. Westermann reveals how, over the course of the Third Reich, scenes involving alcohol consumption and revelry among the SS and police became a routine part of rituals of humiliation in the camps, ghettos, and killing fields of Eastern Europe. Westermann draws on a vast range of newly unearthed material to explore how alcohol consumption served as a literal and metaphorical lubricant for mass murder. It facilitated "performative masculinity," expressly linked to physical or sexual violence. Such inebriated exhibitions extended from meetings of top Nazi officials to the rank and file, celebrating at the grave sites of their victims. Westermann argues that, contrary to the common misconception of the SS and police as stone-cold killers, they were, in fact, intoxicated with the act of murder itself. *Drunk on Genocide* highlights the intersections of masculinity, drinking ritual, sexual violence, and mass murder to expose the role of alcohol and celebratory ritual in the Nazi genocide of European Jews. Its surprising and disturbing findings offer a new perspective on the mindset, motivation, and mentality of killers as they prepared for, and participated in, mass extermination. Nursing History Review, Volume 28 Farrar, Straus and Giroux
Convinced that both God and the Kaiser were on their side, the officers and men of the German Army went to war in 1914, confident that they were destined for a swift and crushing victory in the West. The vaunted Schlieffen Plan on which the anticipated German victory was based expected triumph in the West to be followed by an equally decisive success on the Eastern Front. It was not to be. From the winter of 1914 until the early months of 1918, the struggle on the Western Front was characterised by trench warfare. But our perception of the conflict takes little or no account of the realities of life 'across the wire' in the German trenches. This book redresses that imbalance and reminds us how similar these young German men were to our own Tommies. Drawing from diaries and letters, Ian Passingham charts the hopes and despair of the German soldiers, filling an important gap in the history of the Western Front.
