The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

This collection brings together international teacher educators to employ a 'long view' of an historic and values-based dialectic in teacher education. The authors reflect how employing historical consciousness to look back can offer greater continuity to teachers' moral and political values within

their training. The book draws on research from experienced teacher educators representing different historical, social and political contexts in North America, Europe, Asia as well in post-conflict South Africa. Within each section, the authors reflect on the development of the moral and political values of pre-service and in-service teachers in an era of global neo-liberalism and how this is inextricably bound up with the narratives of professionals in the past within their own national context. Each chapter takes a 'long view' of the role of historical consciousness in informing the moral and political values of preservice and in-service teachers, providing examples of how international teacher educators can collectively support one another in restoring a vibrant, values-based dialectic within the processes, pedagogies and provision of university and school-based training for which they are responsible. The 'long view' approach offers a compelling argument for the need to connect pre- and in-

service teachers' values and narrative to the legacy of professionals of the past. Moral and Political Values in Teacher Education over Time will be of great interest to researchers, academics and students in teacher education, comparative education and the history of education. It will also be of interest to international university and school-based teacher educators and policy-makers in the field.

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. Business Review Weekly Canadian Centre Policy Alternatives

The pamphlets reprinted here were first published in the 1910s amid great controversy. Even then, the tactics of direct action and sabotage were often associated with the cartoonists' image of the disheveled, wild-eyed anarchist armed with stiletto, handgun, or bomb—the clandestine activity of a militant

minority or the desperate acts of the unorganized. The activist authors of the texts in this collection challenged the prevailing stereotypes. As they point out, the practices of direct action and sabotage are as old as class society itself and have been an integral part of the everyday work life of wage-earners in all times and places. To the Industrial Workers of the World (IWW) belongs the distinction of being the first workers' organization in the U.S. to discuss these common practices openly, and to recognize their place in working-class struggle. Viewing direct action and sabotage in the spirit of creative nonviolence, Wobblies readily integrated these tactics into their struggle to build industrial unions. Direct action is recognized as a valuable and effective tactic by many movements around the globe and remains a cutting-edge tool for social change. Whenever communities in struggle find more conventional methods of resistance closed to them, direct action and sabotage will be employed. This new edition from the Charles H. Kerr Library contains "Direct Action and

Sabotage" (1912) by William E. Trautmann, "Sabotage: Its History, Philosophy & Function" (1913) by Walker C. Smith, and Elizabeth Gurley Flynn's "Sabotage: The Conscious Withdrawal of the Workers' Industrial Efficiency" (1916), edited and with an introduction by Salvatore Salerno.

The Making of the Modern Indian Artist-Craftsman is intended to be a biographical and critical insight into the work of the potter, painter and photographer Devi Prasad. Apart from the making of his personal history and his times, it leads us to why the act of making (art) itself takes

on such a fundamental philosophical significance in his life. This, the author explains, derives directly from his absorption of Gandhi's philosophy that looked at the act of making or doing as an ethical ideal, and further back to the impact of the Arts and Crafts Movement on the ideology of 'Swadeshi' and on the milieu of Santiniketan. This book examines his art along with his role in political activism which, although garnered on Indian soil made him crisscross national borders and assume an important role in the international arena of war resistance. Devi Prasad graduated from Tagore's Santiniketan in 1944 when he joined the Hindustani Talimi Sangh (which promulgated Nayee Taleem) at Gandhi's ashram Sevagram as Art 'Teacher'. His political consciousness saw him participate actively in the Quit India Movement in 1942, in Vinoba Bhave's Bhoodan and later from 1962 onward as Secretary General (later Chairman) of the War Resisters' International, the oldest world pacifist organisation based in London. From there he was able to extend his Gandhian

values internationally. All of this, while continuing with his life as a prolific artist. Rather than view them as separate worlds or professions, Devi harmonises them within an ethical and conscionable whole. He has written widely on the inextricable link between peace and creativity, on child /basic education, Gandhi and Tagore, on politics and art, in English, Hindi and Bangla. In 2007 he was awarded the Lalit Kala Akademi Ratna and in 2008, the Desikottama by Visva Bharati University, Santiniketan. *Canadian Almanac and Legal and Court Directory* CCH Canadian Limited Focusing on the anatomy of the head and neck, this book begins at the cellular level of development, detailing bone, muscle, blood supply, and innervation along the way. It illustrates the origin of each tissue structure to aid in making prognoses beyond the surface deformation, offering typical issues seen in the craniofacial region, for example. Written by a pediatric Craniofacial plastic surgeon and intended for clinicians and residents in the areas of plastic surgery, ENT, maxillofacial surgery, and

orthodontistry, this book is the first of its kind to focus so intently on evolution of the craniofacial structure. It is neatly broken up into two distinct sections. The first section is meant for readers to gain a fundamental understanding of the development of craniofacial structures, from embryo onward, relying on the concepts of the Neuromeric Theory. The chapters in the first section of the book trace the development of the typical patient. The second section offers clinical examples of how the Neuromeric Theory can be used to repair or reconstruct various regions of the head and neck. Craniofacial clefts, including cleft lip and palate, ocular hypotelorism, anencephaly, craniosynostosis and more are detailed. Understanding the formation of the tissue structures involved in any given genetic deformation or anomaly enables the clinician to provide a more satisfying outcome for the patient, both structurally and aesthetically. New and current therapeutic options are explored and supported through

original illustrations and photographs to aid in determining the best treatment for each individual patient. *Embryological Principles of Craniofacial Structure* bridges the gap between introductory books on the basic anatomy of the head and neck and the detailed understanding required for corrective surgery of craniofacial defects.
