'Giving you all the facts to help you decide how best to have a healthy life. - Dr Phil Hammond
Statins are among the most widely prescribed drugs in the world. Yet many report unacceptable side effects and a US survey

revealed that 75 per cent of respondents stopped taking them within a year. So what is the evidence for their benefits? Dr Aseem Malhotra, author of the bestselling *The 21-Day Immunity Plan* and co-author of the bestselling *The Pioppi Diet*, examines the claims for statins and their role in lowering cholesterol and preventing heart disease. He introduces us to his targeted heart-health plan, which, with a diet plan, recipes and advice on reducing stress and increasing movement, can help us to live statin-free and take control of our own health. 'Backed by science, this is a riveting read for anyone with a heart.' - Liz Earle 'Aseem's

programme gives you the best opportunity for a v long and healthy life.' - Ross Walker 'Get this book to figure out if a statin-free life is right for you.' - Dr Robert Lustig

At a time when the field of cardiac safety is going through important changes, this unique book provides the rationale for, and cutting-edge explanations of, new regulatory landscapes that will likely govern cardiac safety assessments globally for the foreseeable future. Exposure-response modeling is already being accepted by regulatory agencies in lieu of the traditional Thorough QT/QTc Study, and the Comprehensive in vitro

Proarrhythmia Assay initiative is well under way. Developments in the field of cardiovascular safety are also described and discussed in the book. These include the search for more efficient ways to exonerate new drugs for type 2 diabetes from an unacceptable cardiovascular liability, how best to address off-target blood pressure increases induced by noncardiovascular drugs, and the continued evolution of the discipline of Cardio-oncology. "a resource that will likely serve as a standard for years to come" - Dr Jonathan Seltzer Therapeutic Innovation & Regulatory Science, 2017;51(2):180 "I have no hesitation in recommending this

book as a valuable reference source” - Dr Rashmi Shah Journal for Clinical Studies, 2017;9(1):62-63
