AUA Guidelines for Backfilling and Contact Grouting of Tunnels and Shafts CRC Press

Every two years, industry leaders and practitioners from around the world gather at the Rapid Excavation and Tunneling Conference (RETC), the authoritative program for the tunneling profession, to learn about the most recent advances and breakthroughs in this unique field. The information presented helps professionals keep pace with the ever-changing and growing tunneling industry. This book includes the full text of 106 papers presented at the 2021 conference. Though the tunneling industry continues to develop both technically and contractually, one notable adaptation of the last two years has been the onset and management of COVID-19. The hallmarks of tunneling professionals include adaptability, resiliency, optimism, and management of change. These are traits that have been recently put to an entirely new challenge over the last year or so.

We have truly witnessed why what we do is deemed “essential” infrastructure. The COVID-19 pandemic has impacted each of us, personally and professionally, and while times have been hard, we are fortunate to work in a field that is able to meet the challenge and thrive thereafter.

Congratulations are in order to everyone in our industry for keeping the planning and development of projects moving forward and for maintaining safe and productive worksites in these challenging times. Grown Up Digital: How the Net Generation is Changing Your World CRC Press

Salivary Diagnostics surveys one of the most exciting areas of research in oral biology. Regarded as the mirror of the body, saliva has immense potential to yield real clinical improvements in our ability to diagnose, and hence treat, oral and systemic conditions. The composition of saliva and other oral fluids reflects the tissue fluid levels of therapeutic, hormonal, and immunological molecules, as well as the presence of markers for systemic and oral disease. Sprayed Concrete John

Wiley & Sons
Cheese: Chemistry, Physics and Microbiology, Fourth Edition provides a comprehensive overview of the chemical, biochemical, microbiological, and physico-chemical aspects of cheese, taking the reader from rennet and acid coagulation of milk, to the role of cheese and related foods in addressing public health issues. The work addresses the science from the basic definition of cheese, to the diverse factors that affect the quality of cheese. Understanding these fermented milk-based food products is vital to a global audience, with the market for cheese continuing to increase even as new nutritional options are explored. Additional focus is provided on the specific aspects of the ten major variety cheese families as defined by the characteristic features of their ripening. The book provides over 1000 varieties of this globally popular food. Features new chapters on Milk for Cheesemaking, Acceleration and Modification of Cheese Ripening, Cheesemaking Technology, Low-Fat and Low Sodium

Cheesemaking, and Legislation Offers practical explanations and solutions to challenges Content presented is ideal for those learning and practicing the art of cheesemaking at all levels of research and production

Concrete Society for Mining, Metallurgy & Exploration
Mechanised shield tunnelling has developed considerably since the publication of the first edition of this book. Challenging tunnel projects under difficult conditions demand innovative solutions, which has led to constant further development and innovation in process technology, constructions operations and the machines and materials used. The book collects the latest state of technology in mechanised shield tunnelling. It describes the basics of mechanised tunnelling technology and the various types of machines and gives calculation methods and structural advice. Further chapters cover excavation tools, muck handling, tunnel support, surveying and steering as well as workplace safety. There is also detailed information about

contractual aspects and process controlling.
Sprayed Concrete McGraw Hill Professional
This book reviews the progress made in salivary diagnostics during the past two decades and identifies the likely direction of future endeavors. After an introductory section describing the histological and anatomical features of the salivary glands and salivary function, salivary collection devices and diagnostic platforms are reviewed. The field of "salivaomics" is then considered in detail, covering, for example, proteomics, the peptidome, DNA and RNA analysis, biomarkers, and methods for biomarker discovery. Salivary diagnostics for oral and systemic diseases are thoroughly discussed, and the role of salivary gland tissue engineering for future diagnostics is explored. The book closes by considering legal issues and barriers to salivary diagnostic development. Advances in Salivary Diagnostics will be an informative and stimulating reference for both practitioners and students.

"Sprayed Concrete Technology" forms the proceedings of the International Conference organised by the American Concrete Institute and the Sprayed Concrete Association in Edinburgh, Scotland, September 1996.

Water Stress in Plants Academic Press
SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST The Net Generation Has Arrived. Are you ready for it? Chances are you know a person between the ages of 11 and 30. You've seen them doing five things at once: texting friends, downloading music, uploading videos, watching a movie on a two-inch screen, and doing who-knows-what on Facebook or MySpace. They're the first generation to have literally grown up digital-- and they're part of a global cultural phenomenon that's here to stay. The bottom line is this: If you understand the Net Generation, you will understand the future. If you're a Baby Boomer or Gen-Xer: This is your field guide. A fascinating inside look at the Net Generation, Grown Up Digital is inspired by a \$4 million private research

study. New York Times bestselling author Don Tapscott has surveyed more than 11,000 young people. Instead of a bunch of spoiled “screenagers” with short attention spans and zero social skills, he discovered a remarkably bright community which has developed revolutionary new ways of thinking, interacting, working, and socializing. Grown Up Digital reveals: How the brain of the Net Generation processes information Seven ways to attract and engage young talent in the workforce Seven guidelines for educators to tap the Net Gen potential Parenting 2.0: There's no place like the new home Citizen Net: How young people and the Internet are transforming democracy Today's young people are using technology in ways you could never imagine. Instead of passively watching television, the “Net Geners” are actively participating in the distribution of entertainment and information. For the first time in history, youth are the authorities on something really important. And they're changing every aspect of our society-from the workplace to the

marketplace, from the classroom to the living room, from the voting booth to the Oval Office. The Digital Age is here. The Net Generation has arrived. Meet the future.

Society for Mining, Metallurgy & Exploration Developments in Geographic Information Technology have raised the expectations of users. A static map is no longer enough; there is now demand for a dynamic representation. Time is of great importance when operating on real world geographical phenomena, especially when these are dynamic. Researchers in the field of Temporal Geographical Information Systems (TGIS) have been developing methods of incorporating time into geographical information systems. Spatio-temporal analysis embodies spatial

modelling, spatio-temporal modelling and spatial reasoning and data mining. Advances in Spatio-Temporal Analysis contributes to the field of spatio-temporal analysis, presenting innovative ideas and examples that reflect current progress and achievements.

This practical and comprehensive book enables the engineer to diagnose the cause of a fault, choose the appropriate remedial technique and ensure that the repair work is completed satisfactorily. It will be of value to all those who need to commission, supervise or carry out repairs to concrete structures.

The Printing Art John Wiley & Sons

Your timely source for more cost-effective and less disruptive solutions to your underground infrastructure needs. The North American Tunneling Conference is the premier biennial tunneling event for North America, bringing together the

brightest, most resourceful, and innovative minds in the tunneling industry. It underscores the important role that the industry plays in the development of underground spaces, transportation and conveyance systems, and other forms of sustainable underground infrastructure. With every conference, the number of attendees and breadth of topics grow. The authors—experts and leaders in the industry—share the latest case histories, expertise, lessons learned, and real-world applications from around the globe. Crafted from a collection of 126 papers presented at the conference, this book takes you deep inside the projects. It includes challenging design issues, fresh approaches on performance, future projects, and industry trends as well as ground movement and support, structure analysis, risk and cost management, rock tunnels, caverns and shafts, TBM technology, and water and wastewater conveyance.

Cheese CRC Press
 The main focus of this book is innovation for developing countries: what is the innovation for, what are the current conditions of the innovation, and how to effectively innovate in developing economies. It contains the latest insights and analyses of innovation based on intensive interviews as well as primary and secondary data of manufacturing firms in developing countries, Vietnam and Laos in particular. Innovation requires something new. Integration of deep understanding of innovation and econometric analyses are a "new combination" in this book, which contrasts with other, similar books in the field. This new approach may benefit policy makers as well as scholars and firms in poor

countries. The main points of the book are summarized as follows: First, for most poor countries “learning innovation” is considered the key to economic growth rather than “leading-edge innovation”, which is a more popular theme in similar books on innovation. Second, an overwhelming majority of innovations currently used in poor countries are developed in advanced countries, so technology transfer and learning from the latter are a fundamental source of innovation in the former. Third, a surprisingly high rate of firms (around 50%) reported that they introduced new or significantly improved products or processes in poor countries, and this high innovation rate is a great benefit to be enhanced by government policies. Fourth, the common factors driving innovation of manufacturing firms in Vietnam and Laos are (1) human capital, (2) social capital, and (3) innovation in the past. Fifth, the impact of innovation on firm performance is found to be mixed in these countries. Sixth, so far almost all studies on innovation have focused

on product or process innovation, but additional light is shed here on organizational innovation. Advances in Spatio-Temporal Analysis Springer Meeting the hygiene needs of patients is a fundamental aspect of nursing care. This practical and introductory guide outlines and emphasises the nursing skills required to meet the essential personal hygiene care needs of patients in various healthcare settings. It explores care of the eyes, ears, mouth, nails and hair, and provides evidence-based rationales for each procedure. Methods of washing the patient are discussed, and bed-making and patient positioning is explored. Each chapter provides the necessary anatomy and physiology, as well as common conditions, safety issues, privacy and dignity, cultural and religious considerations and infection control issues. SPECIAL FEATURES Identifies the theoretical base underpinning clinical procedures Provides a research and evidence base for nursing practice Equips registered and non-registered staff with the knowledge to carry out safe care delivery

relating to meeting hygiene needs Incorporates recommendations from The Essence of Care Construction Equipment Management for Engineers, Estimators, and Owners Springer Water stress in plants is caused by the water deficit, as induced possibly by drought or high soil salinity. The prime consequence of water stress in plants is the disruption in the agricultural production, resulting in food shortage. The plants, however, try to adapt to the stress conditions using biochemical and physiological interventions. The edited compilation is an attempt to provide new insights into the mechanism and adaptation aspects of water stress in plants through a thoughtful mixture of viewpoints. We hope that the content of the book will be useful for the researchers working with the plant diversity-related environmental aspects and also provide suggestions for the strategists. *Rapid Excavation and Tunneling Conference 2021 Proceedings* CRC Press ICOLD Bulletin 177 ‘Roller-Compacted Concrete

Dams' presents the state-of-the-art on roller-compacted concrete technology for dams, incorporating the advances of the RCC technology for dams over the last 15 years since the previous Bulletin on the topic was released in 2003. Hence, the present ICOLD Bulletin 177 supersedes ICOLD Bulletin 126 ('Roller-compacted concrete dams - State of the art and case histories', published in 2003) and ICOLD Bulletin 75 ('Roller-Compacted Concrete for Gravity Dams' published in 1989). While roller-compacted concrete technology could have still been considered a new technology in 2003, it is now true to say that construction by roller-compaction has become the standard approach for large concrete gravity dams. This Bulletin addresses all aspects of the planning, design, construction and performance of RCC in dams. Mixture proportioning and quality control are discussed and a comprehensive listing of references is included. Many aspects of RCC in dams have become better understood since the publication of Bulletin No 126 and the present Bulletin contains less

information on the particular approaches applied in different countries, but includes more comprehensive information particularly in relation to design, mixture proportioning and construction. With greater understanding, it has further been possible to highlight more definitively the requirements of successful RCC dams, as well as the pitfalls and difficulties that can be associated with RCC dam design and construction. Le Bulletin CIGB 177, intitulé « Barrages en Béton Compacté au Rouleau » présente les dernières avancées en matière de technologie du béton compacté au rouleau pour les barrages intégrant les progrès de la technologie BCR pour les barrages au cours des 15 dernières années, depuis que le dernier bulletin sur le sujet a été publié en 2003. Par conséquent, le bulletin 177 remplace le bulletin 126 (« Barrages en béton compacté au rouleau - Technique actuelle et exemples », publié en 2003) et le bulletin 75 (« Béton compacté au rouleau pour barrages-poids - Technique actuelle » publié en 1989). Alors que la technologie du BCR pourrait encore être

considérée comme une nouvelle technologie en 2003, il est maintenant vrai de dire que la construction par le compactage par rouleaux est devenue l'approche standard pour les grands barrage-poids en béton. Ce bulletin aborde tous les aspects de la planification, de la conception, de la construction et de la performance du BCR dans les barrages. Le dosage du mélange et le contrôle de la qualité sont discutés et une liste exhaustive des références est incluse. De nombreux aspects du BCR dans les barrages sont mieux compris depuis la publication du Bulletin no 126. Le présent bulletin contient moins d'informations sur les approches particulières appliquées dans différents pays, mais comprend des informations plus complètes notamment en ce qui concerne la conception, le dosage du mélange et la construction. Avec une plus grande compréhension, il a été possible de mettre en évidence les exigences des barrages en BCR réussis, ainsi que les pièges et les difficultés qui peuvent être associés à la conception et la

construction du barrage
en BCR.
