Care Work and Care Jobs for the Future of Decent Work

Springer Nature
 The report analyses the ways in which unpaid care work is recognised and organised, the extent and quality of care jobs and their impact on the well-being of individuals and society. A key focus of this report is the persistent gender inequalities in households and the labour market, which are inextricably linked with care work. These gender inequalities must be overcome to make care work decent and to ensure a future of decent work for both women and men. The report contains a wealth of original data drawn from over 90 countries and details transformative policy measures in five main areas: care, macroeconomics, labour, social protection and migration. It also presents projections on the potential for decent care job creation offered by remedying current care work deficits and meeting the related targets of the Sustainable Development Goals.

Equal Pay for Equal Work Kluwer Law International B.V.
 This ILO flagship report examines the evolution of real wages around the world, giving a unique picture of wage trends globally and by region. The 2020-21 edition analyses the relationship of minimum wages and inequality, as well as the wage impacts of the COVID-19 crisis. The 2020-21 edition also reviews minimum wage systems across the world and identifies the conditions under which minimum wages can reduce inequality. The report presents comprehensive data on levels of minimum wages, their effectiveness, and the number and characteristics of workers paid at or below the minimum. The report highlights how adequate minimum wages, statutory or negotiated, can play a key role in a human-centred recovery from the crisis

Labour Problems in Turkey
 This highly successful book, which describes the basic techniques of work study as practiced in many parts of the world, has been widely recognized as the best available introduction to the subject for work study practitioners, teachers and students. It provides training in method study and work measurement and covers not only machine shops but also process industries, the services sector and office work. Reference is made throughout to the use of information systems and computerization to solve work study problems. It also covers production management approaches and their relation to work study. Numerous illustrations and examples of work study practice are included as well.

Publications of the International Labour Office
 This open access book explores the role of the ILO (International Labour Organization) in building global social governance from multiple and mutually complementary perspectives. It explores the impact of this UN's oldest agency, founded in 1919, on the transforming world of work in a global setting, providing insights into the unique history and functions of the ILO as an organization and the evolution of workers' rights through international labour standards stemming from its regulatory mechanism. The book examines the persistent dilemma of balancing the benefits of

globalization with the protection of workers. It critically assesses the challenges that emerge when international labour standards are implemented and enforced in highly diverse regulatory frameworks in international, regional, national and local contexts. The book also identifies feasible ways to achieve more inclusive labour protection, putting into perspective the tension between the economic and the social in the ILO's second century of operation. It includes reflections on the work of the ILO World Commission on the Social Dimension of Globalisation by Tarja Halonen, who as President of Finland co-chaired the Commission with Benjamin William Mkapa, President of Tanzania. Written by distinguished experts and scholars in the fields of international labour law and international law, the book provides an insightful and in-depth analysis of the role of the ILO as an international organization devoted to decent work and social justice. It also sheds light on tripartism and its particular role in the work of the ILO, examining the challenges that a profoundly changing working life presents in terms of labour protection and social justice, and examining the transnational dimension of labour law. Lastly, the book includes a postscript by Nobel economics laureate Professor Joseph E. Stiglitz.

Monthly Summary of the International Labour Organisation

Platform work - the matching of the supply of and demand for paid labour through an online platform - often depends on workers who operate in a "grey area" between the archetype of an employee and a self-employed worker. This important book explores the utility of the International Labour Organization's existing standards in governing this phenomenon. It indicates that despite their relevance, many standards have little or no impact. The standards apply to the issue but they fail to connect with it. The author shows how three ILO conventions - the Home Work Convention, 1996 (No. 177), the Private Employment Agencies Convention, 1997 (No. 181), and the Domestic Workers Convention, 2011 (No. 189) - can be revitalised to have an impact on the platform work debate. In the course of the analysis he responds in depth to such questions as the following: What are digital labour platforms? What does decent work mean? Did the ILO centenary fundamentally change anything? What is the link

between private employment services and platform work? How do crowdworkers relate to homeworkers and teleworkers? Are platform workers engaged in domestic work? What form could a future ILO standard on platform work take? Given that the ILO plans to start discussions on a potential future standard for platform work in 2022, this book will prove very useful in highlighting the issues and standards that such discussions should consider. Research has shown that the techniques and tools of the platform economy have spread far beyond gig work, resulting in widespread “gigification” and restructuring of workplace behaviours and relationships, jobs, and communities across the world. For this and other reasons, including the book’s detailed analysis of issues not addressed elsewhere, labour lawyers, in-house counsel, researchers, and policymakers will gain valuable insight into what decent work in the platform economy would require, thus greatly broadening the discussion on this difficult-to-regulate phenomenon.

1919-1964

This book is the first comprehensive account of the International Labour Organization’s 100-year history. At its heart is the concept of global social policy, which encompasses not only social policy in its national and international dimensions, but also development policy, world trade, international migration and human rights. The book focuses on the ILO’s roles as a key player in debates on poverty, social justice, wealth distribution and social mobility subjects and as a global forum for addressing these issues. The study puts in perspective the manifold ways in which the ILO has helped structure these debates and has made – through its standard-setting, technical cooperation and myriad other activities – practical contributions to the world of work and to global social policy.

Report of the Governing Body of the International Labour Office Upon the Working of the Convention (no. 20) Concerning Night Work in Bakeries

With the spread of the COVID-19 pandemic, many in the world’s workforce have shifted to homeworking, thereby joining the hundreds of millions of workers who have already been working from home for decades. This report seeks to improve understanding of home work as well as to offer policy guidance that can pave the way to decent work for homeworkers both old and new
