Dropout Prevention Tools
HighWater Press
This book helps you make sense of the data your school collects, including state student achievement results as well as other qualitative and quantitative data. Easy-to-use templates, tools, and examples are available on the accompanying CD-ROM. High stakes accountability requires that you develop your understanding of who your students are and how to get them where you want them to be.

Improving Student Learning One Teacher at a Time National Professional Resources Inc
This volume provides examples of current developments on the role of ICT for education, development, and social justice within an international context. Chapters draw on advanced contemporary thinking from scholars and practitioners in the

field to present case studies of how ICT can be used to promote sustainable development and social justice. Social justice is understood in a wide sense as the pursuit of democracy, justice and development in the struggle against any form of oppression; it is within this context that ICT is explored as a tool for social change. The objectives of this book are: - To analyze the philosophical, historical, political, and cultural backgrounds and contexts that are constitutive of contemporary challenges and tensions in the role of ICT for education, development, and social justice around the world; - To appreciate the contextual and international dimensions of the tensions and challenges faced by educators around the world and contribute to ongoing efforts to sketch a vision for addressing their needs; - To explore ways in which ICT in education can promote social justice and contribute toward sustaining communities around the world

Improving Teacher Education Through Action Research

 UNDA Publishing

The go-to book for including ALL learners in educational success! Teaching students with diverse needs require educators to employ empathy, responsiveness, and patience. This book has long been the indispensable resource for K-12 teachers as they confidently form lesson plans and strategies for inclusion. In this new edition, Toby J. Karten's data-driven methods are updated with the latest research and policy developments. The book's content includes: Updated information on ADA, IDEA, writing IEPs, transitional services, classifications, RTI, metacognitive strategies, and links to the Common Core Tips for working with families and making them an integral part of the inclusive team An overview of special education legislative terminology Interactive online forms for planning, documentation, and collaboration

Cure Student
Underachievement is the culmination of the authors' research, practice, and experience as principals, superintendents, graduate professors, and consultants in efforts to improve school performance and increase student achievement. Searching for the real causes of underperformance, the authors explored problem-solving strategies in several fields. The authors find that clinical practice identifies the root causes rather than the symptoms of problems, focusing valuable time, resource, and energy on prescriptions with greater promise for improved performance health. The concepts of diagnosis, prescription, and prognosis establish a foundation for improved planning and problem solving. This book introduces practicing leaders and leaders-in-training to the protocols of clinical practice by taking the reader through the twelve steps of the clinical cycle with specific strategies and exercises to provide practice in the

application, use, and assessment of the model.

Using Data to Improve Student Learning in High Schools

Corwin Press

In this powerful new book, James Rickabaugh, former superintendent and current director of the Institute for Personalized Learning (IPL), presents the groundbreaking results of the Institute's half-decade of research, development, and practice: a simple but powerful model for personalizing students' learning experiences by building their levels of commitment, ownership, and independence. Tried and rigorously tested in urban, suburban, and rural districts--and in different academic and economic settings--the IPL model has been proven to enhance student engagement and achievement at all levels. Rickabaugh provides principals and other top-level leaders with * Step-by-step guidance for implementing the model; * A detailed overview of the research and work behind the model's development; * A complete introduction to the heart of the model—a comprehensive, multi-layered framework centered on the three

core components of learner profiles, customized learning paths, and proficiency-based progress; * Tools and activities for assessing and adjusting the model to meet the specific needs of students and staff; * Strategies for increasing and reinforcing enthusiasm for the change process among everyone involved, from the classroom to the greater community; and * An abundance of real-life examples and reflections from students, teachers, principals, and superintendents whose schools have flourished in record time and with minimal additional funding or resources. Tapping the Power of Personalized Learning offers a blueprint that dramatically improves student outcomes and prepares today's learners to meet life's challenges in college and beyond. *Projects in Progress - Coordinating Committee on Research in Vocational Education* Springer Nature Discover how Whole-Faculty Study Groups (WFSGs) use collaborative action research to involve an entire professional learning community in improving staff and school performance. The Hands-On Guide to

School Improvement

Corwin Press

Counseling expert V. Scott H. Solberg introduces a new paradigm and framework for career development focused on teaching skills that all students need to set long-term goals and experience post-secondary success. Based on nearly a decade of research and technical assistance in schools, the book shows how educators can leverage the use of individual learning plans (ILPs) to help students identify their interests and create their own career pathways using resources inside and outside of school. In *Making School Relevant with Individualized Learning Plans*, Solberg argues that the most effective career development is delivered using a multiyear whole-school approach led by caring advisors and other mentors, combined with the use of readily available online tools and resources. Core chapters provide examples of specific activities and resources that advisors and others can draw on for helping students develop three critical skill sets: self-exploration, career exploration, and career planning and self-

management, which are needed to succeed in the world of work. This book will help educators and youth development leaders understand how ILPs prepare their youth to become college- and career-ready and thereby transition from high school with the competencies and drive necessary to pursue their career and life goals.

50 Ways to Close the Achievement Gap

Springer Nature

This book's five-step continuous improvement model shows how to transform schools with value-added analysis—the most robust, statistically significant method for measuring student learning over time.

Theory and Research in Behavioral Pediatrics

SAGE

At this book's core is the fundamental belief that teacher quality is the single most important factor in student learning. It shows you how to improve your students' academic achievement by focusing on what teachers know and are able to do. This brief handbook serves as a practical tool which provides professional growth benchmarks for aspiring and practicing teachers; a framework to use when

hiring new teachers; common language for dialogues on learning and for teacher evaluation; and a clearer focus on professional development. Six Standards of Practice is presented in simple, practical, classroom-oriented terms. Also displayed are rubrics which reveal and distinguish “emerging”, “developing”, “proficient”, and “advanced” practices. *Personalized Professional Learning for Educators: Emerging Research and Opportunities* IAP Clear, updated guidelines for increasing academic performance and providing educational equity for all students! This revised guide outlines 50 strategies for developing high-performing schools. Emphasizing educational parity for all students, the book is organized around six standards: Teach a well-crafted, focused, valid, and clear curriculum Align assessments, programs, and instructional resources with curriculum Promote student equality and equity Focus on mastery learning and effective teaching strategies Provide resources for establishing curriculum expectations, monitoring, and

accountability Institute effective district and school planning, staff development, and resource allocation to create a quality learning environment

Encyclopedia of Educational Reform and Dissent OECD Publishing

Provides comprehensive articles on significant issues, methods, and theories currently combining the studies of technology and literacy.

EBOOK: Improving Transition Planning for Young People with Special Educational Needs

John Wiley & Sons
What are the critical practices of leaders in high-performing schools? Based on extensive observations, interviews, and in-depth case studies of principals and superintendents who significantly increase student learning and achievement, this exciting new book provides novice and veteran school leaders with the five critical steps for effective school leadership: Focus on Direction Build a Powerful Organization Ensure Student-Focused Vision and Action Give Life to Data Lead Learning Rich with voices from highly effective leaders, this book provides an accessible, research-

based framework for school improvement that is correlated with the field's standards. The engaging case studies in this vital resource show the power of these five key critical practices to make a difference in the lives of students and transform schools to support learning for all.

Standards of Practice for Teachers R&L Education

There has been a dearth of studies on teacher educators using action research to improve their own practice. This book is the first systematic study of a group of teachers examining and enhancing their own practice through the inquiry process of action research. This book presents a broad overview of a variety of methodologies that can be used to improve teacher preparation and professional development programs. It is a 'must read' book for those educators who are new to the college teaching profession and for those who are aspired to be outstanding and successful lecturers.

Making School Relevant with Individualized Learning Plans Routledge
Guaranteed Success for the Co-teaching Classroom Following the

success of the first edition, *Co-Teaching That Works: Structures and Strategies for Maximizing Student Learning, Second Edition* is here to provide actionable advice to co-teachers seeking to utilize one another's strengths. Unlike other co-teaching books, this manual is written for every possible educator combination—not simply general educators. You'll find sections on everything from co-teaching in literacy and speech-language therapy to special education and technology so that, no matter what subject matter or expertise, you'll be prepared to co-teach. This book is written to provide concrete, actionable advice, including: Co-Teaching Roll Out Plans Leadership Guidelines Relationship Development Best Co-Teaching Models Specially Designed Instruction And more Educators will have the opportunity to learn from other experienced co-teachers who share their personal stories, tips, and tried-and-true co-teaching techniques that lead to student success. Their creative, time-efficient approaches will revolutionize the way you view your classroom teaching strategies and

enhance your ability to collaborate with other educators. Whether you are planning to build your co-teaching strategy from scratch or just looking to refine your current approach, *Co-Teaching That Works* will undoubtedly be a priceless resource to have in your professional toolbox.

The Effective Schools and Even Start Act Free Spirit Publishing

This book offers a coherent research-based overview and analysis of theories and practices in using data to improve student learning. It clarifies what 'use of data' means and differentiates the different levels of decision-making in education (relating to the system, district, school, classroom, or individual student). The relationship between data and decision-making is considered and various movements in the use of data to improve student learning are analysed, especially from the perspective of their assumptions and effects. This leads to a focus on effective educational decision-making as a social process requiring collaboration among all relevant participants. It also requires a clear

understanding of educational aims, and these are seen to transcend what can be assessed by standardised tests. The consequences of this analysis for decision processes are explored and conclusions are drawn about what principles might best guide educational practice as well as what ambiguities remain.

Throughout, the focus is on what existing research says about each of the issues explored.

Curing Student Underachievement

McGraw-Hill Education (UK)

"This set of books represents a detailed compendium of authoritative, research-based entries that define the contemporary state of knowledge on technology"--Provided by publisher.

ICT for Education, Development, and Social Justice IGI Global Snippet

Written by researchers in education and urban policy, this volume offers useful insights into how to provide urban workers with the educational qualifications they need for real world jobs.

Improving School Leadership, Volume 2 Case Studies on System Leadership IGI Global

In this second edition of *Improving Student Learning One Teacher at a Time*, Jane E. Pollock and Laura J. Tolone combine updated research and real-world stories to demonstrate how it takes only one teacher to make a difference in student performance. Their approach expands the classic three-part curriculum-instruction-assessment framework by adding one key ingredient: feedback. This "Big Four" approach offers an easy-to-follow process that helps teachers build better curriculum documents with * Curriculum standards that are clear and well-paced, and describe what students will learn. * Instruction based in research, from daily lessons to whole units of study. * Assessment that maximizes feedback and requires critical and creative thinking. * Feedback that tracks and reports individual student progress by standards. Pollock and Tolone demonstrate how consistent, timely feedback from multiple sources can help students monitor their own understanding and help teachers align assignments, quizzes, and tests more explicitly to

the standards. The Big Four shifts the focus away from the basics of what makes a good teacher toward what makes good learning happen for every student every day.
Informing Progress
