During the 1980s and
early 1990s there was
significant work in the
design and
implementation of
hardware
neurocomputers.
Nevertheless, most of
these efforts may be
judged to have been
unsuccessful: at no time
have hardware
neurocomputers been in
wide use. This lack of
success may be largely
attributed to the fact that
earlier work was almost
entirely aimed at

developing custom neurocomputers, based on ASIC technology, but for such niche - eas this technology was never suf?ciently developed or competitive enough to justify large-scale adoption. On the other hand, gate-arrays of the period m- tioned were never large enough nor fast enough for serious arti?cial-neur- network (ANN) applications. But technology has now improved: the capacity and performance of current FPGAs are such that they present a much

more realistic alternative. Consequently neurocomputers based on FPGAs are now a much more practical proposition than they have been in the past. This book summarizes some work towards this goal and consists of 12 papers that were selected, after review, from a number of submissions. The book is nominally divided into three parts: Chapters 1 through 4 deal with foundational issues; Chapters 5 through 11 deal with a variety of implementations; and

Chapter 12 looks at the lessons learned from a large-scale project and also reconsiders design issues in light of current and future technology.

The Anunnaki Chronicles

H.F.Ullmann Publishing
GmbH

An unforgettable heroine hiding an unforgiveable past. An unforgettable thriller from multi-award winning international bestseller Elisabeth Herrmann. Dare you enter the world of . . . The Cleaner? An unforgettable heroine. An unforgiveable past. For fans of Child 44,

The Lives of Others, and Stasi Child, The Cleaner is a gripping thriller that will chill and intrigue as the sins of the past catch up with the secrets of the present. Pools of blood, scenes of carnage, signs of agonising death - who deals with the aftermath of violence once the bodies have been taken away? Judith Kepler has seen it all. She is a crime scene specialist. She turns crime scenes back into habitable spaces. She is a cleaner. It is at the home of a woman who has been brutally murdered that

she is suddenly confronted with her own past. The murder victim knew Judith's secret: as a child Judith was sent to an orphanage under mysterious circumstances - parentage unknown. And the East German secret police were always there, in the background. . . . When Judith begins to ask questions, she becomes the target of some powerful enemies. And nothing will ever be the same again.

The Dukan Diet

Cookbook Verso

Offers insight into the

lives of orangutans in the jungles of Borneo and Sumatra, including their mental development, the mother-child relationship, and efforts to continue protecting them from death for profit.

Design Als Rhetorik

What is time, what is space and how do they relate to each other? Even to pose these questions is to presume their existence, says Meister Eckhart in his Commentary on Exodus, from where he then develops his own view on

the subject. Although far from having become mainstream, his definition of time as presentiality and space as non-categorical creativity had an enormous influence throughout history, particularly in the arts. In this thematic volume the contributors explore the concepts of time and space in Eckhart's thought, situating these historically, philosophically, theologially, and culturally, whilst focusing on their interpretation in art works, particularly by

the American-Korean performance and video artist Taery Kim (b. 1988) who refers explicitly to Eckhart. Kim advances the questions 'what is time?' and 'what is space?' as embodied questions in her performances and video installations, thus exploring Eckhart and inquiring into the ways we can think about our relationships, as embodied subjects, to the vagrancies and bindings of time and space now. Drawing together artists, art historians,

theologians, and philosophers, as well as building on existing scholarship, this volume provides the first lengthy discussion of spatio-temporality in Eckhart's writings, highlighting Eckhart's relationship to performance art, and the works of Kim.

Springer Science & Business Media

All Lydia's ever wanted is a perfect Christmas... So when her oldest friends invite her to spend the holidays with them, it seems like a dream come

true. She's been promised log fires, roasted chestnuts, her own weight in mince pies - all in a setting that looks like something out of a Christmas card. But her winter wonderland is ruined when she finds herself snowed in with her current boyfriend, her old flame and a hunky stranger. Well, three (wise) men is traditional at this time of year...

The Kinsella Sisters
Springer

Rome, 63BC. Offered up by her parents at the age of six to become a Vestal

Virgin, one of six hand-picked women who symbolically protected the Roman Republic, Aemilia has spent her entire adult life in the all-female, strictly-guarded Temple of Vesta. But temptation has led her to commit a mortal sin, and she is sentenced to death as Virgins must die, buried alive in a pitch-black tomb. As the end draws near, Aemilia looks back over her claustrophobic, restricted life: the intense friendships she formed; the implacable enemies she made; and, finally,

the passionate but forbidden romance which caused her downfall - and yet may be her only hope. A tantalising glimpse into a little-known, forbidden world, THE VIRGIN'S TALE is the moving, erotic and highly-charged story of a woman who dared to risk everything for love.

Der Sammelband -Design als Rhetorik-stellt die klassische Kommunikationslehre der Rhetorik als eine neue und umfassende Metatheorie des Designs

vor. Sie betrifft prinzipiell alle Bereiche heutigen Designs vom Grafikdesign über die Architektur bis zur Interfacegestaltung." The Fool's Girl Jacqui Small
 Marx's Rebellion Against Lenin, by negating the Leninist-Stalinist theory of dialectical materialism and tracing Marx's political philosophy to the Classical Humanism of Aristotle, overthrows the stultifying entrapment of Stalinist Bolshevism and contributes to the revitalization of Marx's method.

The Terrarium Pocket Books
 Leading scholars discuss whether some of the main tenets or theses that are currently or traditionally ascribed to Wittgenstein are still both theoretically and exegetically viable, by focusing on three well-established Wittgensteinian themes: mind, meaning, and metaphilosophy. Language Documentation and Revitalization in Latin American Contexts Springer
 One of Europe's top chefs brings his popular and

easy to prepare recipes to America, featuring delicious vegetarian dishes for all tastes. Cooking with fresh vegetables has never been more fun. With this new cookbook, Tim Malzer shows the surprising wealth of vegetarian cuisine. His book Green Box features simple and tasty recipes that will inspire every cook. Vegetables and spices are the stars here--basic ingredients which make up Tim Malzer's fresh cuisine. The book includes a wide variety of

vegetarian cooking; a practical seasonal calendar and detailed commentary on ingredients; American scale units for all recipes; and hundreds of full-color illustrations.

Up to now, the focus in the field of language documentation has been predominantly on North American and Australian languages. However, the greatest genetic diversity in languages is found in Latin America, home to over 100 distinct

language families. This book gives the Latin American context the attention it requires by consolidating the work of field researchers experienced in the region into one volume for the first time.

Cute Dance Notebook / Ballet Journal for Girls / 6x9 inch / 108 lined pages
This ballet notebook is ideal for note-taking, writing, ideas, diary entries, to-do lists, addresses or personal thoughts. It is a perfect

and inspirational journal for girls who love ballet and dancing.

The Cleaner Palgrave Macmillan

The book is a systematic study of the issue of self-individuation in the scholastic debate on principles of individuation (principia individuationis). The point of departure is a general formulation of the problem of individuation acceptable for all the participants of the scholastic debate: a principle of individuation of x is what makes x individual (in various

possible senses of 'making something individual'). The book argues against a prima facie plausible view that everything that is individual is individual by itself and not by anything distinct from it (Strong Self-Individuation Thesis). The keynote topic of the book is a detailed analysis of the two competing ways of rejecting the Strong Self-Individuation Thesis: the Scotistic and the Thomistic one. The book defends the latter one, discussing a number of issues concerning

substantial and accidental forms, essences, properties, instantiation, the Thomistic notion of *materia signata*, Frege's Begriff-Gegenstand distinction, and Geach's form-function analogy developed in his writings on Aquinas. In the context of both the scholastic and contemporary metaphysics, the book offers a framework for dealing with issues of individuality and defends a Thomistic theory of individuation. *Every Child Can Learn to Sleep* Minotaur Books

This book gives an introduction to Linear Functional Analysis, which is a synthesis of algebra, topology, and analysis. In addition to the basic theory it explains operator theory, distributions, Sobolev spaces, and many other things. The text is self-contained and includes all proofs, as well as many exercises, most of them with solutions. Moreover, there are a number of appendices, for example on Lebesgue integration theory. A complete introduction to the subject, Linear

Functional Analysis will be particularly useful to readers who want to quickly get to the key statements and who are interested in applications to differential equations.

Allen, die eine abwechslungsreiche und gesunde Alternative zu Butter, Wurst und Käse suchen, verrät die Autorin ihre besten Rezepte für klassische, schnelle, extravagante und süße Toppings. Verführerische Fotos von Miguel Dieterich machen das Buch zu

einem Erlebnis für alle Sinne.

The Roman Emperors Doubleday Canada

This collection of one hundred short essays gives readers a grand tour through contemporary and everyday mathematics. Behrends provides classics from his newspaper column in Die Welt, expands and illustrates them, and gives readers just enough information at a time to build mastery of concepts

and applications. The topics range from pure mathematics to applied math, but all essays are suspenseful and fun to read. This is a very handy tool for teachers of all levels of mathematics (even elementary school children will be able to handle some of the topics), and Behrends assumes his readership has an interest but only a minimal background in mathematics so the essays are accessible but not dumbed-down.
