Namechecked as the "LeBron James of plant styling..." by "Good Morning America", Hilton Carter now shows how you can make, style, decorate and care for your own stunning plant-inspired interior with his 25 step-by-step DIY projects and plant hacks. Carter, the Instagram star of the plant world and creator of green interiors has given us glimpses into many stunning plant-filled homes where ivy and creeping figs hang miraculously from ceilings, moss and ferns grow effortlessly to create living walls,

fiddle leaf ferns and cheese plants thrive, whilst air plants beautify artworks and succulents flourish whether in pots on windowsills or planted in terrariums... Now in his third book, *Wild Creations*, Hilton actually shows you how you can create these amazing fixtures that enable plants to become such an integral part of an interior. Divided into four sections, *Wild Ideas*, *Wild Hacks*, *Wild Rants* and *Wild Plants*, *Wild Creations* shows you step by step how you can create air plant wreaths, moss walls, leather hanging plant stands, terrariums and many more stunning projects that will give you the green interior you crave. And just so your plants feel at home in your interior there is even a painting by numbers jungle mural, plus plant-scented candles to make sure your interior not only stays wild but that you and all its

inhabitants thrive from the health giving benefits of greenery.

Tacos, pizza, wings, pasta, hearty soups, and crave-worthy greens-for some folks looking for a healthier way of eating, these dishes might all seem, well, off the table. Carleigh Bodrug has shown hundreds of thousands of people that that just isn't true. Like so many of us, Carleigh thought that eating healthy meant preparing the same chicken breast and broccoli dinner every night. Her skin and belly never felt great, but she thought she was eating well--until a family health scare forced her to take a hard look at her diet and start cooking and sharing recipes. Fast forward, and her @plantyou brand continues to grow and grow, reaching +470k followers in just a few short years. Her secret? Easy, accessible recipes that don't require any special ingredients, tools, or know-how; what really makes her recipes stand out are the helpful infographics that accompany them,

which made it easy for readers to measure ingredients, determine portion size, and become comfortable enough to personalize recipes to their tastes. Now in her debut cookbook, Carleigh redefines what it means to enjoy a plant-based lifestyle with delicious, everyday recipes that anyone can make and enjoy. With mouthwatering dishes like Bewitchin' Breakfast Cookies, Rainbow Summer Rolls, Irish Stew, and Tahini Chocolate Chip Cookies, this cookbook fits all tastes and budgets. PlantYou is perfect for beginner cooks, those wishing to experiment with a plant-based lifestyle, and the legions of "flexitarians" who just want to be healthy and enjoy their meals"--

The creator of Instagram's House Plant Journal mixes love with scientific logic in this beautifully photographed guide for indoor gardeners. For indoor gardeners everywhere, Darryl Cheng offers a new way to grow healthy house plants. He teaches the art of understanding a plant's needs and giving it a home with the right balance of light, water, and nutrients. With this book, indoor gardeners can be less a passive follower of rules for the care of each species and much more the confident, active grower, relying on observation and insight. And in the process, the plant owner becomes a plant lover, bonded to these beautiful living things by a simple love and appreciation of nature. The New Plant Parent covers all of the basics of growing house plants, from finding the right light, to everyday care like watering and fertilizing, to containers, to recommended species. Cheng's friendly tone, personal stories, and accessible photographs fill his book with the same generous spirit that has made @houseplantjournal, his Instagram account, a popular source of advice and inspiration for over half a million indoor gardeners.

**Edible Plants** The Crowood Press

A follow-up to the widely popular Flower Recipe Book, The Plant Recipe Book is the next great thing in interior plant design, providing simple steps showing anyone how to create stunning living plant decor. Each one of the 100 "recipes" specifies the type and quantity of plants needed; clearly numbered instructions detail each step; and 400 photographs show how to place every stem. Traditional pots and plant containers are used, but so are less conventional vehicles and methods, like shutters and planting under glass. A basic how-to chapter provides planting techniques, a tools and materials list, sourcing and plant care information, and expert advice.

For over a decade, artist Jimmy Fike traveled across the continental United States in an epic effort to photograph wild edible flora. Edible Plants is the culmination of that journey, featuring over 100 photographs that Fike has selectively colorized to highlight the comestible part of the plant. While the images initially appear to be scientific illustrations or photograms from the dawn of photography when plants were placed directly on sensitized paper and exposed under the sun, a closer look reveals, according to Liesl Bradner of the Los Angeles Times, "haunting [and] eerily beautiful" photographs. Beyond instilling wonder, Fike's contemporary, place-based approach to landscape photography emphasizes our relationship to the natural world, reveals food sources, and encourages environmental stewardship. His clever and beautiful method makes it easy to identify both the specimen and its edible parts and includes detailed descriptions about the plant's wider purposes as food

and medicine. Sumptuously illustrated and delightfully informative, *Edible Plants* is the perfect gift for anyone curious about unlocking the secrets of native North American plants. *A Catalogue of Superior Second-hand Books, Ancient and Modern, Comprising Works in Most Branches of Literature, Offered ...* by Henry Sotheran & Co Rocky Nook, Inc.

*The Variation of Animals and Plants Under Domestication* Taylor & Francis

The prints reproduced in this collection demonstrate the author's penetrating knowledge of plant form and deep understanding of the interplay of light and colour, resulting in images that are vibrant with life and redolent of the emotional connection we all have with our national wild flowers.

*The Power of Movement in Plants* North Atlantic Books

This is not your grandmother's book on botanicals! Divided into 23 chapters, this semi-scientific book delves into topics such as plant worship, plants in witchcraft, plants in fairy lore, love charms, dream plants, plant language, plants and their legendary history and more. Although this volume is not a traditional guide

to botanicals, it is rather well written and is sure to be of use to those it was intended for. Author Thiselton-Dyer examines the religious connotations of herbs, and their uses in decoration, medicine, witchcraft and magic.

*The Folk-lore of Plants* HarperCollins

This is the story of the Reeves Collection of botanical paintings, the result of one man's single-minded dedication to commissioning pictures and gathering plants for the Horticultural Society of London. Reeves went to China in 1812 and immediately on arrival started sending back snippets of information about manufactures, plants and poetry, goods, gods and tea to Sir Joseph Banks. Slightly later, he also started collecting for the Society but despite years of work collecting, labelling and packing plants and organising a team of Chinese artists until he left China in 1831, Reeves never enjoyed the same degree of recognition as other naturalists in China. This was possibly because he had a demanding job as a tea inspector. Reeves himself never claimed to be a professional naturalist and the plant collecting and painting supervision were undertaken in his own time. Furthermore, fan qui (foreign devils) were restricted to the port area of Canton and to Macau, so that plant-hunting expeditions further afield were impossible. Furthermore, Reeves never published an account of his life in the country, unlike Clarke Abel and Robert Fortune, but he left us some letters, notebooks, drawings and maps. The Collection is held at the Royal Horticultural Society's Lindley Library in Vincent Square, London. It is a magnificent achievement. Not only are the pictures accurate and richly coloured plant portraits of plants then unknown in the West, but they stand as a record of plants

being cultivated in nineteenth-century Canton and Macau. In 'John Reeves: Pioneering Collector of Chinese Plants and Botanical Art', Kate Bailey reveals John Reeves' life as an East India Company tea inspector in nineteenth-century China and shows how he managed to collect and document thousands of Chinese natural history drawings, far more than anyone else at the time.

**The Folk-lore of Plants** Frances Lincoln

This powerful book documents--in images and words--the unsettling experience of a dozen men and women workers who lost their jobs in the steel mills of Buffalo, New York, and had to fashion new lives for themselves. A stunning collection of revealing narratives that bears witness to wrenching changes in the American economy. Photographs.

This beautiful book explains the basics of composition and using your camera, but quickly moves on to show you how to try many different flower photography techniques, both indoors and out. Through clear step-by-step guides and stunning examples, it shows you how to capture the smallest flower portrait through to broad garden landscapes. There are ideas on how to develop a creative eye using available light, colour and background. The most important rules of flower photography are explained, and also how to break them. It shows how to use a light box in your home for flower portrait photography and still life and explains how to edit your photos and take them to another level. As well as practical advice it provides inspiration through a monthly photo gallery giving ideas of botanical subjects to capture

throughout the year.

Discover the joys and self-nurturing benefits of plant parenthood, from learning how to begin building your own lush plant family to getting into those fun tips on how to care for your green gurls, with this beautiful, illustrated guide from the dazzling creator of the @plantkween Instagram account. "We all love some new growth, dahling." Six years ago, Christopher Griffin was just beginning the plant parenthood journey with one small Marble Queen Pothos. Today, this Black Queer non-binary femme plant influencer known as Plant Kween tends to a family of more than 200 healthy green gurls in the Brooklyn apartment they call home. You Grow, Gurl! is Kween's fun and fabulous guide to becoming a plant parent and keeping your green gurls growing and thriving. Anyone can be a plant parent! It's all about TLC—taking the time and energy to focus on a plant's needs, and ultimately your own. Featuring 200 full-color photos and

illustrations, practical instructions and tips—on everything from propagating to measuring humidity to repotting—activities, and stories, this fun and joyful guide shows how to green-up any space and have it serving those lush lewks. Self-care takes many forms and tending to your plants' needs helps you grow too. In addition to information and advice on plant care, Kween provides meditations, mindfulness activities, playlists, and more to help you practice self-care through plant-care. As Kween says, "We can learn a lot about how we treat ourselves, how we treat others, and how we navigate the world from these green lil creatures." Healing and growing your heart, body, and soul takes time, love, and focus. Taking care of plants teaches you to apply that same attention and love to yourself and helps you find new pathways to explore on your own botanical adventure to self-love.

Apply and defend against all manner of kicks, sweeps, leg locks, leg checks and kick checks by learning to master the lost study of plum flower posts. It's time to rediscover the forgotten secrets to

harnessing and wielding the power of the plum flower posts in combat. The missing link for training the Wing Chun stance, this book helps intermediate students and practitioners reach the highest levels of proficiency, teaching leg skills, sticking skills, good positioning, and checking and immobilization skills. The plum flower posts consist of 11 posts--10 wooden gerk jong, or legwork posts, and one mok yan jong, or wooden man post. Together, they complete a set called the moy fa jong. The wooden dummy trains practitioners to protect the upper centerline by applying hard techniques with proper distance, position, and leg control, while the gerk jong are designed and placed to train all elements of legwork and manage the lower centerline. A valuable training tool for any and all styles and families of Wing Chun, mastering the posts ensures that you never lose a fight due to lost balance or bad positioning; fall from leg sweeps, leg locks, or leg checks; or miss the knockout because of poor distance or knockout power. Comprehensively written and supplemented with 180 full-color illustrations and photos, Wing Chun Plum Flower Posts is an essential resource for Wing Chun students, practitioners, and teachers looking to expand their knowledge base and skill set.

#### Creative Garden Photography

Learn to take better garden photos! One of the most rewarding aspects of gardening is sharing its beauty, both physically with those who visit and virtually with those who only see it on a screen. But capturing a garden's true essence is difficult, and often the moments worth sharing are ephemeral. In The Garden Photography Workshop, internationally known garden photographer Andrea Jones shares the trade secrets that make

her photos sing. You'll learn the basic photography skills and tips on using a range of camera equipment. Profiles of real gardens from around the world exemplify the most common problems a photographer can face, like harsh light, wet weather, and

cramped spaces, along with advice and techniques for addressing specific concerns. We live in a photo-driven world, and this helpful guide is a complete tutorial for anyone who wants that world to be filled with beautiful images of gardens and plants.
