Swimming with Crocodiles

National Geographic Society Claude is the story of the California Academy of Sciences' beloved albino alligator, from his birth in Louisiana to his present day life in his swamp at the Academy. "Ultimately, Claude's

hopeful tale is a celebration of individuality and the joy in finding those who appreciate you for exactly who you are."-- Booklist Claude is a celebrity alligator and the mascot for San Francisco's California Academy of Sciences. His story started almost 25 years ago in Louisiana, where he hatched out of his egg to discover he looked different from the other hatchlings.

They were green and Claude was white. The other hatchlings avoided him, and his color made him vulnerable to predators. So Claude went to a special zoo that cared for alligators where he lived in a pen by himself. Now he was safe-- but alone. One day, scientists at the California Academy of Sciences heard about him and asked the zoo if he could come and live in the Academy's swamp. He

made a 2,800 mile journey to his new home, where he had a surprise--he would share his swamp with Bonnie, an alligator who the scientists hoped would be a friend for Claude. Unfortunately, Bonnie didn't like Claude's differences either, so she was moved to another home. But then Claude was alone again--or was he? With Bonnie gone, Claude began to interact with the five enormous

snapping turtles who shared his swamp. The turtles didn't mind at all that Claude was different! And neither do the millions of people who visit him every year. They know that Claude's differences are exactly what makes him special. Claude includes back matter with answers to frequently asked questions about the famous alligator, including information about albinism

in animals. *Don't Step on the Crocodile Zero to Ten* Illustrates how adaptations have changed animals' looks and actions and ultimately contribute to their survival. **Crocodiles, Camels & Dugout Canoes** Dutton Books for Young Readers In this story we meet Chester, a timid crocodile who was not like other crocodiles. Geographic Society A born naturalist and a fearless traveler, Vladimir Dinets wrote travel guides, conducted field research, and lived a couple of lives before he was accepted into the PhD program in zoology at the University of Miami. He thought crocodiles were a dead-end research topic—survivors from the age of the dinosaurs but not much else—until he witnessed groups of up

to seventy alligators performing mating choruses that included infrasound vibrations—a form of communication extremely rare in nature—and a “dance” unknown in the scientific literature but that resembled a scene from Jurassic Park. To prove his thesis about the language of crocodiles, he spent the next six years traveling around the world on shoestring budgets and

in extreme circumstances, studying almost every living species. At the same time, as a man desiring companionship in life, he sought love. With adventures on five continents, Dragon Songs is his account of this quest. It includes an escape from a boiling lava lake in the Afar Desert, being chased up a tree by a tiger in India, hitching a ride with a cocaine smuggler in Bolivia, and diving with giant

Greenland sharks—all in the name of studying crocodiles, among which he routinely paddled in his inflatable kayak. Of course, not everything went according to plan. But, in the end, his ground-breaking research helped change the field. And during the course of his adventures, he met and courted his future wife.
