Year Money Grew on Trees ASCD

This book is the result of a decade long effort in school districts such as New York City, Austin, and San Diego to implement challenging instruction that is designed for classrooms that include English learners and that raises the bar and increases engagement for all learners. Classroom vignettes, transcripts of student interactions, and detailed examples of intellectually engaging middle school and high school lessons provide a concrete picture of the instructional approach developed by coauthor Aida Walqui, founder and director of WestEd's Quality Teaching for English Learners (QTEL) initiative.

This study explores how the introduction of businesslike methods in government - more commonly referred to as new public management or NPM - affects integrity. In such a field where concrete research results are scarce and opinions differ, this study empirically tests the suggested influences of NPM on integrity.

History is designed to meet the scope and sequence requirements of most introductory courses. The text provides a balanced approach to U.S. history, considering the people, events, and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience). U.S. History covers key forces that form the American experience, with particular attention to issues of race, class, and gender.

Do you ever feel like screaming from the rooftops in a world that seeks to silence you? If so, you're not alone. To Hear a Girl Scream: A Memoir of Dreams and Insights in the 21st Century is a prose-poetry memoir that follows Camryn Cobb from her first understanding of the meaning of race to her many experiences with discrimination.

Throughout these stories, Cobb includes cutting commentary that envisions a way forward for American society. In this memoir, Cobb discusses: growing up biracial in predominantly white spaces, learning to understand others' perspectives, and conceiving a future where everyone is truly equal. You will love this book if you're interested in progressive change and/or you want to bear witness to the experiences of a biracial American woman. As Cobb writes, "It will take change in each of our souls and minds to create the world that we want to see." Will you be part of that change?

This recently updated

guide produced by the Bureau of Consumer Financial Protection (BCFP) and the Federal Deposit Insurance Corporation (FDIC) provides information on common frauds, scams and other forms of elder financial exploitation and suggests steps that older persons and their caregivers can take to avoid being targeted or victimized. The mission of the BCFP, a government agency, is to make markets for consumer financial products and services work for consumers by making rules more effective, by consistently and fairly enforcing those rules, and by empowering consumers to take more control over their economic lives. The FDIC is an independent agency created by the Congress to maintain stability and public confidence in the nation's financial system.

Assessment is messy. Day-to-day, in-the-moment assessments not only reveal information that drives future instruction but also offer a comprehensive picture of students' abilities and dispositions toward learning. As teachers, we might know what this

looks and feels like, yet it can be hard to put into action—hence the messiness. Say hello to digital student portfolios—dynamic, digital collections of authentic information from different media, in many forms, and with multiple purposes. Using digital portfolios to capture student thinking and progress allows us to better see our students as readers, writers, and learners—and help students see themselves in the same way! Matt Renwick's Digital Portfolios in the Classroom is a guide to help teachers sort through, capture, and make sense of the messiness associated with assessment. By shining a spotlight on three types of student portfolios—performance, process, and progress—and how they can be used to assess student work, Renwick helps educators navigate the maze of digital tools and implement the results to drive instruction.

However, no volume has systematically analyzed the relationship between globalization and global trends in health outcomes. This book consolidates and updates the findings of a global research project undertaken by the Globalisation Knowledge Network (GKN) of the World Health Organization's Commission on Social Determinants of Health. Chapters examine such questions as: How has trade liberalisation affected the social determinants of health? How has globalization affected food security, nutrition and equitable access to water and sanitation? How well do present global governance structures take account of the health equity effects associated with the social determinants of health? This landmark volume will be a necessary addition for researchers and scholars studying the field of globalization, health

and social policy, and public health across the social sciences. OECD Skills Studies Time for the U.S. to Reskill? What the Survey of Adult Skills Says Simon and Schuster Welcome to the Consumer Financial Protection Bureau's Your Money, Your Goals: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and tools is a natural extension of what you are already doing. What is "financial empowerment" and how is it different from financial education or

financial literacy?

Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment toolkit is different from a financial

education curriculum.

With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.

Tens of millions of people in the U.S. with criminal records are highly talented, reliable, and eager to work. Implement these second chance hiring practices to give your company a significant competitive advantage over those that do not. Researched, tested, and written by the chief investment strategist of one of the country's leading business banks, Jeffrey Korzenik includes dozens of examples of businesses that have successfully implemented the second chance hiring practices outlined in this book. Korzenik shows those companies that have learned to go beyond the label and to evaluate the qualities of the individual applicant have tapped into an often-overlooked source of loyal and productive talent. In *Untapped Talent*, you will: Understand what goes into a successful second chance hire, from the support that will be needed internally to the resources that are available from outside agencies. Learn how businesses from a variety of industries have instituted successful second chance hiring

programs and how this has positively impacted their culture and bottom line. Gain practical onboarding and coaching strategies that will help ensure a smooth transition and a productive, happy new employee. Acquire relevant knowledge of the criminal justice system to provide context in identifying the potential of second chance hiring. Your path to a loyal, engaged, and productive workforce starts with the clear competitive advantage you'll gain by implementing the second-chance hiring practices within Untapped Talent.

The disturbing connection between well-meaning physicians and the prescription drug epidemic. Three out of four people addicted to heroin probably started on a prescription opioid, according to the director of the Centers for Disease Control and Prevention. In the United States alone, 16,000 people die each year as a result of prescription opioid overdose. But perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well-meaning doctors treating patients with real

problems. In *Drug Dealer, MD*, Dr. Anna Lembke uncovers the unseen forces driving opioid addiction nationwide. Combining case studies from her own practice with vital statistics drawn from public policy, cultural anthropology, and neuroscience, she explores the complex relationship between doctors and patients, the science of addiction, and the barriers to successfully addressing drug dependence and addiction. Even when addiction is recognized by doctors and their patients, she argues, many doctors don't know how to treat it, connections to treatment are lacking, and insurance companies won't pay for rehab. Full of extensive interviews—with health care providers, pharmacists, social workers, hospital administrators, insurance company executives, journalists, economists, advocates, and patients and their families—*Drug Dealer, MD*, is for anyone whose life has been touched in some way by addiction to prescription drugs. Dr. Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in

opioid addiction: cultural narratives that promote pills as quick fixes, pharmaceutical corporations in cahoots with organized medicine, and a new medical bureaucracy focused on the bottom line that favors pills, procedures, and patient satisfaction over wellness. Dr. Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system, the solution for which lies in rethinking how health care is delivered.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is

sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
