"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed." —Bill Gates, "Top 5 Books of the Year" An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

Thirteen-year-old Salamanca Tree Hiddle, proud of her country roots and the "Indian-ness in her blood," travels from Ohio to Idaho with her eccentric grandparents. Along the way, she tells them of the story of Phoebe Winterbottom, who received mysterious messages, who met a "potential lunatic," and whose mother disappeared. As Sal entertains her grandparents with Phoebe's outrageous story, her own story begins to unfold—the story of a thirteen-year-old girl whose only wish is to be reunited with her missing mother.

In this important contribution to narrative theory, Marie-Laure Ryan applies insights from artificial intelligence and the theory of possible worlds to the study of narrative and fiction. For Ryan, the theory of possible worlds provides a more nuanced way of discussing the commonplace notion of a fictional "world," while artificial intelligence contributes to narratology and the theory of fiction directly via its researches into the cognitive processes of texts and automatic story generation. Although Ryan applies exotic theories to the study of narrative and to fiction, her book maintains a solid basis in literary theory and makes the formal models developed by AI researchers accessible to the student of literature. By combining the philosophical background of possible world theory with models inspired by AI, the book fulfills a pressing need in narratology for new paradigms and an interdisciplinary perspective.

A terrible storm is raging, and ten-year-old Dinah is huddled by candlelight with her brother, sister, and cousin Gage, who is telling a very unusual tale. One day he happens upon a feisty girl skibberee who is working as an Agent of Change -- trading coins for teeth -- and learns that there is a dutiful tribe of skibberee (call them tooth fairies) to which he hopes to belong. As his tale of discovery unfolds, however, both What-the- Dickens and Dinah come to see that the world is both richer and less sure than they ever imagined.

How do deaf people in different societies perceive and conceive the world around them? Drawing on three years of anthropological fieldwork in Nepali deaf communities, *Being and Hearing* shows how questions of cultural difference are profoundly shaped by local habits of perception. Beginning with the premise that philosophy and cultural intuition are separated only by genre and pedigree, Peter Graif argues that Nepali deaf communities--in their social sensibilities, political projects, and aesthetics of expression--present innovative answers to the very old question of what it means to be different. From pranks and protests, to diverse acts of love and resistance, to renewed distinctions between material and immaterial, deaf communities in Nepal have crafted ways to foreground the habits of perception that shape both their own experiences and how they are experienced by the hearing people around them. By exploring these often overlooked strategies, *Being and Hearing* makes a unique contribution to ethnography and comparative philosophy.
