L'aventure spatiale a imposé une connaissance approfondie des mécanismes d'interface entre l'homme et un environnement hostile. Elle a mis en évidence la complexité du système visuel, son intégration avec les autres sens et la place essentielle des facteurs que sont l'attention, la cognition et la représentation mentale. La vision est donc apparue non seulement comme une fonction dédiée à un organe

particulier, mais surtout comme une des fonctions nécessaires à la survie d'un organisme entier. Fruit d'une approche pluridisciplinaire, *Avancées en ophtalmologie - Apport de la conquête spatiale* montre comment la recherche en neurosciences liée aux vols spatiaux habités a permis des progrès remarquables dans le domaine des spécialités de la vision. Cet ouvrage relate également une aventure médicale et précise les bases physiopathogéniques qui ont contribué à la structuration médicalisée du concept de malvoyance, puis à sa prise en charge et à son enseignement. Il s'adresse non seulement à l'ensemble des professionnels de la vision, mais aussi aux ergothérapeutes, psychomotriciens, instructeurs en locomotion,

psychologues, g eriatres, chercheurs, m decins g n ralistes, etc...

"Fun, fanciful, and even informative."

—People The first comprehensive history of felines—from the laps of pagan gods to present-day status as meme stars—as revealed by a very learned tabby with a knack for hunting down facts Since the dawn of civilization, felines have prowled alongside mankind as they expanded their territory and spread the myth of human greatness. And today, cats are peddled on social media as silly creatures here to amuse humans with their antics. But this is an absurd, self-centered fantasy. The true history of felines is one of heroism, love, tragedy, sacrifice, and gravitas. Not entirely convinced? Well, get ready, because

Baba the Cat is here to set the record straight. Spanning almost every continent and thousands—yes, thousands—of years, Baba’s complex story of feline survival presents readers with a diverse cast of cats long forgotten: from her prehistoric feline ancestors and the ancient Egyptian cat goddess Bastet to the daring mariners at the height of oceanic discovery, key intellectuals in the Enlightenment period, revered heroes from World Wars I and II, and the infamous American tabbies. Baba, a talented model in addition to a scholar, goes beyond surface-level scratches, pairing her freshly unearthed research with a series of stunning costume portraits to bring history to life. A paws-on journey through the feline hall of fame, with in-depth research and four-

legged testaments that will make you rethink who defines history, *A Cat's Tale* is a one-of-a-kind chronicle that introduces readers to the illustrious ancestors of their closest companions and shows, once and for all, that cats know exactly what they're doing.

Hitomi se retrouve dans une bien fâcheuse position : une armada de policiers l'attendent de pied ferme dans le restaurant panoramique où elle projetait de voler un tableau. Quel stratagème utilisera Cat's Eye pour la sortir de ce piège ? Pour couronner le tout, une nouvelle recrue vient grossir les rangs de la brigade anti-Cat's Eye. De qui peut-il bien s'agir ?

All Cats Have Asperger Syndrome takes a playful look at Asperger Syndrome

(AS), drawing inspiration from the feline world in a way that will strike a chord with all those who are familiar with AS. Delightful colour photographs of cats bring to life familiar characteristics such as sensitive hearing, scampering at the first sign of being stroked, and particular eating habits. Touching, humorous and insightful, this book evokes the difficulties and joys of raising a child who is different and leaves the reader with a sense of the dignity, individuality, and potential of people with AS. This engaging book is an ideal, gentle introduction to the world of AS. `There is a great deal of truth in humour. If you have only just begun to discover why someone with Asperger's syndrome is different, this book will inform and entertain you. The descriptions provide

an accurate balance between the qualities and difficulties associated with Asperger's syndrome, while the photographs will make the journey of discovery enjoyable and remarkable.' - Tony Attwood, author of Asperger's Syndrome and The Complete Guide to Asperger's Syndrome Cat's Eye Edition De Luxe T10 Henry Holt and Company

Look what The New Yorker dragged in! It's the purr-fect gathering of talent celebrating our feline companions. This bountiful collection, beautifully illustrated in full color, features articles, fiction, humor, poems, cartoons, cover

art, drafts, and drawings from the magazine's archives. Among the contributors are Margaret Atwood, T. Coraghessan Boyle, Roald Dahl, Wolcott Gibbs, Robert Graves, Emily Hahn, Ted Hughes, Jamaica Kincaid, Steven Millhauser, Haruki Murakami, Amy Ozols, Robert Pinsky, Jean Rhys, James Thurber, John Updike, Sylvia Townsend Warner, and E. B. White. Including a Foreword by Anthony Lane, this gorgeous keepsake will be a treasured gift for all cat lovers. Praise for *The Big New Yorker Book of Cats* "The Book of Cats comes a year after *The Big New Yorker Book of Dogs*—a publishing slight that, though it stings, I'll forgive, as the latest anthology was worth the wait. . . . Two standout articles feature real-life obsessives of ages past who reveal

today's Caturday devotees—with their GIFs and Tumblrs and hastily aggregated listicles—for what they truly are: amateurs. . . . Eat your heart out, *Cute Overload*."—*The New York Times Book Review* "A beautiful hardcover."—Jenny McCarthy, *People* "This irresistible anthology of articles, poems, essays, fiction, cartoons, and covers pulled from the *New Yorker* is a veritable treasure trove for cat lovers. Just dive right in; with stories from the likes of John Updike, Maeve Brennan, Roald Dahl, and Haruki Murakami interwoven with hilariously wry cartoons, one can't help but be enthralled. A must-have."—*Modern Cat* "A shiny, well-fed tome . . . The anthology embodies the cat's defining characteristic: its cluster of opposites, rolled together into a giant

hairball of cultural attitudes—something, perhaps, at once uncomfortably and assuringly reflective of our own chronically conflicted selves.”—Brain Pickings “This gorgeous book has earned a permanent spot on my coffee table. It is an absolute joy to read and browse through, and I know it will bring me hours and hours of pleasure for years to come. And it makes a purr-fect gift for the special cat lovers in your life.”—The Conscious Cat “[A] sumptuous volume.”—The Dallas Morning News

A cat's-eye view of maritime history We remember the bold seafarers of yore—from Magellan to Shackleton—for their extraordinary exploits: new lands discovered, storms weathered, and battles won. But somehow history has neglected the stalwart, hardworking species who made it all possible . . . yes, the noble cat! In *Seafurrers*, able sea cat Bart sets the record straight at last. “Fear of water” aside, cats were indispensable at sea—both as pest controllers and as beloved mascots. Thirty-eight tales recount the adventures of Trim (who

circumnavigated Australia), Tom (the sole feline survivor of the sinking of the USS Maine), celebrity cat Simon (a veteran of the Yangtze Incident), and other furry heroes. Filled with nautical trivia, rare photographs, and whimsical illustrations, this deft genealogy of human–feline friendship will stir your regard for the incomparable cat—whether on the couch or in the crow’s nest!

Did you know that European royalty once used cheetahs to hunt deer, or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start? Have you ever wondered whether domestic cats really do land on their feet when they fall, or how Canada lynx can stalk their prey in

the winter without falling through the deep snow? *Wild Cats of the World* is a treasure trove of answers to questions like these, and many others, for anyone who's interested in learning more about the world's felids, including the ones with whom we share our homes. Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source, many of them quite difficult to find, including scientific papers, descriptions of hunts, archeological findings, observations by naturalists and travelers, reports from government agencies, and newsletters from a wide variety of organizations. Weaving information from these sources together with their own experiences observing wild cats around the world, the Sunquists have created the most

comprehensive reference on felids available. Each of their accounts of the 36 species of cat contains a description of the cat, including human interactions with it, as well as detailed data on its distribution, ecology and behavior, status in the wild, and efforts to conserve it. Numerous photographs,

including more than 40 in full color, illustrate these accounts. Ranging from the two-pound black-footed cat to the five-hundred-pound tiger, and from the African serval with its satellite-dish ears to the web-footed fishing cat of Asia, *Wild Cats of the World* will fascinate and educate felid fans of any stripe (or spot).
