A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis.

The anatomy theater is where students of the human body learn to isolate structures in decaying remains, scrutinize their parts, and assess their importance. Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.

Val Plumwood was an eminent environmental philosopher and activist who was prominent in the development of radical ecophilosophy from the early 1970s until her death in 2008. Her book *Feminism and the Mastery of Nature* (1992) has become a classic. In 1985 she was attacked by a crocodile while kayaking alone in the Kakadu national park in the Northern Territory. She was death rolled three times before being released from the crocodile's jaws. She crawled for hours through swamp with appalling injuries before being rescued. The experience made her well placed to write about cultural responses to death and predation. The first section of *The Eye of the Crocodile* consists of chapters intended for a book on crocodiles that remained unfinished at the time of Val's

death. The remaining chapters are previously published papers brought together to form an overview of Val's ideas on death, predation and nature.

Celebrated transsexual trailblazer Kate Bornstein has, with more humor and spunk than any other, ushered us into a world of limitless possibility through a daring re-envisionment of the gender system as we know it. Here, Bornstein bravely and wittily shares personal and unorthodox methods of survival in an often cruel world. A one-of-a-kind guide to staying alive outside the box, *Hello, Cruel World* is a much-needed unconventional approach to life for those who want to stay on the edge, but alive. *Hello, Cruel World* features a catalog of 101 alternatives to suicide that range from the playful (moisturize!), to the irreverent (shatter some family values), to the highly controversial. Designed to encourage readers to give themselves permission to unleash their hearts' harmless desires, the book has only one directive: "Don't be mean." It is this guiding principle that brings its reader on a self-validating journey, which forges wholly new paths toward a resounding decision to choose life. Tenderly intimate and unapologetically edgy, Kate Bornstein is the radical role model, the affectionate best friend, and the guiding mentor all in one.

You know, being friends with two cute boys does have its benefits. There's Danny. Danny is a golden boy in every way. He has dreamy blue eyes and blonde hair that always looks perfect, even when it's windblown or been stuck under a football helmet. He's the boy every girl crushes on. The boy I get into trouble with, the boy I fight with, the hot quarterback no girl can resist, not even me. Being with Danny is like being on an adventure. He has a bright, contagious smile and abs to die for. He's pretty much irresistible. Equally crush worthy is Phillip. Adorable, sweet Phillip, who I have known since birth. Phillip has dark hair, a perfect smile, brown eyes, and the sexiest voice I have ever heard. He's the boy I talk to every night before I go to sleep. The boy who rescues me, the boy who can read my mind, the boy who is always there for me, the boy who tries to keep me out of trouble, the boy who irritatingly keeps getting hotter, and whose strong arms always seem to find their way around me. And when he gives me that grin, I can never say no. One boy will give me my very first kiss. One boy will teach me to make out. One boy will take me to prom. And finally, one boy will ask me to marry him. They will both be my best friends. But only one of them will be the boy I fall in love with. Only one of them is that boy. This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language.

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence—developmental phases that are critical to health in adulthood and the next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.

Things have never been easy for Oscar. A ghetto nerd living with his Dominican family in New Jersey, he's sweet but disastrously overweight. He dreams of becoming the next J.R.R. Tolkien and he keeps falling hopelessly in love. Poor Oscar may never get what he wants, thanks to the Fukú - the curse that has haunted his family for generations. With dazzling energy and insight Díaz immerses us in the tumultuous lives of Oscar; his runaway sister Lola; their beautiful mother Belicia; and in the family's uproarious journey from the Dominican Republic to the US and back. Rendered with uncommon warmth and humour, The Brief Wondrous Life of Oscar Wao is a literary triumph, that confirms Junot Díaz as one of the most exciting writers of our time.

A poignant, heart-lifting graphic memoir about anorexia, eating disorders and the journey to recovery Like most kids, Katie was a picky eater. She'd sit at the table in silent protest, hide uneaten toast in her bedroom, listen to parental threats that she'd have to eat it for breakfast. But in any life a set of circumstance can collide, and normal behaviour might soon shade into something sinister, something deadly. Lighter Than My Shadow is a hand-drawn story of struggle and recovery, a trip into the black heart of a taboo illness, an exposure of those who are so weak as to prey on the vulnerable, and an inspiration to anybody who believes in the human power to endure towards happiness. 'Even at its most heartbreaking it never feels sombre ... Inspiring, plucky and, in the end, consoling, it's hard to put down' Observer

The classic American treat finally gets its due: foolproof pudding recipes, from irresistible standards

to inventive modern twists, by the chef and owner of New York City's popular pudding destination. Puddin' shares Clio Goodman's secrets for re-creating—and improving on—your sweetest childhood memories. From grown-up renditions of snack-time favorites like Butterscotch Pudding (spiked with whiskey) to party-ready showstoppers like Banana Upside-Down Cake with Malted Pudding and summertime crowd-pleasers like Peanut Butter Fudge Pops and Peach Melba Parfaits, Puddin' serves up luscious and decadent recipes for your every dessert whim. Along the way, Clio offers suggestions for adapting her pudding recipes—all of which are naturally gluten-free—for vegan and low-fat variations. And because creamy pudding just begs for a companion, Puddin' also includes recipes for homemade toppings, such as Salted Caramel Sauce, Marshmallow Crème, and Brownie Crumbs, that can be mixed and matched with the puddings of your choice or incorporated into one of Clio's signature parfaits. These surprisingly easy-to-execute pudding creations are destined to become staples of your dessert repertoire. Puddin' is a celebration of an American classic. Praise for Puddin' "Remarkably versatile . . . A superb single-subject dessert cookbook."—Library Journal (starred review) "Unlock the secrets to divine creaminess. . . . This book has revisited and reinvented pudding in just about every imaginable form. Recipes are easy to follow and results could win you some delicious rewards."—Eat Something Sexy "Clio Goodman has a talent for transforming simple, elemental ingredients into amazing desserts. Puddin' brings back memories of simpler times, and coming back to pudding is a return to an elemental form of inspiration. These sweet treats are the ultimate in comforting indulgence."—Ron Ben-Israel, host of Sweet Genius "Clio's puddings are ethereal and utterly delicious. Her techniques are simple, but the magic is in the way she pairs unique ingredients in one little cup. Her puddings will dazzle any dinner party!"—Pichet Ong, pastry chef, author of The Sweet Spot, and judge of Sugar Dome

Winner of the Amazon.ca First Novel Award Shortlisted for the Scotiabank Giller Prize Longlisted for the 2017 Stephen Leacock Memorial Medal for Humour Longlisted for the 2018 International IMPAC Dublin Literary Award Growing up in the suburban hell of Misery Saga (a.k.a. Mississauga), Lizzie has never liked the way she looks—even though her best friend Mel says she's the pretty one. She starts dating guys online, but she's afraid to send pictures, even when her skinny friend China does her makeup: she knows no one would want her if they could really see her. So she starts to lose. With punishing drive, she counts almonds consumed, miles logged, pounds dropped. She fights her way into coveted dresses. She grows up and gets thin, navigating double-edged validation from her mother, her friends, her husband, her reflection in the mirror. But no matter how much she loses, will she ever see herself as anything other than a fat girl? In her brilliant, hilarious, and at times shocking debut, Mona Awad simultaneously skewers the body image-obsessed culture that tells women they have no value outside their physical appearance, and delivers a tender and moving depiction of a lovably difficult young woman whose life is hijacked by her struggle to conform. As caustically funny as it is heartbreaking, *13 Ways of Looking at a Fat Girl* introduces a vital new voice in fiction.

With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.
