Innovacities: impact of regional innovation systems on the competitive strategies of cities Edward Elgar Publishing

After three volumes presenting the desolate scenario of corruption around the world, volume 4 (of the four-volume reference) focuses on anti-corruption strategies, including a wide variety of approaches that illustrate the scale and difficulty of the task and offer no simple answers. Twenty-nine articles discuss general issues, control via codes of conduct and legal and formal means, anti-corruption measures in civil service and government agencies, prevention and sanctions, people and reform, and whistleblowing. The articles (reproduced in facsimile) are from journals such as *Comparative Politics*, *Crime, Law, and Social Change*, *Corruption Reform*, and *European Journal of Development Research*. Editors Williams (politics, U. of Durham, UK) and Doig (public services management, Liverpool John Moores U., UK) made the selections. The volume is not indexed, except by name. c. Book News Inc.

Long considered a classic in Bolivia, Juan de la Rosa tells the story of a young boy's coming of age during the violent and tumultuous years of Bolivia's struggle for independence. Indeed, in this remarkable novel, Juan's search for his personal identity functions as an allegory of Bolivia's search for its identity as a nation. Set in the early 1800s, the novel is narrated by one of the last surviving Bolivian rebels, octogenarian Juan de la Rosa. Juan recreates his childhood in the rebellious town of Cochabamba, and with it a large cast of full bodied, Dickensian characters both heroic and malevolent. The larger cultural dislocations brought about by Bolivia's political upheaval are echoed in those experienced by Juan, whose mother's untimely death sets off a chain of unpredictable events that propel him into the fiery crucible of the South American Independence Movement. Outraged by Juan's outspokenness against Spanish rule and his awakening political consciousness, his loyalist guardians banish him to the countryside, where he witnesses firsthand the Spaniards' violent repression and rebels' valiant resistance that crystallize both his personal destiny and that of his country. In Sergio Gabriel Waisman's fluid translation, English readers have access to Juan de la Rosa for the very first time.

Cost Management: Accounting and Control emphasizes that changing conditions often require a change in cost management systems. Emphasizing this point stresses the dynamic and exciting nature of the field. By taking a systems approach -- one that first covers functional-based cost and control and then activity-based cost systems -- students understand how to understand and manage

any cost management system.

Women and Entrepreneurship comes from two authors with especially rich experience in this field of research. Embracing experience in a range of developed and developing countries and examining both dependent and independent roles, Beatrice Avolio and Mirjana Radović-Marković profile women entrepreneurs and consider their motivations, together with the obstacles and challenges that they face and often overcome. A focus on emerging forms of entrepreneurship leads to a concentration on what is happening in newly developing economies, with a major case study set in a South American context. The authors deal in particular with how rural entrepreneurship, virtual entrepreneurship, and project-based and home-based businesses particularly lend themselves to providing opportunities for women. The authors' findings reveal that increased participation of women in business leadership has brought about completely new ways of business communication; new business strategies and company development models; and is imposing a new behavioural style on businesses. What is particularly encouraging is the evidence that female kinds of durability, persistence and intuition are producing business advantage. This means that the authors can clearly identify success factors and propose guidelines for the benefit of female entrepreneurs, female-led businesses, and business in general. This book will serve the needs of an academic audience of researchers in the growing field of studies into entrepreneurship; as well as those teaching or studying business or women's studies topics. It will of course appeal particularly to women owning and running businesses, or aspiring to do so.

Much of the previous literature in the field of safety focuses on either the technical equipment issues or the human performance factors that contribute to the active failures in safety-critical systems. However, this book provides guidance in the moral or ethical aspects of decision-making that perpetuate many of the latent failures in safety-critical systems. The book provides a concise introduction to the ethical foundations and follows up with case studies from aviation, healthcare, and environmental and occupational health.

Colombia is one of the most biologically diverse countries in the world: although it takes up slightly less than one percent of the Earth's surface, it is home to approximately ten percent of the world's plants and animals, with a rich variety of flora and fauna and a diversity of primate species that is only superseded by Brazil and Peru in number. This vibrantly illustrated field guide is the result of a wealth of field work conducted on Colombian primates both in and out of the country. The volume illustrates and describes twenty-eight primate species comprising forty-three taxa, of which fifteen taxa are only found in Colombia. The field guide also includes comprehensive chapters on primate classification, fossil history, and conservation, and each is augmented by a wealth of finely detailed drawings, photographs, and maps. Primates of Colombia will be an invaluable resource for primatologists and naturalists alike.

Operating in Emerging Markets No Starch Press

An extraordinary collection of business success stories—all applying the principles from the #1 "New York Times" bestseller "Rich Dad Poor Dad."

OXFORD PRACTICE GRAMMAR Oxford University Press

Master a complete roadmap for emerging market business success and profitability! Emerging markets are generating unprecedented opportunities, but they are far more complex and risky than they may seem. Profiting in these markets entails retooling business models, products, and strategies to exploit these differences, instead of falling victim to them. Too many American, European and Japanese companies continue to operate with a "developed world" mentality that seeks to merely adapt existing products and strategies, while underestimating the unique challenges of managing a business in radically different contexts. Operating in Emerging Markets draws from real-life examples and today's most valuable research to offer a step-by-step blueprint for improving profitability in emerging markets. Pioneering researchers Dr. Luciano Ciravegna and Dr. Robert Fitzgerald walk you through understanding the true risks and challenges; identifying and investing the right resources; developing the right strategies, products, and processes; and learning from both the successes and failures that have come before you. An indispensable resource for all decision-makers in companies that are (or plan to) operating in emerging markets; and for all graduate business students who may do so in the future. "Publications devoted to rapidly transforming economies are on the rise, but the contribution is often marginal. This new book, Operating in Emerging Markets, authored by Luciano Ciravegna, Robert Fitzgerald, and Sumit Kundu, is an exception. It provides valuable insights into what makes these economies grow and prosper. Most importantly, it responds to the need for practical approaches to tapping emerging markets. Thus it should assist current and future managers in navigating these high-potential but high-risk countries." --S. Tamer Cavusgil, Callaway Professorial Chair and Executive Director, CIBER, J. The term innovation has been a concept excessively manipulated by government leaders, important businessmen, academicians, consultants and journalists, trying to sell a motive to those who want or need a change, whether they are accustomed to buying products in an exaggerated way with no other purpose than supporting consumer habits, or to those who practically do not need them. We have observed in innumerable cases of world stature that innovation is prompted by the desire to enter and remain in economies of marked consumer capitalism, and in all these cases it has been noted that if the entrepreneurs, companies, cities, regions or countries are not ready to promote and support innovation in a socially inclusive and democratic fashion, these efforts are useless and only superficial changes, not administered to democratize in any true depth, are achieved.
