Sono sempre più

numerosi i progetti di
Edizioni Critiche Digitali
che permettono di
studiare, per mezzo di
sistemi open source, il
processo di genesi ed
evoluzione delle opere
attraverso la
rappresentazione e

interpretazione delle
varianti d'autore. Il
Seminario Internazionale
ECD/DCE Edizioni a
confronto/Comparing
editions - organizzato
nell'ambito del Progetto
multidisciplinare THESMA
(Sapienza Ricerca 2014) -

ha riunito i maggiori esperti in Italia e in Europa di DH per presentare alla comunità scientifica internazionale i principali modelli di edizioni critiche digitali realizzati sulle opere di grandi autori italiani ed europei, da Leopardi a Gadda, da Jane Austen a Proust, da Nietzsche a Pessoa. There is an increasing number of Digital Critical Editions which clarify, by means of open source systems, the genetic process and the evolution of literary works. This has been

achieved by representing and interpreting the author's variants. The International Conference ECD/DCE Edizioni a confronto/Comparing Editions - organised within multidisciplinary THESMA PROJECT (Sapienza Research 2014) - has shown to the scientific community the main models of digital critical editions, produced at national and international levels, on the works by important Italian and European writers, from Leopardi to Gadda, Jane Austen to

Proust, Nietzsche to Pessoa. *European Transformations* Nai010 Publishers
 "David Kaye's book is crucial to understanding the tactics, rhetoric and stakes in one of the most consequential free speech debates in human history." -- Cory Doctorow, author of *Radicalized*, *Walkaway* and *Little Brother* The internet was designed to be a kind of free-speech paradise, but a lot of the material on it turned out to incite violence, spread untruth, and promote hate. Over

the years, three American behemoths--Facebook, YouTube and Twitter--became the way most of the world experiences the internet, and therefore the conveyors of much of its disturbing material. What should be done about this enormous problem? Should the giant social media platforms police the content themselves, as is the norm in the U.S., or should governments and international organizations regulate the internet, as many are demanding in Europe?

How do we keep from helping authoritarian regimes to censor all criticisms of themselves? David Kaye, who serves as the United Nations' special rapporteur on free expression, has been at the center of the discussions of these issues for years. He takes us behind the scenes, from Facebook's "mini-legislative" meetings, to the European Commission's closed-door negotiations, and introduces us to journalists, activists, and content moderators

whose stories bring clarity and urgency to the topic of censorship. Speech Police is the most comprehensive and insightful treatment of the subject thus far, and reminds us of the importance of maintaining the internet's original commitment to free speech, free of any company's or government's absolute control, while finding ways to modulate its worst aspects.

The Legacy of Sandor Ferenczi UN

This book presents the

results of a joint meeting organized by the Pontifical Academy of Sciences and the Pontifical Academy of Social Sciences where renowned international scholars discussed the importance of education in an increasingly globalized world. The papers cover a wide range of topics, including immigration, education in developing countries, knowledge transfer, social, economic, cultural, and political conditions in global education, technology, communication, access to

information and knowledge, as well as, bio-anthropological issues.
A History of Digital Media
 Rubbettino Editore
 "No provider or user of an interactive computer service shall be treated as the publisher or speaker of any information provided by another information content provider." Did you know that these twenty-six words are responsible for much of America's multibillion-dollar online industry? What we can and cannot write, say, and

do online is based on just one law—a law that protects online services from lawsuits based on user content. Jeff Kosseff exposes the workings of Section 230 of the Communications Decency Act, which has lived mostly in the shadows since its enshrinement in 1996. Because many segments of American society now exist largely online, Kosseff argues that we need to understand and pay attention to what Section 230 really means and how it affects what we like,

share, and comment upon every day. The Twenty-Six Words That Created the Internet tells the story of the institutions that flourished as a result of this powerful statute. It introduces us to those who created the law, those who advocated for it, and those involved in some of the most prominent cases decided under the law. Kosseff assesses the law that has facilitated freedom of online speech, trolling, and much more. His keen eye for the law, combined with his background as an

award-winning journalist, demystifies a statute that affects all our lives –for good and for ill. While Section 230 may be imperfect and in need of refinement, Kosseff maintains that it is necessary to foster free speech and innovation. For filings from many of the cases discussed in the book and updates about Section 230, visit jeffkosseff.com [Olympic Games, Mega-Events and Civil Societies](#) Cambridge University Press

Volume XLIV. 1994

Djoef Publishing

This ground-breaking book investigates how the learning and teaching of mathematics can be improved through integrating the history of mathematics into all aspects of mathematics education: lessons, homework, texts, lectures, projects, assessment, and curricula. It draws upon evidence from the experience of teachers as well as national curricula, textbooks, teacher education practices, and research perspectives across the world. It

includes a 300-item annotated bibliography of recent work in the field in eight languages. The Cambridge History of Medieval Monasticism in the Latin West Springer Science & Business Media Why do countries give foreign aid? Although many countries have official development assistance programs, this book argues that no two of them see the purpose of these programmes in the same way. Moreover, the way countries frame that purpose has shaped aid policy choices past

and present. The author examines how Belgium long gave aid out of a sense of obligation to its former colonies, The Netherlands was more interested in pursuing international influence, Italy has focused on the reputational payoffs of aid flows and Norwegian aid has had strong humanitarian motivations since the beginning. But at no time has a single frame shaped any one country's aid policy exclusively. Instead, analysing half a century of legislative debates on aid

in these four countries, this book presents a unique picture both of cross-national and over time patterns in the salience of different aid frames and of varying aid programmes that resulted.

History in Mathematics Education Zeta Books

This book challenges the idea that the Rule of Law is still a universal European value given its relatively rapid deterioration in Hungary and Poland, and the apparent inability of the European institutions to

adequately address the illiberalization of these Member States. The book begins from the general presumption that the Rule of Law, since its emergence, has been a universal European value, a political ideal and legal conception. It also acknowledges that the EU has been struggling in the area of value enforcement, even if the necessary mechanisms are available and, given an innovative outlook and more political commitment, could be successfully used. The

authors appreciate the different approaches toward the Rule of Law, both as a concept and as a measurable indicator, and while addressing the core question of the volume, widely rely on them. Ultimately, the book provides a snapshot of how the Rule of Law ideal has been dismantled and offers a theory of the Rule of Law in illiberal constitutionalism. It discusses why voters keep illiberal populist leaders in power when they are undeniably acting contrary to the

Rule of Law ideal. The book will be of interest to academics and researchers engaged with the foundational questions of constitutionalism. The structure and nature of the subject matter covered ensure that the book will be a useful addition for comparative and national constitutional law classes. It will also appeal to legal practitioners wondering about the boundaries of the Rule of Law.

Husserl's Ethics and Practical Intentionality

Internal taxation, anti-dumping, trade regulations, balance of payments, economic development.

Exploring the Economy of Late Antiquity Springer

This volume presents selected papers from the

first symposium on Hermeneutics and Translation Studies held at Cologne in 2011. Translational Hermeneutics works at the intersection of theory and practice. It foregrounds both hermeneutical philosophy and the various traditions -- especially phenomenology -- to which it is indebted, in order to explore the ways in which the individual person figures at the center of the mediating process of translation. Translational

Hermeneutics offers alternative ways to understand the process of translating: it is a holistic and strategic process that enhances understanding by assisting the transmission of meaning in and across multiple social and cultural contexts. The papers in this collection accordingly provide a preliminary outline of Translational Hermeneutics. Gathered together, these papers broach a new discipline within Translation Studies. While some essays explain the theoretical

foundations of this approach, others concentrate on practical applications in diverse fields, for example literary studies, and postcolonial studies.

From the punch card

calculating machine to the

personal computer to the iPhone and more, this in-depth text offers a comprehensive introduction to digital media history for students and scholars across media and communication studies, providing an overview of the main turning points in digital media and highlighting the interactions between political, business, technical, social, and cultural elements throughout history. With a global scope and an intermedia focus, this book enables students

and scholars alike to deepen their critical understanding of digital communication, adding an understudied historical layer to the examination of digital media and societies. Discussion questions, a timeline, and previously unpublished tables and maps are included to guide readers as they learn to contextualize and critically analyze the digital technologies we use every day.

Since 1970, based in an

isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous

relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory

requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the

architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlight the vibrant atmosphere of the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of

knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embracing innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture,

history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life. *Opera Omnia* Springer
This book contributes to a

new economic history of late antiquity, with tightly argued, stimulating studies of class, money and exchange. *Current Bibliographical Information* Rowman & Littlefield
The distinction between in-house and ex-house providing is fundamental and is well known in practice and theory. It is of utmost importance, as the consequence of the categorization of an arrangement as "in-house" is, that it falls outside of the scope of the EC public

procurement rules. However, for various reasons, it is often very difficult to establish whether an arrangement is in-house or not. The case law from the European Court of Justice on this subject is highly complex, whereas the case law at national level is sparse. Furthermore, the legal literature both at national and international levels has been relatively limited. This book deals with in-house in a broader perspective and looks into the interpretation, implementation, and

practice at the national level in a range of Member States. This book is the first in the new European Procurement Law series, which will contribute to a strengthened dialogue between the various legal cultures in the field of procurement.

The New Zealand Law Reports Springer Science & Business Media
A comprehensive exposition and analysis of Jan Patočka's political philosophy, in particular his idea of Europe and concept of 'post-Europe',

and its continuing relevance to philosophy and contemporary politics.

Globalization and Education Sapienza

Università Editrice
This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event

management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students,

scholars, professionals, and anyone who would like to know more on the matter.

L'economista gazzetta settimanale di scienza economica, finanza, commercio, banche, ferrovie e degli interessi privati Cambridge University Press

In the half-century since his death, the Hungarian analyst S ndor Ferenczi has amassed an influential following within the psychoanalytic

community. During his lifetime Ferenczi, a respected associate and intimate of Freud, unleashed widely disputed ideas that influenced greatly the evolution of modern psychoanalytic technique and practice. In a sequence of short, condensed entries, S ndor Ferenczi's Diary records self-critical reflections on conventional theory--as well as criticisms of Ferenczi's own

experiments with technique--and his obstinate struggle to divest himself and psychoanalysis of professional hypocrisy. From these pages emerges a hitherto unheard voice, speaking to his heirs with startling candor and forceful originality--a voice that still resonates in the continuing debates over the nature of the relationship in psychoanalytic practice.
