"Trim Complete" covers those important finishing touches that give a house a one-of-a-kind personality: trim and modling. An expert carpenter, Greg Kossow presents a vibrantly visual guide that details every possible project, from the most basic baseboards, to the most complicated casings. He tackles real-world situations

with authoritative advice, never failing to address how to solve problems when things do go wrong. The book's ingenious design makes it a snap to find the relevant information for each project and Kossow includes a crystal-clear table of contents. Plus, unlike most other books that only deal with basic carpentry, "Trim Complete" includes hard-to-find advice on complex crown molding and making custom modling.
