Blackwell's Five-Minute Veterinary Consult Clinical Companion Equine Toxicology A clinical quick-reference guide to managing toxicants in horses Blackwell's Five-Minute Veterinary Consult Clinical Companion: Equine Toxicology provides crucial information for managing toxicants in horses in a quick-reference format. The book begins with foundational information on clinical toxicology, including emergency management, antidotes, sample analysis, and necropsy. It then discusses specific toxicant categories and toxicants of concern, organized alphabetically for fast access in emergency situations. The identically formatted topics offer key information relevant to managing toxicants in horses, plus clinical photographs depicting plants and drugs to help clinicians and students identify toxicants. A companion website presents the figures from the book for download in PowerPoint. This book is the ideal clinical resource for busy practitioners seeking immediate access to life-saving information in time-sensitive emergencies. It places all the information the reader needs to manage toxicants in horses at their fingertips, with full color images and concise bullet points. Blackwell's Five-Minute Veterinary Consult Clinical Companion: Equine Toxicology features: A thorough introduction to emergency management of the poisoned equine patient, as well as general principles of toxicants, antidotes, lab sample analysis, and necropsy analysis An exploration of specific toxins and toxicants, including illicit and pharmaceutical drugs, envenomations, insecticides, herbicides, and farm chemicals Practical discussions of metal, mycotoxin, rodenticide, and plant toxicology in horses In-depth discussion of intoxication by poisonous trees and miscellaneous toxins, like carbon monoxide, nitrates, nitrites, salt, smoke, and tropical materials Blackwell's Five-Minute Veterinary Consult Clinical Companion: Equine Toxicology is an indispensable reference for veterinary clinicians and students dealing with equine medicine, as well as for anyone seeking concise and comprehensive information about equine toxicology.

Advances in Chromatographic Techniques for Therapeutic Drug Monitoring Jones & Bartlett Learning. La Atención Prehospitalaria (APH) es uno de los pilares fundamentales de los Sistemas de Emergencias Médicas. Los orígenes y el desarrollo de los modelos clásicos de este tipo de atención en Norteamérica y Europa han sido una pieza sólida que ha permitido la creación de diferentes modelos a nivel mundial, basados en estas dos grandes tendencias. Los modelos han evolucionado de diferentes maneras, de acuerdo a la realidad de cada país, y dentro de esta diversa realidad, claramente la mayor evolución la han logrado los países que desarrollaron paralelamente procesos educativos especializados en esta área. Estos procesos de educación superior en APH han sufrido un avance muy importante, especialmente en las dos últimas décadas en Latinoamérica. Colombia ha sido uno de los países que más ha generado procesos de desarrollo en APH, incluyendo procesos educativos y legislativos. Textos especializados como éste, donde se plasma la experiencia acumulada por un grupo de profesionales que han desarrollado gran parte de su desempeño laboral, en el área de formación del personal de APH, son un ejemplo de cómo se puede avanzar y permitir que información actualizada, basada en evidencia científica e interpretada por personal experto, llegue a estudiantes de las carreras de formación, no solo en Colombia, sino en toda América Latina. Estos procesos de educación superior en APH han sufrido un avance muy importante, especialmente en las dos últimas décadas en Latinoamérica.

The Preparation and Trial of Medical Malpractice Cases treats a case as a continuous process, from interviewing the client to closing argument. It offers comprehensive coverage of the questions surrounding health maintenance organizations, including case law on the right to sue an HMO as well as its participating physicians. You'll find discussion of: how to recognize a meritorious case; the doctrine of alternative liability; the evidentiary value of FDA approval or non-approval; the continuing treatment doctrine; state statutes regarding motion practice; malpractice liability of alternative medical practitioners; the admissibility of evidence comparing physicians' risk statistics to those of other physicians; use of expert testimony to establish *res ipsa loquitur* in negligence; the modified standard of proximate cause when a physician's negligence exacerbates a patient's existing condition; violation of the duty to disclose information; contributory negligence in informed consent; distinguishing between medical malpractice and ordinary negligence; liability of nurses; and more. Appendices demonstrate how to analyze a medical brief, depose and examine the defendant physician, and elicit testimony from your own expert witness. Also included are a sample Bill of Particulars, a sample jury charge and a list of Web sites to assist your medical research.

Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.

Drug Discovery and Evaluation has become a more and more difficult, expensive and time-consuming process. The effect of a new compound has to be detected by *in vitro* and *in vivo* methods of pharmacology. The activity spectrum and the potency compared to existing drugs have to be determined. As these processes can be divided up stepwise we have designed a book series "Drug Discovery and Evaluation" in the form of a recommendation document. The methods to detect drug targets are described in the first volume of this series "Pharmacological Assays" comprising classical methods as well as new technologies. Before going to man, the most suitable compound has to be selected by pharmacokinetic studies and experiments in toxicology. These preclinical methods are described in the second volume „Safety and Pharmacokinetic Assays“. Only then are first studies in human beings allowed. Special rules are established for Phase I studies. Clinical pharmacokinetics are performed in parallel with human studies on tolerability and therapeutic effects. Special studies according to various populations and different therapeutic indications are necessary. These items are covered in the third volume: „Methods in Clinical Pharmacology“.
