In this study,
Alex Hon Ho Ip
argues that
when Paul
wrote to
Philemon
about
Onesimus, his
main purpose

was not to try
and reunite,
as is widely
held, a
runaway slave
with his
master, but
rather to have
Onesimus

accepted as a beloved brother in Christ. By examining the letter's inner texture, the author shows that Paul's main concern was for Philemon and Onesimus to be reconciled in brotherly love. The inter-textual weave reveals Paul's theological and ethical thoughts on love, which is the basis for the apostle's main argument. By taking a new institutional economics approach to help

reconstruct the economic relationship between slave and master, Alex Hon Ho Ip is able to offer a better understanding of the original relationship Paul argued against. With all this in mind, the focus is on re-reading the letter and hearing how Paul's rhetoric exhorts a new relationship between Onesimus and Philemon.

Mohr Siebeck
Alexandra Slattenschek
has overcome the challenge

with Endometriosis and has studied Food and how it affects the body's health and feelings since 1997. With her passion and endurance, she found which food is feeling best and helps to stop the blood sugar and hormone rollercoaster. During her whole career meeting clients daily over 20 years, she always had the feeling, that she is not the only one struggling with the

hormone rollercoaster. In her spare time, she started with courses and dived deep into the theme. This book is the first collection of her wisdom which will be continued.

Reign in Life
Springer
Supervision is an essential part of counselling and psychotherapy practice. It is increasingly recognised as a tool for ensuring high professional standards. In an era of regulation and tightening

control, there is a growing professional need to take stock and reflect on what it means to work with human problems. It is vital that therapists address the moral and philosophical dimensions of their profession and ask themselves what it is to be human. This rich and far-reaching book explores supervision from this timely philosophical perspective. Designed both for trainees

and more seasoned professionals, whatever their theoretical orientation, it makes a clear case for seeing existential perspectives on supervision as complementary to, rather than as a substitute for, other forms of supervision.

Convenience Voting and Technology
IOS Press
This book focuses on the art of managing IT. A simple and robust framework is proposed to describe and

to structure the essential elements of IT management. The authors pay particular attention to didactic aspects in order to facilitate the retention of models presented as well as to promote reflection on the subjects introduced. Thanks to a concentrate of good practices, each company will rapidly be in a position to build their proper IT ecosystem. Sources of Knowledge Bloomsbury

Publishing Our lives today are oppressed by the demand that we live, feel and experience with ever greater intensity. We are enticed to try exotic flavors and smells; urged to enjoy a wide range of sexual experiences; pushed to engage in extreme sports and recreational drugs - all in the pursuit of some new, unheard-of intensity. Trist an Garcia argues that such intensity

rarely lives up to its promise. It always comes at a price: one that defines the ethical predicament of contemporary life. The notion of intensity was the hidden key to Garcia's landmark book *Form and Object*. In *The Life Intense*, the first part of his ambitious *Letting Be* trilogy, he begins to develop it in detail. This first book focuses on ethics; the forthcoming volumes will

be devoted to politics and then metaphysics. Existential Perspectives on Supervision Springer Build and maintain an effective electronic reserve system! Electronic Reserve: A Manual and Guide for Library Staff Members is the comprehensive professional resource you need to create commonsense policies and procedures that ensure effective electronic reserve

service in your academic library. This hands-on, how-to guide walks you through the start-up process for implementing an electronic reserve system, presenting general guidelines and practices for designing and staffing your library. The book also examines fair use of copyrighted materials, explaining complex legal issues in language that you—and your staff—can easily

understand and apply. Electronic Reserve: A Manual and Guide for Library Staff Members examines the critical issues of everyday e-resource management, including planning, staffing, training, publicity, assessment and evaluation, workflow, choosing the right software (and hardware), defining faculty control over materials, faculty copyright

compliance, and implementing changes based on data analysis. This unique mix of practical details and specific examples also includes samples of the type of documentation you'll need to start and maintain successful e-resource management, including letters, forms, checklists, and flowcharts, and provides tables and figures for copyright and fair use, an extensive glossary, and

bibliographical references. Electronic Reserve: A Manual and Guide for Library Staff Members has the answers to the frequently asked questions you'll get from students, such as: How do I access the materials I need? Are all readings available electronically? What kind of hardware and software do I need? Why do I need a password to view some reserve items? and from faculty, including: How

do I submit my materials? Am I responsible for obtaining copyright permission? What is "public domain?" Can I use an article I wrote for publication? Would anyone actually sue me for copyright infringement? Electronic Reserve: A Manual and Guide for Library Staff Members is the resource you need to provide maximum service to library staff members who work with

electronic reserves, faculty who submit materials, and students who use those materials. 52 Codes for Conscious Self Evolution Springer Even though important developments within 20th and 21st century philosophy have widened the scope of epistemology, this has not yet resulted in a systematic meta-epistemological debate about epistemology's aims, methods, and

criteria of success. Ideas such as the methodology of reflective equilibrium, the proposal to "naturalize" epistemology, constructivist impulses fuelling the "sociology of scientific knowledge", pragmatist calls for taking into account the practical point of epistemic evaluations, as well as feminist criticism of the abstract and individualist assumptions built into traditional epistemology

are widely discussed, but they have not typically resulted in the call for, let alone the construction of, a suitable meta-epistemological framework. This book motivates and elaborates such a new meta-epistemology. It provides a pragmatist, social and functionalist account of epistemic states that offers the conceptual space for revised or even replaced epistemic concepts. This

<p>is what it means to "refurbish epistemology" : The book assesses conceptual tools in relation to epistemology' s functionally defined conceptual space, responsive to both intra-epistemic considerations and political and moral values.</p> <p><i>Components and Connections</i> 010 Publishers Drawing on a longitudinal study of the lives of NEET young people, this book looks beyond</p>	<p>dominant discourses on youth unemployment to provide a rich, detailed account of young people's experiences of participation and non-participation on the margins of education and employment, highlighting the policy implications of this research.</p> <p><u>Pocket Jung</u> Springer Tribal branding allows marketers to benefit from greatly enhanced levels of consumer</p>	<p>devotion to brands. Richardson incorporates the approach of ethno-marketing to expertly explain the opportunities for marketing and branding professionals to co-create brands with, and develop new ways of marketing to, tribal groups and brand communities.</p> <p><u>Integral Facade Construction</u> TU Delft «Facade Construction Manual» provides a systematic survey of contemporary</p>
--	--	--

expertise in the application of new materials and energy-efficient technologies in facade design. It surveys the facade design requirements made by various types of buildings, as well as the most important materials, from natural stone through to synthetics, and documents a diversity of construction forms for a wide range of building types. "Active Skills for Reading" is an exciting five-level reading series that develops learners' reading comprehension and vocabulary skills. Written by reading specialist Neil J. Anderson, the new edition of this best-selling series uses an Active approach to help learners become more confident, independent - and active-readers. IT Management
Mohr Siebeck
As a woman, have you ever

struggled with your identity and purpose in life? If you are like most of us, then the answer is probably yes. In this Sermon-In-Print Series book, Dr. LaDonna Osborn identifies three important questions that arise from encounters Jesus had with women as recorded in the Bible. These three questions are still being asked today in both the Church and secular society. 1.

What are we going to do with the women? 2. Why bother with the women? 3. Why talk to the women? Jesus' response in each encounter gives us clear-cut answers to these questions. Don't struggle with religious tradition or man-made limitations one more day! Discover your own unique identity and begin to fulfill the purpose for which God created you. *Constructing Architecture*

Walter de Gruyter GmbH & Co KG This book investigates how bodily information contributes to categorization processes for at least some conceptual classes and thus to the individual mastery of meanings for at least some word classes. The bodily information considered is mainly that provided by the so-called proprioceptive and interoceptive systems introduced by Sherrington. The authors

reconsider this in a new Gibsonian fashion calling it more generally "proprioception", which indicates the complex of all the bodily signals we are aware of and the qualitative experiences these give rise to. The book shows that proprioceptive information understood in this sense is essential for explaining (among others) how we develop broad categories such as animate vs. inanimate,

concepts denoting bodily experiences such as hunger or pain as well as emotions and abstract concepts such as friendship and freedom and in accounting for how we master the meanings of the corresponding words in our language.
