 DON'T MISS PHOEBE ROBINSON'S COMEDY SERIES  
 EVERYTHING'S TRASH—NOW ON FREEFORM! New York Times  
 bestselling author and star of 2 Dope Queens Phoebe Robinson is  
 back with a new, hilarious, and timely essay collection on gender,  
 race, dating, and the dumpster fire that is our world. Wouldn't it  
 be great if life came with instructions? Of course, but like access  
 to Michael B. Jordan's house, none of us are getting any.  
 Thankfully, Phoebe Robinson is ready to share everything she has  
 experienced to prove that if you can laugh at her topsy-turvy life,  
 you can laugh at your own. Written in her trademark unfiltered  
 and witty style, Robinson's latest collection is a call to arms.  
 Outfitted with on-point pop culture references, these essays  
 tackle a wide range of topics: giving feminism a tough-love talk  
 on intersectionality, telling society's beauty standards to kick  
 rocks, and calling foul on our culture's obsession with work.  
 Robinson also gets personal, exploring money problems she's

hidden from her parents, how dating is mainly a warmed-over  
 bowl of hot mess, and definitely most important, meeting Bono  
 not once, but twice. She's struggled with being a woman with a  
 political mind and a woman with an ever-changing jeans size. She  
 knows about trash because she sees it every day--and because  
 she's seen roughly one hundred thousand hours of reality TV and  
 zero hours of Schindler's List. With the intimate voice of a new  
 best friend, *Everything's Trash, But It's Okay* is a candid  
 perspective for a generation that has had the rug pulled out from  
 under it too many times to count.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book—featuring a new afterword and an updated discography and bibliography—will long remain provocative and definitive.

Essays and reflections from one of the twentieth century's most original cultural critics, with an introduction by Hannah Arendt. Walter Benjamin was an icon of criticism, renowned for his insight on art, literature, and philosophy. This volume includes his views on Kafka, with whom he felt a close personal affinity; his studies on Baudelaire and Proust; and his essays on Leskov and Brecht's epic theater. *Illuminations* also includes his penetrating study "The Work of Art in the Age of Mechanical Reproduction," an enlightening discussion of translation as a literary mode; and his theses on the philosophy of history. Hannah Arendt selected the essays for this volume and introduces them with a classic essay about Benjamin's life in a dark historical era. Leon Wieseltier's preface explores Benjamin's continued relevance for our times. Walter Benjamin (1892-1940) was a German-Jewish Marxist literary critic, essayist, translator, and philosopher. He was at times associated with the Frankfurt School of critical theory and was also greatly inspired by the Marxism of Bertolt Brecht and Jewish mysticism as presented by Gershom Scholem.

*Global Nomads* provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as

commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, *Global Nomads* develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

PHP: A BEGINNER'S GUIDE HMH

Many believe that pirates and other water-bound terrorists present a significant threat to international maritime security. Testing the validity of this claim, Martin N. Murphy scrutinizes recent incidents of maritime terrorism and locates the commonalities between pirates and maritime terrorists that enable them to commit their extensive crimes. Murphy's research opens up surprising sites of contact between pirates and wider criminal networks, organizations that pursue their corrupt agendas not only on sea but also on land. It is these relationships, Murphy argues, that bring about the destabilization of states and regions in which piracy occurs. Murphy's most significant revelation is the way in which maritime criminality may disguise insurgent and terrorist activity, allowing such actors greater freedom to maneuver. Although these acts currently rank as a low-level threat, piracy feeds off of political upheaval. Before they can evolve into a truly powerful and dangerous force, however, maritime terrorists and insurgents will have to overcome significant operational and technical issues. They must also capture the attention of an international audience by committing atrocities at sea that are as devastating as those committed on land.

Perhaps the most iconic steam locomotive in the world, the

legendary Flying Scotsman was the first train to achieve 100mph and in its glory days ran the only non-stop passenger service between London and Edinburgh. When it was withdrawn from regular service in 1963, after nearly 40 years in service, the locomotive had travelled an estimated two million miles. In January 2016, after a complete and expert restoration project lasting a decade, Flying Scotsman returned to the UK's mainline as one of the jewels in the National Railway Museum's collection.
