## **ARCHER WILLIAMSON**

---

Rockridge Press

In the borderlands between the United States and Mexico, America's largest cat—the jaguar—is fighting to regain its kingdom. Added to the endangered species list in 1997, the jaguar has declined in population mainly due to habitat fragmentation created by roads, farms, mines, and most controversially, the border wall. Such human-made

barriers prevent free movement of many wild animals for predation and mating, thereby threatening their reproduction, DNA transfer, and overall survival. Author and wildlife biologist Elizabeth Webb examines the jaguar's predicament and highlights the work of field scientists who are searching for solutions. "Conservation Connection" features throughout the book underscore the importance of protecting this keystone species of the Americas.

**American Jaguar** Holiday House  
Photos and text illustrated the variety of members of the cat family.

*Big Cats* Comstock Pub Assoc

Ranging from the largest - the Tiger to the smallest species - the Rusty-spotted Cat and Black-footed Cat, the world's wild cats are some of the most beautiful, ferocious and feared carnivores in the world. *Wild Cats of the World* provides a detailed account of each species of wild cat, examining their importance throughout history and the future of some of the most endangered breeds. Using stunning photography and magnificent colour plates by top wildlife artist Priscilla Barrett to depict each cat in detail, *Wild Cats of the World* examines the characteristics of all 38 species, as well as their history,

distribution and current IUCN status.

### **Big Cat** Character-19

Lions, leopards, and jaguars are closely related, while the snow leopard and tiger are sister species. Despite enormous differences in size, these various species of “big cats” are all fairly similar in both structure and behaviors. Only the cheetah – not technically a big cat – is significantly different. The only large cats that roar are the “big four,” comprising lions, tigers, jaguars, and leopards. Although still termed as big cats, the other species don’t have the capability to make such impressive statements. Habitats for these impressive carnivores vary from Asia, Africa, and Iran to North and South America and Europe. The main threat to their existence is man – due to poaching and the destruction of natural habitats – and across much of the globe, these beautiful creatures are protected through conservation. This is especially true of the Masai Mara in Kenya and Tanzania’s Serengeti, which host huge populations of lions, leopards, and cheetahs. Significant measures have been implemented by the likes of the Captive Wildlife Safety Act (CWSA) and the World Wildlife Fund

(WWF), to protect these species and any hybrid species that occur through big cat breeding, to further deter black market activities. This book takes a look at all the “big cats” and uncovers their secrets from habitats to anatomy, feeding and long-term survival to rearing their young, and everything in between.

### **One Man's Quest to Document the World's Animals** Thames & Hudson

Presents over two hundred drawings of big cats that connect modern cats with their ancient ancestors

*Big Cats in The Wild* University of Chicago Press

Recounts an expedition through Africa and Asia in which the wildlife photographer author sets out to photograph lions, leopards, cheetahs, and tigers, offering photographs and facts about the big cats as well as tips on photographing wildlife.

*Big Cat, Little Cat* Columbia University Press

What Are Lions? Get this book at this special price exclusive to the digital Store. If a naturalist uses the term of big cats, this usually will be talking about the four different kinds of cats that can roar, and these four different kinds of cats are very different in size from each other, and they also live in different places in the world. The first fact about all these big cats is that they are all carnivores, which means meat eaters, and this means that they do out hunting for their food a good deal of the time. The second fact about big cats is that they belong to a family group called the genus Panther and in the Panther group you will find lions, tigers, leopards, and jaguars. The third fact about big cats is that they unlike smaller cats do prefer to eat their food while they are laying down. The fourth fact about big cats is that they mainly do

their hunting at night, but there are some species of these big cats that do hunt only during the day. The fifth fact about big cats is they are very powerful climbers the big cats is no other than the leopard. The leopard is able to carry any prey up a tree, which is sometimes twice its own weight.

**Hunters of the Night** Twenty-First Century Books™

In this book, the editors have reviewed the scientific articles from diverse group of scientists from all over the world who are actively participating in the wildlife conservation. Some of the important divisions incorporated in the book are conservation and population genetics, biodiversity, ecology, conservation physiology and evolution of big cats. The different chapters written by eminent scientists with their experience will provide an overview of the current information on conservation strategies and survival of big cats in different geographical zones around the world. The articles will also provide valuable information, on both free range and captive felines, to understand the present

and future of the majestic species. The book will be useful to biologists, veterinary students, wildlife managers, researchers and also wildlife conservationists.

### **A Visual Guide to the World's Cats**

Simon and Schuster

"A LEOPARD LEAPS into a tree with prey twice its weight. A LION lets out a ROAR and lunges at a wildebeest across the golden plains. A JAGUAR silently STALKS a deer through the dense, dark jungle. Through famed National Geographic photographer Steve Winter's legendary, award-winning lens, readers will get up close and personal with the "big four"-- lions, tigers, jaguars, and leopards-- presented against their stunning natural landscapes, and go beyond to explore other show-stopping wild cats like snow leopards, cheetahs. Through information-packed profiles and loads of super-cool stats and wow-worthy fun facts, kids will become mini experts on their favorite feline predators. From the fastest cat on the plains to amazing feats and adaptations, from who's King of the pride to hide-and-peek champs, this will be the ultimate book for animal lovers of all ages!"--

**Wild Cats** Neon Squid US

A 2018 Caldecott Honor book There was a cat who lived alone. Until the day a new cat came . . . And so a story of friendship begins, following the two cats through their days, months, and years until one day, the older cat has to go. And he doesn't come back. This is a poignant story, told in measured text and bold black-and-white illustrations about the act of moving on.

**Big Cats** Columbia University Press

Presents over two hundred drawings of big cats that connect modern cats with their ancient ancestors

The Wild Cat Book JD-Biz Corp Publishing  
Joe and Mary Ann McDonald have traveled the world for over thirty years, creating incredible images of breathtaking places and the incredible creatures that inhabit them. In this book, they have collected over two hundred of their favorite images of big cats from around the globe—from the majestic lions of Africa, to the powerful jaguars of South America, to the elusive tigers of Asia. The McDonald's also share the stories behind the images, taking you alongside them through some of the most remote parts of the world and into the

cultures and traditions of the people living in the midst of big cats. Whether you're a travel buff, wild animal lover, or just obsessed with the ancestry of the small cat in your living room, the images and stories in this engaging book are sure to thrill!

Lions Tigers and Leopards CreateSpace  
Describes how and where big cats live, and how they hunt.

**Everything You Ever Wanted to Know about Cats** Macmillan

Thank you to everyone who helped make my first two books in this series Bestsellers!!! Best-selling children's book author John Yost gives you "Big Cats." This book uses beautiful pictures and easy words that makes learning about baby animals fun and interesting. This is the third book in the Nature Books for Children Series and is acclaimed as being one of the best big cat books for kids available on the Kindle. The pictures are carefully chosen to look their best on any device in full color, or black and white. "Big Cats" is written to encourage children to discover and learn on their own. Each picture has a caption to spark curiosity and encourage conversation with your child. You are

welcome to guide your child through the book with the beautiful pictures. And you are invited to read the simple text to your child at bedtime or on a relaxing day together. This book captures the marvelous and amazing world of big cats and brings them alive. Children will learn how snow leopards can walk on snow and what they eat. Your children will also discover how fast a cheetah can sprint and how far it goes in one stride (it can clear an entire 2 lane road in one giant step!) Scroll up and grab a copy. The book features these baby animals and their parents: \* The playful Lion \* The ferocious leopard \* The sleek cheetah \*The magnificent Tiger \* The beautiful snow leopard \* The incredible cougar \* The amazing jaguar \*The cute Bobcat I hope you and your family love this book as much as I enjoyed writing it! Scroll up to get "Big Cats" at this SPECIAL PRICE exclusive to the Amazon Store. \*\*\* Your child will love it.\*\*\* A quick note from John: Big Cats is the third book in a series of Nature Books for Children. Every time I write a book, I'm fascinated by what I learn. It's my hope that I can pass on some of my love and enthusiasm for nature on

to you and your children. I also write in hopes that your family enjoys reading these books and talking about them together; giving you the opportunity to grow closer as a family. Above all, I truly hope you are inspired to appreciate this beautiful world we live in. Here are some of the comments about my first book that people left on FaceBook... Hey John! I just downloaded and read your book to my daycare kids. They LOVED it! Especially my little guy, he's aaaaa nature, can't keep him inside. I'm sharing with all my FB peeps and my daycare parents as well. Way to go, and good for you! Best wishes!!! John, I read your book prior to letting the kids read it. It was a good read and I definitely learned some things myself. I look forward to the kids reading it. John, I downloaded your book to my phone and I will add it to my kid's tablets they are getting from Santa. Thanks! Please scroll up to purchase and enjoy this book with your family!

**In Search of Big Cat Origins** Penguin Big Cat likes to nap—but his family has other ideas in this Guided Reading Level A story, simple enough for young readers to understand on their own! A pair of rowdy

siblings wake their furry friend up to play, and proceed to carry him around the house—no matter how the cat feels about it. They love Big Cat, and it's clear Big Cat loves them, too. . . . even if he doesn't love flying or playing dress-up. His cartoonishly exaggerated expressions are sure to charm. With five words or less per page, this story is simple enough to be the first book a child reads on their own—and funny enough to become a favorite. Geisel Medalist Ethan Long's illustrations of the big-bellied feline and his enthusiastic human pals bring Big Cat's adventures to life. Big Cat can be fun—and reading can be fun, too! The award-winning I Like to Read® series focuses on guided reading levels A through G, based upon Fountas and Pinnell standards. Acclaimed author-illustrators—including winners of Caldecott, Theodor Seuss Geisel, and Coretta Scott King honors—create original, high quality illustrations that support comprehension of simple text and are fun for kids to read with parents, teachers, or on their own! Level A books, suitable for early kindergarten, are ideal first books for kids to read on their own. One short sentence repeats on every page with one word

change per spread. Simple plots are heavily supported by the detailed illustrations. When Level A is mastered, follow up with Level B.

Big Cat, Little Cat Simon and Schuster Big cats such as lions, tigers, leopards, and jaguars fascinate us like few other creatures. They are enduring symbols of natural majesty and power. Yet despite the magnetic appeal of the big cats, their origins and evolutionary history remain poorly understood—and human activity threatens to put an end to the big cats' glory. On the Prowl is a fully illustrated and approachable guide to the evolution of the big cats and what it portends for their conservation today. Mark Hallett and John M. Harris trace the origins of these iconic carnivores, venturing down the evolutionary pathways that produced the diversity of big cat species that have walked the earth. They place the evolution and paleobiology of these species in the context of ancient ecosystems and climates, explaining what made big cats such efficient predators and analyzing their competition with other animals. Hallett and Harris pay close attention to human impact, from the evidence of cave

paintings and analysis of ancient extinctions up to present-day crises. Their engaging and carefully documented account is brought to life through Hallett's detailed, vivid illustrations, based on the most recent research by leading paleontologists. Offering a fresh look at the rise of these majestic animals, *On the Prowl* also makes a powerful case for renewed efforts to protect big cats and their habitats before it is too late.

**Big Cats** Capstone Classroom

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to

make portraits of the world's animals- especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to

mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.
