PRESTON SCARLET

Who's who of British Engineers Springer Science & Business Media

This volume contains the tutorial papers of the Summer School "Reasoning Web," July 25–29, 2005 (<http://reasoningweb.org>). The school was hosted by the University of Malta and was organized by the Network of Excellence REVERSE "Reasoning on the Web with Rules and Semantics" (<http://reverse.net>), funded by the EU Commission and by the Swiss Federal Office for Education and Science within the 6th Framework Programme under the project reference number 506779. The objective of the school was to provide an introduction into methods and issues of the Semantic Web, a major endeavor in current Web research, where the World Wide Web Consortium W3C plays an important role. The main idea of the Semantic Web is to enrich Web data with meta-data carrying a "meaning" of the data and allowing Web-based systems to reason about data (and meta-data). The meta-data used in Semantic Web applications is usually linked to a conceptualization of the application domain shared by different applications. Such a conceptualization is called an ontology and specifies classes of objects and relations between them. Ontologies are defined by ontology languages, based on logic and supporting formal reasoning. Just as the current Web is inherently heterogeneous in data formats and data semantics, the Semantic Web will be inherently heterogeneous in its reasoning forms. Indeed, any single form of reasoning turns out to be insufficient in the Semantic Web.

The Foundry Trade Journal Springer Science & Business Media
The only Apple-certified book on Mac OS X Server, this comprehensive reference takes server administrators, support technicians, and ardent Mac users deep inside the server operating system, covering everything from installing and configuring Mac OS X Server to the fine points of networking technologies, service administration, customizing users and groups, command-line service equivalents, and more. Keyed to

the learning objectives of the Apple Certified Technical Coordinator certification exam, the lessons in this self-paced volume serve as a perfect supplement to Apple's own training class, as well as a first-rate primer for computer support personnel who need to support and maintain Mac OS X Server as part of their jobs. Focused lessons take you step-by-step through practical, real-world tasks. Ample illustrations help you master techniques fast. Lesson goals and time estimates help you plan your time. Chapter reviews summarize what you've learned. About the Editor: Schoun Regan is CEO of I.T. Instruction (www.itinstruction.com) and leads its group of roving IT specialists, The Mac Trainers. Schoun routinely travels North America, training users on Mac OS X, Mac OS X Server, Windows integration, and image management and deployment. He organizes and speaks at the Mac OS X Pro conference sessions at Macworld Expo and various other conventions, educational institutions, and businesses.

Mac OS X Server Essentials Elsevier Health Sciences
From basic scan protocols to advanced assessment procedures, THE ACTIVATOR METHOD, 2nd Edition discusses the Activator Method Chiropractic Technique (AMCT) in an easy-to-understand, how-to approach. This updated 2nd edition covers all aspects of the controlled low-force analytical and adjusting system, from the history of the technique to in-depth examinations of body structures. It also features expanded content on supportive subjects from seven new contributors, discussing topics such as activator and instrument adjusting history, instrument reliability in the literature, the neurology of pain and inflammation, temporal mandibular disorders, and leg length reactivity. UNIQUE! As the only Activator Method textbook in the field, it is known as the standard reference in Activator. Expert author, Dr. Arlan Fuhr, is a co-founder of the AMCT, bringing his unparalleled expertise to the subject. Brand new full-color photos detail assessment procedures, specific anatomical contact points, and lines of drive to clearly show procedures for easier learning. Clinical Observations boxes share the author's knowledge from years of experience and provide tips on analysis of certain conditions and suggestions for atypical cases. Summary tables in each clinical

chapter allow you to quickly access pertinent information. Step-by-step instruction throughout the Instrumentation section helps you understand the principles of the technique. Appendix: Activator Quick Notes for Basic and Advanced Protocol provides at-a-glance reviews of important points and things to remember when performing basic and advanced protocols. A new chapter on leg length analysis procedures offers comprehensive coverage of this critical step in using the Activator Method. Seven new contributors bring fresh insight to AMCT.

Claycraft and Structural Ceramics Peachpit Press
This immensely dependable mentoring book is specially published for the aspirants of 'MBA Entrance Examination' organised by the Jamia Millia Islamia University (JMI). Based on the Latest Pattern of the exam, the book also comprises a Solved Model Paper for aspirants to make them familiar with the type of questions asked, and their answers. The book is highly recommended for the aspirants to Sharpen their Problem Solving Skills with intensive practice of numerous important questions provided in the book, and prepare them to face the exam with Confidence, Successfully. The book contains ample amount of Study and Practice Material comprising numerous Solved MCQs on all the relevant Subjects & Topics. Most of the practice questions incorporated in the book have been modelled on questions of various previous exam papers and solved by the respective subject-experts. Detailed explanatory answers have also been provided for selected questions for Better Understanding of readers in a Reader-friendly manner. In short, you can bank upon this book for study, practice and during the precious moments before the exam. While the well-prepared study and practice material of this book is designed for you to Master your Success, your own intelligence and practice with this will definitely Ensure you Success in your Endeavour and help secure a seat in the prestigious course paving the way for a Bright Career.

Corrosion Technology Ramesh Publishing House
This book is a printed edition of the Special Issue "Offshore Renewable Energy: Ocean Waves, Tides and Offshore Wind" that was published in *Energies*

Aviation Directory of Asia MDPI

Including the Proceedings of the Textile Institute.

Automation Progress Springer Science & Business Media

This book presents topics of science and engineering which occur in nature or are part of daily life. It describes phenomena which are modelled by partial differential equations, relating to physical variables like mass, velocity and energy, etc. to their spatial and temporal variations. The author has chosen topics representing his career-long interests, including the flow of fluids and gases, granular flows, biological processes like pattern formation on animal skins, kinetics of rarified gases and semiconductor devices. Each topic is presented in its scientific or engineering context, followed by an introduction of applicable mathematical models in the form of partial differential equations.

Engineers' Digest Springer

Bruno Buchberger This book is a synopsis of basic and applied research done at the various research institutions of the Softwarepark Hagenberg in Austria. Starting with 15 coworkers in my Research Institute for Symbolic Computation (RISC), I initiated

the Softwarepark Hagenberg in 1987 on request of the Upper Austrian Government with the objective of creating a scientific, technological, and economic impulse for the region and the international community. In the meantime, in a joint effort, the Softwarepark Hagenberg has grown to the current (2009) size of over 1000 R&D employees and 1300 students in six research institutions, 40 companies and 20 academic study programs on the bachelor, master's and PhD level. The goal of the Softwarepark Hagenberg is innovation of economy in one of the most important current technologies: software. It is the message of this book that this can only be achieved and guaranteed long term by "watering the root", namely emphasis on research, both basic and applied. In this book, we summarize what has been achieved in terms of research in the various research institutions in the Softwarepark Hagenberg and what research vision we have for the imminent future. When I founded the Softwarepark Hagenberg, in addition to the "watering the root" principle, I had the vision that such a technology park can only prosper if we

realize the "magic triangle", i.e. the close interaction of research, academic education, and business applications at one site, see Figure 1.
