Christianity in Asia

This treatise argues that the quest for the spirit is not a rare mystical experience, but a frequent expression of basic human impulses, rooted in our biological,

psychological and social nature. It presents the quest in the myths and religious practices of tribal people throughout the world.

The renowned photographer Catherine Opie takes on a challenging documentary project— an "indirect portrait" of Elizabeth

Taylor through her home and possessions. One of America's most celebrated living photographers, Catherine Opie works in series that are remarkably varied in both style and subject matter—from intimate portraits of the LGBTQ community to beautiful, nearly-abstract landscapes featuring ice-fishing houses. Expanding that astonishing range of subjects further is Opie's ambitious recent series of photographs taken at the home of late movie star Elizabeth Taylor. Though

glamour and celebrity are not common themes in her work, Opie was inspired by the possibilities this project offered—recalling William Eggleston’s series on Elvis Presley’s Graceland, or her own photographs of Obama’s 2008 inauguration, both of which represent indirect portraits of their subjects. The images in this moving collection were culled from photos Opie took over the course of six months, both on the grounds of and inside Taylor’s home. The

subjects are wildly diverse—a dog-eared remote control manual, close-ups of Taylor’s enormous closets, shelves of tchotchkes and priceless works of art—telling more about Taylor’s life than any “celebrity” portrait ever could. Through Opie’s thoughtful curation, Taylor’s home tells a poignant story and reveals the arc of a fascinating life.

In many senses, viewers have cut their teeth on

the violence in American cinema: from Anthony Perkins slashing Janet Leigh in the most infamous of shower scenes; to the 1970s masterpieces of Martin Scorsese, Sam Peckinpah and Francis Ford Coppola; to our present-day undertakings in imagining global annihilations through terrorism, war, and alien grudges. *Transfigurations* brings our cultural obsession with film violence into a renewed dialogue with contemporary theory. Grønstad argues that the

use of violence in Hollywood films should be understood semiotically rather than viewed realistically; Tranfigurations thus alters both our methodology of reading violence in films and the meanings we assign to them, depicting violence not as a self-contained incident, but as a convoluted network of our own cultural ideologies and beliefs. *The Seventh-day Adventist Hymnal*. In this 13th edition of "Adventuring with Books," teachers and librarians will find descriptions of more than 850 texts (published between 1999 and 2001) suitable for student use in background research, unit study, or pleasure reading, and children will find books that delight, amuse, and entertain. The texts described in the book are divided into 24

general topics, including Science Nonfiction; Struggle and Survival; Fantasy Literature; Sports; Games and Hobbies; and Mathematics in Our World. To highlight literature that reflects the schools' multiple ethnicities, the booklist also introduces readers to recent literature that celebrates African American, Asian and Pacific Island, Hispanic American, and indigenous cultures. Each chapter begins with a brief list of selection criteria, a streamlined list of all

annotated titles in that chapter, and an introduction in which chapter editors discuss their criteria and the status of available books in that subject area. While the reviews were written by adults, the voices and opinions of children are often included as well, lending credence to adult choices of the quality children's books.  This essential introduction to American studies examines the core foundational myths upon which the nation is based and which still determine discussions of US-American identities today. These myths include the myth of discovery, the Pocahontas myth, the

myth of the Promised Land, the myth of the Founding Fathers, the melting pot myth, the myth of the West, and the myth of the self-made man. The chapters provide extended analyses of each of these myths, using examples from popular culture, literature, memorial culture, school books, and every-day life. Including visual material as well as study questions, this book will be of interest to any student of American studies and will foster an understanding of the

United States of America as an imagined community by analyzing the foundational role of myths in the process of nation building.

The study of new literacies is quickly emerging as a major research field. This book «samples» work in the broad area of new literacies research along two dimensions. First, it samples some typical examples of new literacies - video gaming, fan fiction writing,

weblogging, role play gaming, using websites to participate in affinity practices, memes, and other social activities involving mobile technologies. Second, the studies collectively sample from a wide range of approaches potentially available for researching and studying new literacies from a sociocultural perspective. Readers will come away with a rich sense of what new literacies are, and a generous appreciation of how they are being researched.

A beautifully illustrated alternate taxonomy of the animal kingdom, based on

mythology, literature, art, and other cultural realms: "Charming." —ForeWord Sacred cows, wily serpents, fearsome lions, elegant swans, busy bees, and sly foxes—all are caricatures of the creatures themselves, yet they reflect not only how different cultures see the natural world around them but also how such cultures make use of their native animals. In this fun and thought-provoking book, historian and animal enthusiast Boria Sax argues for a classification of animals that goes

beyond the biological to encompass a more meaningful distinction: tradition. From ants and elephants to tigers and tortoises, *The Mythical Zoo* weaves together a cross-cultural tapestry encompassing mythology, history, art, science, philosophy, and literature. The result is a beautifully illustrated, masterfully composed love letter to the animal kingdom.

 Victorian pastoral explores the pastoral poetry of Alfred Tennyson and Thomas Hardy as a

way of understanding each poet's relation to the literary past. This exploration of Tennyson's and Hardy's response to and reshaping of a specific genre aims to shed light on each poet's relation to modernist poetics. Owen Schur also presents an overview of the pastoral tradition, suggesting the importance of rhetoric and the play of language to a full understanding of the genre.
