Dictionnaire Critique Et Documentaire Des Peintres, Sculpteurs, Dessinateurs & Graveurs de Tous Les Temps Et de Tous Les Pays: L-Z SUNY Press

The delight of Bacchus, wine has ever been man's solace and joy. Growing out of the poorest soil, the wild grape was tamed and blended over millennia to produce a royal beverage. But the nineteenth century brought a near revolution in the production of wine, and democracy in its consumption; technology made wine an industry, while improved living standards put it on the people's dinner table. The

vintners of France and Italy frantically bought land and planted grapes in their attempt to profit from the golden age of wine. But the very technology which made possible swift transportation, with all its benefits to winemen, brought utter devastation from America--the phylloxera aphids--and only when France and Italy had replanted their entire vineyards on American stock did they again supply the thirsty cities and discriminating elite. In an exhaustive examination Professor Loubère follows the wine production process from practices recommended long ago by the Greeks and Romans through the technical changes that occurred in the nineteenth

century. He shows how technology interacted with economic, social, and political phenomena to produce a new viticultural world, but one distinct in different regions. Winemen espoused a wide range of politics and economics depending on where they lived, the grapes they grew, and the markets they sought. While a place remained for carefully hand-raised wine, the industry had, by the end of the century, turned to mass production, though it was capable of great quality control and consistency from year to year. The author uses a wide range of sources, including archives and contemporary accounts. The volume contains extensive figures, tables, graphs, and maps.

Winner of the 2002 Manuscript Award from Phi Alpha Theta Winner of the Gourmand World Cookbook Awards for English Wine, Best Wine History Book, and Best Book on French Wine Winner of the Clicquot Wine Book of the Year Competition Winner of the Outstanding Manuscript Award from Phi Alpha Theta, this work explains how nationhood emerges by viewing countries as cultural artifacts, a product of "invented traditions." In the case of France, scholars sharply disagree, not only over the nature of French national identity but also over the extent to which diverse and sometimes hostile provincial communities became integrated into the nation. In *When Champagne Became French: Wine and the Making of a National Identity*, Kolleen M. Guy offers a new perspective on this debate by looking at one of the central elements in French national culture—luxury wine—and the rural communities that profited from its production. Focusing on the development of the champagne industry between 1820 and 1920, Guy explores the role of private interests in the creation of national culture and in the nation-building process. Drawing on concepts from social and cultural history, she shows how champagne helped fuel the revolution in consumption as social groups searched for new ways to develop cohesion and to establish status. By the end of the nineteenth century, Guy concludes, the champagne-producing provinces in the department of Marne had developed a rhetoric of French identity that promoted its own marketing success as national. This ability to mask local interests as national concerns convinced government officials of the need, at both national and international levels, to protect champagne as a French patrimony.

How fakes, fraudsters, and grape crusaders have shaped the world of wine. This novel take on the history of wine reveals that, whether by adding toxic sweeteners or passing off counterfeit bottles, wine fraud is abundant—and as old as wine itself. *Vintage Crime* will intrigue even the most sated of wine drinkers with its juicy tales of deception, raising interesting questions along the way: what counts as wine, why do we drink it, and what makes a wine truly authentic? The world of wine prides itself on its aura of respectability, but it has always had a murky side. Packed with engaging vignettes, *Vintage Crime* brings to life famous enthusiasts and crafty con artists from ancient Rome to modern-day California. It also introduces us to lesser-known industry figures: the scrupulous merchants, honest growers, and cutting-edge scientists who have led the fight against fraudsters. Author Rebecca Gibb holds the rare, sought-after distinction of Master of Wine, yet she writes in an engaging style that doesn't require any prior wine knowledge, skillfully synthesizing popular wine histories for amateur sleuths and armchair sommeliers alike. A portion of book royalties will be donated by the author towards finding a cure for Duchenne muscular dystrophy.

After an initial examination of France's viticultural society and the process of creating wine, Thomas Brennan turns his attention to the wine trade, the process of finding the buyers who would make the vines bear economic fruit. He draws on remarkably revealing statistics from Champagne to establish the crucial role played by brokers in this trade. Brennan also examines the role of brokers in the early eighteenth century, both nationally and in the provinces of Champagne and Burgundy. He analyzes the winegrowers' response to the brokers' innovations and growing power, interpreting the language of judicial, political, and silent protests to illuminate the emerging views of the market's role in society. Brennan concludes with a look at the internationalization of the wine trade, as commercial ties grew to knit together most of France in the late eighteenth century, and certain provinces moved to thrust themselves into a wider, European commercial world.

During the past eight decades French vineyards, wineries, and wine marketing efforts have undergone such profound changes—from technological, scientific, economic, and commercial standpoints—that the transformation is revolutionary for an industry dating back thousands of years. Here Leo Loubre examines how the modernization of Western society has brought about new conditions in well-established markets, making the introduction of novel techniques and processes a matter of survival for winegrowers. Not only does Loubre explain how altered environmental conditions have enabled pioneering enologists to create styles of wine more suited to contemporary tastes and living arrangements, but he also discusses the social impact of the wine revolution on the employees in the industry. The third generation of this new viticultural regime has encountered working and living conditions drastically different from those of its predecessors, while witnessing the near disappearance of the working class

and the decline of small and medium growers of ordinary wines. Originally published in 1990. À l'heure où la polémique sur le réchauffement climatique se fait de plus en plus vive, il était important de fournir au monde viticole une étude de l'influence du climat français sur une culture aussi complexe que la vigne. En effet, bien que de climat tempéré, la France offre une grande diversité de conditions climatiques où la vigne peut être cultivée depuis l'Alsace jusqu'à la Corse, ou de la Vendée au Jura et aux Alpes. Cet ouvrage présente donc l'ensemble des grands vignobles français à partir d'une trame climatique, ce qui conduit à un découpage original en six grandes régions viticoles. Le réchauffement climatique et ses perspectives y sont ainsi abordés dans les différents vignobles. L'auteur présente à la fois les résultats d'une enquête de terrain dans le milieu viticole et les résultats de chercheurs (météorologues, climatologues, œnologues, Inra, Chambres d'agriculture). Ce livre est illustré par de nombreuses cartes, tableaux, diagrammes climatiques où les données de près d'un siècle sont analysées. Il offre également, une abondante bibliographie et un vocabulaire des domaines viticole et climatique sur le sujet traité.
